Preface	v
Introduction	1
1 Generalities	5
1.1 The set-up	5
1.2 The Markov chain X_\cdot (with jump rate 1)	7
1.3 Some potential theory	10
1.4 Feynman–Kac formula	23
1.5 Local times	25
1.6 The Markov chain \bar{X}_\cdot (with variable jump rate)	26
2 Isomorphism theorems	31
2.1 The Gaussian free field	31
2.2 The measures $P_{x,y}$	35
2.3 Isomorphism theorems	41
2.4 Generalized Ray–Knight theorems	45
3 The Markovian loop	61
3.1 Rooted loops and the measure μ_r on rooted loops	61
3.2 Pointed loops and the measure μ_p on pointed loops	70
3.3 Restriction property	74
3.4 Local times	75
3.5 Unrooted loops and the measure μ^* on unrooted loops	82
4 Poisson gas of Markovian loops	85
4.1 Poisson point measures on unrooted loops	85
4.2 Occupation field	87
4.3 Symanzik’s representation formula	91
4.4 Some identities	95
4.5 Some links between Markovian loops and random interlacements	100
