

Contents at a Glance

Introduction	1
Part I: Getting Started with Organic Chemistry.....	5
Chapter 1: The Wonderful World of Organic Chemistry	7
Chapter 2: Dissecting Atoms: Atomic Structure and Bonding	15
Chapter 3: Speaking with Pictures: Drawing Structures	35
Chapter 4: Covering the Bases (And the Acids)	59
Chapter 5: Reactivity Centers: Functional Groups	69
Chapter 6: Seeing in 3-D: Stereochemistry	85
Part II: Hydrocarbons	103
Chapter 7: What's in a Name? Alkane Nomenclature	105
Chapter 8: Drawing Alkanes	113
Chapter 9: Seeing Double: The Alkenes	129
Chapter 10: Reactions of Alkenes	145
Chapter 11: It Takes Alkynes: The Carbon-Carbon Triple Bond.....	159
Part III: Functional Groups.....	167
Chapter 12: Replacing and Removing: Substitution and Elimination Reactions	169
Chapter 13: Getting Drunk on Organic Molecules: The Alcohols	185
Chapter 14: Side-by-Side: Conjugated Alkenes and the Diels–Alder Reaction.....	193
Chapter 15: Lord of the Rings: Aromatic Compounds	203
Chapter 16: Bringing Out the Howitzers: Reactions of Aromatic Compounds	221
Part IV: Spectroscopy and Structure Determination	235
Chapter 17: A Smashing Time: Mass Spectrometry	237
Chapter 18: Seeing Good Vibrations: IR Spectroscopy	255
Chapter 19: NMR Spectroscopy: Hold onto Your Hats, You're Going Nuclear!.....	267
Chapter 20: Following the Clues: Solving Problems in NMR.....	289

<i>Part V: The Part of Tens</i>	309
Chapter 21: Ten (Or So) Great Organic Chemists	311
Chapter 22: Ten Cool Organic Discoveries.....	317
Chapter 23: Ten Cool Organic Molecules	325
<i>Part VI: Appendixes</i>	331
Appendix A: Working Multistep Synthesis Problems.....	333
Appendix B: Working Reaction Mechanisms	341
Appendix C: Glossary	347
<i>Index</i>	359

Table of Contents

Introduction	1
About This Book	2
Foolish Assumptions	3
Icons Used in This Book	3
Beyond the Book	4
Where to Go from Here	4
Part I: Getting Started with Organic Chemistry	5
Chapter 1: The Wonderful World of Organic Chemistry	7
Shaking Hands with Organic Chemistry	7
What Are Organic Molecules, Exactly?	9
An Organic Chemist by Any Other Name	10
Synthetic organic chemists	11
Bioorganic chemists	11
Natural products chemists	12
Physical organic chemists	13
Organometallic chemists	13
Computational chemists	13
Materials chemists	14
Chapter 2: Dissecting Atoms: Atomic Structure and Bonding	15
Electron House Arrest: Shells and Orbitals	16
Electron apartments: Orbitals	17
Electron instruction manual: Electron configuration	19
Atom Marriage: Bonding	20
To Share or Not to Share: Ionic and Covalent Bonding	21
Mine! They're all mine! Ionic bonding	21
The name's Bond, Covalent Bond	22
Electron piggishness and electronegativity	23
Separating Charge: Dipole Moments	25
Problem solving: Predicting bond dipole moments	26
Problem solving: Predicting molecule dipole moments	26
Seeing Molecular Geometries	28
Mixing things up: Hybrid orbitals	28
Predicting hybridization for atoms	31
It's All Greek to Me: Sigma and Pi Bonding	32

Chapter 3: Speaking with Pictures: Drawing Structures	35
Picture-Talk: Lewis Structures	37
Taking charge: Assigning formal charges	37
Drawing structures	39
Atom packing: Condensed structures	40
Structural shorthand: Line-bond structures	41
Converting Lewis structures to line-bond structures	41
Determining the number of hydrogens on line-bond structures	43
So lonely: Determining lone pairs on atoms	44
Problem Solving: Arrow Pushing	45
Drawing Resonance Structures	47
Rules for resonance structures	48
Problem solving: Drawing resonance structures	49
Drawing more than two resonance structures	53
Assigning importance to resonance structures	54
Common mistakes in drawing resonance structures	56
Chapter 4: Covering the Bases (And the Acids)	59
A Defining Moment: Acid-Base Definitions	60
Arrhenius acids and bases: A little watery	60
Pulling for protons: Brønsted-Lowry acids and bases	61
Electron lovers and haters: Lewis acids and bases	62
Comparing Acidities of Organic Molecules	63
Comparing atoms	64
Seeing atom hybridization	65
Seeing electronegativity effects	65
Seeing resonance effects	66
Defining pKa: A Quantitative Scale of Acidity	67
Problem Solving: Predicting the Direction of Acid-Base Reactions at Equilibrium	68
Chapter 5: Reactivity Centers: Functional Groups	69
Hydrocarbons	70
Double the fun: The alkenes	70
Alkynes of fun	72
Smelly compounds: The aromatics	73
Singly Bonded Heteroatoms	74
Happy halides	74
For rubbing and drinking: Alcohols	76
What stinks? Thiols	76
How ethereal	77
Carbonyl Compounds	78
Living on the edge: Aldehydes	78
Stuck in the middle: Ketones	79

