<i>Preface</i>	ix
<i>Acknowledgements</i>	xi
1 Aims, methods and model	1
1.1 Aims	1
1.2 Method	4
1.3 Model	5
2 The Early English period: the beginnings to the thirteenth century	9
2.1 The nature of the data	9
2.2 Vowel lengthening processes in Old English	15
2.2.1 Compensatory lengthening	18
2.2.2 Lengthenings in more general fricative contexts	19
2.2.3 Stressed vowel lengthening in nasal sonorant contexts	21
2.2.4 Lengthening in nasal and non-nasal sonorant contexts: Late Old English <i>homorganic lengthening</i>	24
2.2.5 The reconstruction of vowel length	26
2.2.6 The date of the <i>homorganic lengthening</i> process	29
2.3 Diphthongization processes in Old English	33
2.3.1 Old English <i>Breaking</i>	38
2.3.2 <i>Breaking</i> of long stressed vowels	45
2.3.3 Causes of this diphthongization in pre-[x], [r], [l] contexts	47
2.3.4 Did this diphthongization ever really happen?	49

2.3.5	Exceptions to the <i>Breaking</i> process	51
2.3.6	<i>Breaking</i> in other fricative contexts	54
2.4	Monophthongization processes: Late Old English developments to <i>Breaking</i> -produced diphthongs	58
2.4.1	The instability of contextually derived alternations	61
2.4.2	Monophthongization and raising as a unified process	62
2.4.3	Middle English monophthongization processes	64
2.4.4	The Middle English development of the Old English [eo] diphthong	66
2.4.5	Special Kentish developments: <i>syllabicity shifting</i>	68
2.5	Vowel harmony processes in Old English	73
2.5.1	Backness/labial harmony two: Old English <i>Back Mutation</i> or <i>Back Umlaut</i>	78
2.5.2	Palatal/frontness vowel harmony: Old English <i>i-umlaut</i>	81
2.5.3	The nature of <i>palatal vowel harmony</i> in Old English	87
3	The Middle English period: the thirteenth to the fifteenth centuries	94
3.1	The nature of the data	94
3.2	Vowel lengthening processes in Middle English	98
3.2.1	<i>Open syllable lengthening in other languages</i>	113
3.2.2	Lengthening and lowering as a unified process	113
3.2.3	Some further thoughts on <i>open syllable lengthening</i>	115
3.2.4	'Exceptions' to <i>open syllable lengthening</i>	117
3.2.5	Middle English <i>open syllable lengthening</i> as a vowel harmony process	119
3.2.6	Middle English <i>open syllable lengthening</i> and homorganic clusters	120
3.3	Vowel length and vowel raising: the Middle English vowel shift	127
3.3.1	The first English vowel shift	137
3.3.2	The Middle English vowel shift	139
3.3.3	The irregular application of palatalization/labialization	140
3.4	Diphthongization processes in Middle English: Middle English <i>Breaking</i>	141

3.4.1	Middle English <i>Breaking</i> in voiceless velar fricative environments: diphthongization of back mid vowels	144
3.4.2	Middle English <i>Breaking</i> in voiced fricative contexts: Middle English [j] <i>Breaking</i>	149
3.4.3	Diphthongization by [w] vocalization	157
3.4.4	Middle English <i>Breaking</i> in the sonorant consonant [r] and [l] environment	159
3.4.5	Middle English <i>Breaking</i> in other sonorant and fricative environments	160
3.4.6	Other <i>Breaking</i> stratagems: bi-continuant cluster busting	166
3.5	Syllable shapes and their phonetic consequences	171
3.5.1	Syllable contact points	182
3.5.2	Stratagems for achieving ambisyllabicity	187
3.5.3	'Shuffling' the linear sequence of segments in syllables: <i>metathesis</i>	190
4	The sixteenth to the eighteenth centuries	196
4.1	The nature of the data	196
4.2	Vowel length and vowel shifting: the <i>English vowel shift</i>	202
4.2.1	Possible motivations for such 'large scale' processes	221
4.2.2	Vowel shifts as independent phonetic events	230
4.3	Vowel diphthongizations and lengthenings: <i>Breaking</i> contexts and vocalizations	236
4.3.1	More <i>Breaking</i> stratagems: bi-continuant cluster busting again	248
4.4	Monophthongization processes	253
4.4.1	[au] and [ai] diphthongs in the sixteenth and seventeenth centuries	255
4.4.2	Middle English [au] diphthong developments	257
4.4.3	Other [au] developments	260
4.4.4	Middle English [æi] diphthong developments	262
4.5	Syllable shapes and their phonetic consequences	264
4.5.1	[h] 'dropping' and insertion	265
4.5.2	Nasals at syllable interface	274
5	The eighteenth century to the present day	279
5.1	The nature of the data	279
5.2	Vowel length and vowel shifting: the <i>English vowel shift</i>	281

5.2.1	Vowel shifts and mergers	287
5.2.2	Merger avoiding stratagems	288
5.3	Diphthongization processes: vowel shifts and diphthongization	292
5.3.1	Long [ee] mid vowel alternants: a case study of a modern dialect	293
5.3.2	Vocalization and <i>Breaking</i>	296
5.3.3	[r] effacement and vocalization	298
5.4	Syllable shapes and their phonetic consequences: [r] at syllable interface	301
5.5	Monophthongization processes: monophthongization and merger	302
	<i>Bibliography</i>	305
	<i>Index</i>	316
