

TABLE OF CONTENTS

	Preface	xiii
I.	Introduction	1
II.	Some Definitions	7
	A. Proposition, Argument, Deduction and Induction.	7
	B. Validity and Soundness	8
	C. Some Differences between Deduction and Induction.	10
	Exercises.	13
III.	Identifying Argument Structure	15
	Exercises.	21
IV.	Terms and Classes.	23
	A. Terms.	23
	B. Denotation and Connotation	23
	C. The Relation between Connotation and Denotation	25
	D. Must Every Term Denote Something or Other?	26
	E. Ambiguity and Vagueness.	28
	F. The Negations of Terms	29
	G. Some Further Relations between Terms	30
	H. Different Kinds of Denotations	32
	1. Using a Term Versus Talking about a Term	32
	2. Referring to Classes Versus Referring to Individual Members of a Class	33
	I. The Supposition of Terms	34
	J. Defining Terms	34
	1. Definition and Connotation	34
	2. Definition and Denotation.	39
	Exercises.	41
V.	Categorical Propositions	45
	A. What a Categorical Proposition Is.	45
	B. The Parts of the Categorical Propo- sition	45
	C. The Types of Categorical Propositions.	46
	1. Quality and Quantity	46
	2. The Four Possible Combinations of Quality and Quantity	46
	3. Some Shorthand and a Chart	47

D.	Venn Diagrams of Categorical Propositions	49
E.	The Distribution of Terms in Categorical Propositions	54
1.	What "Distributed Term" Means.	54
2.	Which Terms are in Fact Distributed	54
3.	Why Those Terms are Distributed.	55
4.	Why Distribution is Important.	55
5.	A Chart for Distribution	56
	Exercises.	59
VI.	The Square of Opposition and Immediate Inferences	63
A.	Four Relations among Categorical Propositions	63
1.	Relations of Opposition.	63
2.	Relations of Subalternation.	63
B.	Application of these Relations to the Types of Categorical Propositions.	63
1.	Relations of Opposition.	63
a.	Contradiction.	63
b.	Contrareity.	65
c.	Subcontrareity	65
2.	Relations of Subalternation.	66
C.	The Square of Opposition	66
D.	Venn Diagrams and the Square of Opposition	69
E.	Modern Logic and the Square of Opposition	70
F.	Some One-Premise Arguments Based on the Square of Opposition	70
	Exercises.	75
VII.	More Immediate Inferences: Conversion, Obversion, and Contraposition.	77
A.	Equivalence in Meaning	77
B.	Conversion	77
C.	Venn Diagrams and Conversion	80
D.	Obversion.	80
E.	Contraposition: Obversion and Conversion Combined	83
F.	Venn Diagrams and Contraposition	85

	G. An Anomalous Case and its Significance	86
	H. How to Reason Using Immediate Inferences	87
	Exercises	91
VIII.	The Categorical Syllogism	95
	A. What a Categorical Syllogism is.	95
	1. Some Terminology	95
	2. How Syllogisms Work.	95
	B. Mood and Figure and Standard Form.	96
	1. Standard Form.	96
	2. Figure	96
	3. Mood	97
	4. Mood and Figure Combined	97
	C. Rules for Assessing the Validity of Syllogisms	98
	D. Justifying the Rules	101
	E. Venn Diagrams for Categorical Syllogisms	103
	F. Venn Diagrams and Conventions Again.	107
	Exercises	111
IX.	Syllogistic Arguments in Ordinary Language	123
	A. Standard Form Syllogisms and the Negations of Terms	123
	1. How the Problem Arises	123
	2. Immediate Inference and Standard Form	124
	3. Transposing from One Figure to Another.	125
	B. Translating Propositions into Standard Form.	128
	1. Non-Standard Indicators of Classes	128
	a. Adjectives and Adjectival Phrases.	128
	b. Verbs other than the Verb "To Be".	129
	c. Pronouns	129
	2. Non-Standard Indicators of Quality and Quantity	130
	a. Each, Any, Every, Whoever, Whatever, Everything	130

	b.	There is, There are.	131
	c.	Nothing, There is no, There are no	131
	d.	Not All, Not Every, Not Every- one, All ___ is not ___, Every ___ is not ___.	131
	e.	Exclusive Propositions: Only, None but	132
	f.	An, a, the	132
	g.	No Word is Provided to Indi- cate Quality or Quantity . . .	133
	h.	Not Quite All, All but	134
	i.	Conditional Propositions: IF ___, then ___; ___ only if ___; Provided that ___, ___.	135
	3.	Singular Propositions.	137
	C.	Parameters: Making Terms Commensurate.	143
	1.	The Problem.	143
	2.	The Solution: Parameters	144
	3.	Applications	145
		Exercises.	147
X.		Truth-Functional Propositions.	155
	A.	"Simple," "Compound," and "Truth- Functional" Defined.	155
	B.	Some Types of Compound Proposition	156
	C.	Applications	162
		Exercises.	165
XI.		Truth-Functional Arguments	169
	A.	The Disjunctive Syllogism.	169
	B.	The Alternative Syllogism.	171
	C.	Mixed Hypothetical Syllogisms (1): Modus Ponens	174
	D.	Mixed Hypothetical Syllogisms (2): Modus Tollens.	175
	E.	Pure Hypothetical Syllogisms	177
	F.	The Dilemma.	179
	G.	Natural Deduction: A Brief Look.	185
		Exercises.	189
XII.		Introduction to Induction.	193
XIII.		Induction by Enumeration	197
	A.	What Induction by Enumeration is	197