Carboxylic acids.....	79
Sweet-smelling compounds: Esters	81
Nitrogen-containing functional groups	81
I am what I amide.....	81
Be nice, don't be amine person.....	82
Nitriles	83
Test Your Knowledge.....	83
Chapter 6: Seeing in 3-D: Stereochemistry.	85
Drawing Molecules in 3-D	86
Comparing Stereoisomers and Constitutional Isomers.....	86
Mirror Image Molecules: Enantiomers.....	87
Seeing Chiral Centers	88
Assigning Configurations to Chiral Centers: The R/S Nomenclature.....	89
Problem Solving: Determining R/S Configuration.....	90
Step 1: Prioritizing the substituents	90
Step 2: Putting the number-four substituent in the back.....	91
Step 3: Drawing the curve.....	92
The Consequences of Symmetry: Meso Compounds.....	93
Rotating Plane-Polarized Light.....	95
Multiple Chiral Centers: Diastereomers	96
Representing 3-D Structures on Paper: Fischer Projections.....	97
Rules for using Fischer projections.....	97
Determining R/S configuration from a Fischer projection.....	97
Seeing stereoisomerism with Fischer projections	98
Spotting meso compounds with Fischer projections	99
Keeping the Jargon Straight	100
Part II: Hydrocarbons	103
Chapter 7: What's in a Name? Alkane Nomenclature	105
All in a Line: Straight-Chain Alkanes	105
Reaching Out: Branching Alkanes	106
Finding the longest chain.....	107
Numbering the chain.....	107
Seeing the substituents.....	108
Ordering the substituents.....	109
More than one of a kind	109
Naming complex substituents.....	110
Chapter 8: Drawing Alkanes	113
Converting a Name to a Structure	113
Conformation of Straight-Chain Alkanes	115
Newman! Conformational analysis and Newman projections.....	116
Conformations of butane	117

Full Circle: Cycloalkanes.....	119
The stereochemistry of cycloalkanes	119
Conformations of cyclohexane	120
Problem Solving: Drawing the Most Stable Chair Conformation.....	123
Reacting Alkanes: Free-Radical Halogenation.....	125
Getting things started: Initiation.....	125
Keeping the reaction going: Propagation	126
You're fired: Termination steps.....	126
Selectivity of chlorination and bromination	128
Chapter 9: Seeing Double: The Alkenes	129
Defining Alkenes	130
Taking Away Hydrogens: Degrees of Unsaturation.....	131
Determining degrees of unsaturation from a structure.....	132
Problem solving: Determining degrees of unsaturation from a molecular formula.....	133
The Nomenclature of Alkenes.....	134
Numbering the parent chain	134
Adding multiple double bonds.....	136
Common names of alkenes.....	136
The Stereochemistry of Alkenes.....	137
You on my side or their side? Cis and trans stereochemistry.....	137
Playing a game of high-low: E/Z stereochemistry.....	138
Stabilities of Alkenes	140
Alkene substitution.....	140
Stability of cis and trans isomers	140
Formation of Alkenes	141
Elimination of acid: Dehydrohalogenation	141
Losing water: Dehydration of alcohols	142
Alkenes from coupling: The Wittig reaction.....	142
Chapter 10: Reactions of Alkenes	145
Adding Hydrohalic Acids across Double Bonds.....	145
I'm Positive: Carbocations.....	147
Helping a neighbor: Hyperconjugation	147
Resonance stabilization of carbocations.....	148
Carbocation mischief: Rearrangements.....	149
Adding Water across Double Bonds	150
Markovnikov addition: Oxymercuration-demercuration.....	150
Anti-Markovnikov addition: Hydroboration.....	151
A double shot: Dihydroxylation	152
Double the fun: Bromination	153
Chopping Up Double Bonds: Ozonolysis.....	154
Double-Bond Cleavage: Permanganate Oxidation.....	155
Making Cyclopropanes with Carbenes	155
Making Cyclopropanes: The Simmons-Smith Reaction	156
Making Epoxides.....	157
Adding Hydrogen: Hydrogenation.....	157

