Preface	ix
List of notation	xii
<b>1 Best approximation and duality in extremal problems</b>	<b>1</b>
1.1 Best approximation	1
1.2 Formulation of extremal problems	6
1.3 Duality of extremal problems in linear spaces	10
1.4 Duality in functional spaces	17
1.5 Duality for best approximation of classes of functions	29
Comments	41
Exercises	42
<b>2 Polynomials and spline functions as approximating tools</b>	<b>44</b>
2.1 Polynomials of best approximation	45
2.2 Linear methods for polynomial approximation, Lebesgue constants	51
2.3 Polynomial splines	65
2.4 Spline interpolation	75
2.5 On the existence of perfect splines with prescribed zeros	91
Comments	99
Exercises	100
<b>3 Comparison theorems and inequalities for the norms of functions and their derivatives</b>	<b>101</b>
3.1 Standard splines	101
3.2 Comparison theorems in general cases	107
3.3 Comparison theorems and exact inequalities for differentiable functions	119
3.4 Internal extremal properties of splines	134
3.5 Inequalities for polynomials	144
Comments	152
Other results and exercises	153

<b>4 Polynomial approximation of classes of functions with bounded <math>r</math>th derivative in <math>L_p</math></b>	<b>155</b>
4.1 Minimizing the error in the class of $\lambda$ -methods	155
4.2 The supremums of the best approximations of classes $W_p^r$ by trigonometric polynomials	167
4.3 Approximation by partial sums of Fourier series, their means and analogs	176
4.4 Approximation by algebraic polynomials on an interval	197
Comments	207
Other results and exercises	209
<b>5 Spline approximation of classes of functions with a bounded <math>r</math>th derivative</b>	<b>211</b>
5.1 Inequalities for functions with prescribed zeros	211
5.2 The interpolation error of the periodic splines with minimal defect on classes $W_p^r$	218
5.3 Estimates for spline interpolation on classes $W_p^r[a, b]$	232
5.4 Best approximation by splines of minimal defect	246
Comments	257
Other results and exercises	258
<b>6 Exact constants in Jackson inequalities</b>	<b>260</b>
6.1 Modulus of continuity and general statement of the problems	260
6.2 Jackson inequalities for polynomial approximations	269
6.3 Jackson-type inequalities for spline approximation	283
Comments	295
Other results and exercises	296
<b>7 Approximation of classes of functions determined by modulus of continuity</b>	<b>299</b>
7.1 General facts and $\Sigma$ -rearrangements	300
7.2 Exact results for the best approximation of classes $W^r H^\omega$ , $W^r H^\omega[a, b]$	318
7.3 Approximation by linear methods	340
Comments	353
Other results and exercises	354
<b>8 <math>N</math>-widths of functional classes and closely related extremal problems</b>	<b>356</b>
8.1 $N$ -widths of classes of functions with bounded $r$ th derivatives	357
8.2 $N$ -widths of classes defined by the modulus of continuity	377
8.3 Closely related extremal problems	343
Comments	406
Other results and exercises	407
<b>Appendix</b>	<b>410</b>
A1 Hölder and Minkowski inequalities and some extremal relations	410
A2 Steklov functions	415

<b>A3</b>	<b>Proofs of comparison theorems for <math>\Sigma</math>-rearrangements</b>	<b>418</b>
	Auxiliary results	418
	Proofs of Theorems 7.1.4 and 7.1.5	422
	Proof of Theorem 7.1.6	424
	References	426
<b>I</b>	<b>Monographs</b>	<b>426</b>
	<b>A</b> Monographs on approximation theory	426
	<b>B</b> Other books	427
<b>II</b>	<b>Articles</b>	<b>428</b>
	Index of notation	450
	Index	452