	B.	What Makes These Arguments Stronger or Weaker?	197
	C.	Enumeration and Probability.	198
	D.	Fallacies of Enumeration: Two Types of Hasty Generalization.	199
		1. Insufficient Sampling.	200
		2. Biased Sampling.	200
XIV.		Arguments to Establish Hypotheses.	203
	A.	The Idea of an Explanation	203
	B.	The Importance of the First Figure in Explanations.	204
	C.	The Search for an Explanation is Usually the Search for the Minor Premise of a First Figure Syllogism.	204
	D.	The Structure of Inductive Arguments to Establish--or Reject--Hypotheses.	206
		1. The Basic Form of these Argu- ments: Affirming the Consequent.	206
		2. Testing Hypotheses: What Makes a Hypothesis More or Less Likely to be True?.	207
		a. The Roles of Induction and Deduction in Testing Hypoth- eses	207
		b. The Entire Process Outlined in (a) is Called Testing, Confirming, or Verifying a Hypothesis	208
		c. Disconfirming Hypotheses	210
		d. Crucial Tests and Alternative Hypotheses	213
	E.	Fallacies in Arguing for Hypotheses.	215
		1. The Fallacy of Special Pleading.	215
		2. Ad Hoc Hypotheses.	217
	F.	Other Considerations Affecting the Acceptability of Hypotheses.	218
		1. Simplicity	218
		2. Theoretical Support and Theoretical Disconfirmation.	220
		3. The Role of the Expert: Arguments from Authority	222

XV.	Arguments to Establish Causes.	225
	A. The Idea of a Cause.	225
	B. Techniques for Identifying Causes:	
	Mill's Methods	225
	1. The Method of Agreement.	226
	2. The Method of Difference	226
	3. The Combined Method of Agreement and Difference	227
	4. The Method of Concomitant Variations	228
	5. The Method of Residues	229
	C. Fallacies in Reasoning about Causes:	
	Post Hoc Fallacies	230
	1. The Fallacy of Confusing a Coincidence with a Cause	230
	2. Confusing a Cause with an Effect .	230
	3. Confusing Two Effects of an Under- lying Cause with a Cause and an Effect	230
XVI.	Arguments from Analogy	233
	A. Analogies and Arguments.	233
	B. Tests for Evaluating Arguments from Analogy	234
	C. The Structure of Arguments from Analogy.	237
	D. Nominalism Again	239
	E. Two Final Points about Inductive Arguments.	239
	Exercises.	241
XVII.	Fallacies.	253
	A. What Fallacy is; Types of Fallacies. .	253
	1. Fallacy Means Bad Argument	253
	2. Types of Fallacy	253
	a. Formal Fallacies	253
	b. Inductive Fallacies.	253
	c. Informal Fallacies	254
	B. The Informal Fallacies: A Closer Look.	255
	1. Question-Begging Fallacies	255
	2. Fallacies of Ambiguity	257
	a. How They Work.	257
	b. Equivocation	257

	c.	Composition and Division. . .	257
	d.	Each and Every.	260
	e.	The Use-Mention Fallacy . . .	260
	f.	Confusing Possible with Actual Existence.	260
	g.	Amphiboly and Accent.	260
	3.	Fallacies of Relevance.	262
	a.	Argumentum ad Hominem	262
	b.	Argumentum ad Vericundiam . . .	263
	c.	Argumentum ad Ignorantiam . . .	264
	d.	Argumentum ad Populum	265
		i. Bandwagon Argument.	265
		ii. Snob Appeal	265
		iii. Appeal to Popular Feeling	266
	e.	Argumentum ad Misericordiam . . .	267
	f.	Argumentum ad Baculum	268
	g.	Accident.	268
	h.	Secundum Quid	269
	i.	False Dilemma, Black-and- White Fallacy, and False Obversion	269
	j.	Ignoratio Elenchi	271
	C.	Detecting and Avoiding Fallacies. . .	271
		Exercises	277
XVIII.		Suggestions for Further Reading	287
		Answers to Selected Exercises	289
		Index	305