Chapter 11: It Takes Alkynes: The Carbon-Carbon Triple Bond . . . 159

Naming Alkynes	159
Seeing Alkyne Orbitals	160
Alkynes in Rings.....	161
Making Alkynes	161
Losing two: Dehydrohalogenation.....	161
Coupling alkynes: Acetylide chemistry.....	162
Brominating alkynes: Double the fun	163
Saturating alkynes with hydrogen	164
Adding one hydrogen molecule to alkynes	164
Oxymercuration of alkynes	165
Hydroboration of alkynes	165

Part III: Functional Groups..... 167**Chapter 12: Replacing and Removing: Substitution and Elimination Reactions. 169**

Group Swap: Substitution Reactions.....	169
Seeing Second-Order Substitution: The S_N2 Mechanism.....	170
How fast? The rate equation for the S_N2 reaction.....	171
Effect of the substrate on the S_N2 reaction.....	172
Needs nucleus: The role of the nucleophile.....	173
Seeing the S_N2 reaction in 3-D: Stereochemistry.....	175
Seeing solvent effects	175
I'm outta here: The leaving group.....	176
First-Order Substitution: The S_N1 Reaction.....	177
How fast? The rate equation for the S_N1 reaction.....	177
Seeing good S_N1 substrates	179
Seeing solvent effects on the S_N1 reaction.....	180
Stereochemistry of the S_N1 reaction	180
Other fun facts about the S_N1 reaction	181
Seeing Elimination Reactions	182
Seeing second-order eliminations: The E2 reaction.....	182
Seeing first-order elimination: The E1 reaction	183
Help! Distinguishing Substitution from Elimination.....	183

Chapter 13: Getting Drunk on Organic Molecules: The Alcohols. . . . 185

Classifying Alcohols	185
An Alcohol by Any Other Name: Naming Alcohols	186
Alcohol-Making Reactions	188
Adding water across double bonds.....	188
Reduction of carbonyl compounds	188
The Grignard reaction.....	190
Reactions of Alcohols	191
Losing water: Dehydration	191
Making ethers: Williamson ether synthesis.....	191
Oxidation of alcohols	192

Chapter 14: Side-by-Side: Conjugated Alkenes and the Diels–Alder Reaction	193
Seeing Conjugated Double Bonds.....	193
Addition of Hydrohalic Acids to Conjugated Alkenes	194
Seeing the reaction diagram of conjugate addition.....	195
Comparing kinetics and thermodynamics of conjugate addition	196
The Diels–Alder Reaction	197
Seeing the diene and the dienophile	198
The stereochemistry of addition	199
Seeing bicyclic products.....	199
Problem Solving: Determining Products of Diels–Alder Reactions.....	200
Chapter 15: Lord of the Rings: Aromatic Compounds	203
Defining Aromatic Compounds.....	203
The structure of benzene.....	204
Diversity of aromatic compounds	205
So, what exactly makes a molecule aromatic?.....	206
Hückel’s $4n + 2$ rule.....	206
Explaining Aromaticity: Molecular Orbital Theory	207
What the heck is molecular orbital theory?	207
Making molecular orbital diagrams.....	208
Two rings diverged in a wood: Frost circles	209
Making the molecular orbital diagram of benzene.....	209
Seeing the molecular orbitals of benzene.....	210
Making the molecular orbital diagram of cyclobutadiene.....	212
Problem Solving: Determining Aromaticity.....	212
Problem Solving: Predicting Acidities and Basicities	216
Comparing acidities.....	216
Comparing basicities.....	217
Naming Benzenes and Aromatics	218
Common names of substituted benzenes.....	218
Names of common aromatics.....	219
Chapter 16: Bringing Out the Howitzers: Reactions of Aromatic Compounds	221
Electrophilic Aromatic Substitution of Benzene	221
Adding alkyl substituents: Friedel–Crafts alkylation.....	223
Overcoming adversity: Friedel–Crafts acylation	224
Reducing nitro groups.....	225
Oxidation of alkylated benzenes.....	225
Adding Two: Synthesis of Disubstituted Benzenes	226
Electron donors: Ortho-para activators.....	227
Electron-withdrawing groups: Meta directors	228
Problem Solving: Synthesis of Substituted Benzenes.....	231
Nucleophiles Attack! Nucleophilic Aromatic Substitution.....	232

Part IV: Spectroscopy and Structure Determination 235**Chapter 17: A Smashing Time: Mass Spectrometry 237**

