Preface		xiii
<b>PART I GENERAL PRINCIPLES</b>		<b>1</b>
CHAPTER 1	Methodological Considerations	3
	<i>William P. Morgan</i>	
	Ethical Considerations	5
	Research Strategies	7
	Behavioral Artifacts	13
	Sample Size and Experimental Design	22
	Meta-Analysis	26
	Overall Summary	28
CHAPTER 2	Prevention of Sedentary Lifestyles: Rationale and Methods	33
	<i>Daniel S. Kirschenbaum</i>	
	A Rationale for Prevention	34
	A Rationale for Habitual Physical Activity	36
	Concepts and Approaches in Prevention	38
	Toward Effective Programs for Anti-Sedentarianism	42
	Recommendations Toward Effective Anti-Sedentarianism	44
	Summary	48
CHAPTER 3	Exercise Prescription	49
	<i>Andrea L. Dunn and Steven N. Blair</i>	
	How Much Exercise Is Needed for Health?	50
		<b>vii</b>

	Physical Activity Needed for Specific Health Outcomes	54
	New Approaches for Increasing Physical Activity	
	Behavior	58
	Summary	62
CHAPTER 4	Adherence to Physical Activity	63
	<i>Rod K. Dishman and Janet Buckworth</i>	
	Exercise Behavior	64
	Determinants	64
	Interventions	72
	Measurement Issues	76
	Summary and Conclusions	79
CHAPTER 5	Drug Therapy and Physical Activity	81
	<i>Egil W. Martinsen and Johan Kvalvik Stanghelle</i>	
	Neuroleptics	82
	Antidepressants	83
	Lithium	85
	Minor Tranquilizers	86
	$\beta$ -Adrenergic Blocking Agents	87
	Clinical Experiences with Exercise for Psychiatric	
	Patients Receiving Psychopharmacological Treatment	90
	Summary	90
<b>PART II PSYCHOLOGICAL RESPONSES</b>		
<b>TO PHYSICAL ACTIVITY</b>		91
CHAPTER 6	Antidepressant Effects of Physical Activity	93
	<i>Egil W. Martinsen and William P. Morgan</i>	
	Clinical Studies	94
	Analogue Research	101
	Practical Management	104
	Hypothesized Mechanisms	105
	Summary	105
CHAPTER 7	Anxiolytic Effects of Physical Activity	107
	<i>John S. Raglin</i>	
	Defining Anxiety	108
	Assessment of Anxiety	109
	Previous Reviews	111
	Acute Physical Activity	115
	Population Issues	120

	Chronic Exercise	122
	Clinical Samples	124
	Overall Summary	126
CHAPTER 8	<b>Physical Activity and Self-Esteem</b> <i>Robert J. Sonstroem</i>	127
	The Effect of Exercise on Self-Esteem	129
	Recent Models and Measures	133
	Summary	143
CHAPTER 9	<b>Overtraining and Staleness</b> <i>Patrick J. O'Connor</i>	145
	Conceptualization of Overtraining and Staleness	146
	Mood States as Markers of Staleness	151
	Summary	159
	<b>PART III HYPOTHESIZED MECHANISMS</b>	161
CHAPTER 10	<b>The Endorphin Hypothesis</b> <i>Pavel Hoffmann</i>	163
	Endogenous Opioid Systems	164
	Opioid Systems and Behavior	168
	Activation of Endogenous Opioid Systems by Physical Activity	169
	Endogenous Opioid Systems and Behavioral Effects of Exercise	172
	Are Opioid-Mediated Effects of Exercise Elicited by Activation of Afferent Nerves From Contracting Muscles?	174
	Conclusion	176
CHAPTER 11	<b>The Serotonin Hypothesis</b> <i>Francis Chaouloff</i>	179
	Physical Activity and the Extraneuronal Regulation of 5-hydroxytryptamine Synthesis	180
	Physical Activity and 5-hydroxytryptamine Synthesis and Metabolism	184
	Physical Activity and 5-hydroxytryptamine Release	187
	Physical Activity and 5-hydroxytryptamine Receptors	189
	Physical Activity, Mood, and 5-hydroxytryptamine: The Need for a Reliable Animal Model	195
	Conclusion	198
	Addendum	198

CHAPTER 12	The Norepinephrine Hypothesis <i>Rod K. Dishman</i>	199
	The Norepinephrine Hypothesis: Past and Present	199
	Norepinephrine and Physical Activity: Peripheral Measures	208
	Norepinephrine and Physical Activity: Brain	210
	Summary	212
CHAPTER 13	The Thermogenic Hypothesis <i>Kelli F. Koltyn</i>	213
	Measurement of Body Temperature	216
	Temperature Manipulation	219
	Future Directions	224
	Summary	226
CHAPTER 14	Conclusion: State of the Field and Future Research <i>William P. Morgan</i>	227
	Future Research	230
	Summary	231