Defining Mass Spectrometry	238
Taking Apart a Mass Spectrometer	238
The inlet	239
Electron ionization: The smasher	239
The sorter and weigher	240
Detector and spectrum	241
The Mass Spectrum	242
Kind and Caring: Sensitivity of Mass Spec	243
Resolving the Problem: Resolution	243
Changing the Weight: Isotopes	244
The Nitrogen Rule	246
Identifying Common Fragmentation Patterns	247
Smashing alkanes	247
Breaking next to a heteroatom: Alpha cleavage	248
Loss of water: Alcohols	249
Rearranging carbonyls: The McLafferty rearrangement	249
Breaking benzenes and double bonds	250
Self test: Working the problem	251
Key Ideas Checklist	253

Chapter 18: Seeing Good Vibrations: IR Spectroscopy 255

Bond Calisthenics: Infrared Absorption	256
Applying Hooke's law to molecules	256
Seeing bond vibration and IR light absorption	257
Seeing absorption intensity	259
IR forbidden stretches	259
Dissecting an IR Spectrum	260
Identifying the Functional Groups	261
Sizing up the IR spectrum	262
Recognizing functional groups	263
Seeing to the Left of the C-H Absorptions	264
Big and fat: The alcohols	264
Milking the spectrum: Amines	264
Seeing to the Right of the C-H Absorptions	264
Big and tall: Carbonyl groups	265
Hydrocarbon stretches: Alkenes, alkynes, and aromatics	265

**Chapter 19: NMR Spectroscopy: Hold onto Your Hats,
You're Going Nuclear! 267**

Why NMR?	268
How NMR Works	269
Giant magnets and molecules: NMR theory	269
Grab your jackets: Electron shielding	272

The NMR Spectrum	273
Standardizing chemical shifts	273
Seeing symmetry and chemical equivalency	274
The NMR Spectrum Manual: Dissecting the Pieces	276
Seeing the chemical shift	276
Incorporating the integration.....	278
Catching on to coupling.....	280
Considering Carbon NMR.....	285
Checklist: Putting the Pieces Together.....	286

Chapter 20: Following the Clues: Solving Problems in NMR 289

Follow the Clues.....	290
Clue 1: Determine the degrees of unsaturation from the molecular formula.....	291
Clue 2: Look at the IR spectrum to determine the major functional groups present in the unknown compound.....	291
Clue 3: Determine the peak ratios by measuring the heights of the integration curves.....	292
Clue 4: Break the NMR peaks into fragments using the integration from Clue 3.....	294
Clue 5: Combine the fragments in a way that fits with the NMR peak splitting, the chemical shift, and the degrees of unsaturation	295
Clue 6: Recheck your structure with the NMR and the IR spectrum to make sure it's an exact match.....	296
Working Problems	297
Example 1: Using the molecular formula and NMR to deduce the structure of a molecule.....	297
Example 2: Using the molecular formula, IR, and NMR to deduce the structure of a molecule.....	302
Three Common Mistakes in NMR Problem Solving	306
Mistake #1: Trying to determine a structure from the chemical shift	306
Mistake #2: Starting with coupling	307
Mistake #3: Confusing integration with coupling	308

***Part V: The Part of Tens* 309**

Chapter 21: Ten (Or So) Great Organic Chemists. 311

August Kekulé	311
Friedrich Wöhler.....	312
Archibald Scott Couper	312
Johan Josef Loschmidt.....	312

Louis Pasteur	312
Emil Fischer	313
Percy Julian	313
Robert Burns Woodward	314
Linus Pauling	314
Dorothy Hodgkin	315
John Pople	315

Chapter 22: Ten Cool Organic Discoveries 317

Explosives and Dynamite!	317
Fermentation	318
The Synthesis of Urea	318
The Handedness of Tartaric Acid	319
Diels–Alder Reaction	320
Buckyballs	320
Soap	321
Aspartame	322
Penicillin	322
Teflon	323

Chapter 23: Ten Cool Organic Molecules 325

Octanitrocubane	325
Fenestrane	326
Carbon Nanotubes	326
Bullvalene	326
The Norbornyl Cation	327
Capsaicin	328
Indigo	328
Maitotoxin	329
Molecular Cages	329
Fucitol	330

Part VI: Appendixes 331

Appendix A: Working Multistep Synthesis Problems 333

Why Multistep Synthesis?	333
The Five Commandments	335
Commandment 1: Thou shalt learn thy reactions	336
Commandment 2: Thou shalt compare carbon skeletons	336
Commandment 3: Thou shalt work backward	337
Commandment 4: Thou shalt check thyne answer	339
Commandment 5: Thou shalt work many problems	339

Appendix B: Working Reaction Mechanisms	341
The Two Unspoken Mechanism Types.....	341
Do's and Don'ts for Working Mechanisms	343
Types of Mechanisms	345
Appendix C: Glossary	347
 <i>Index</i>	 359
