Foreword	ix
Introduction	xi
CHAPTER 1. INTELLIGENCE	1
Definitions	1
1. Biological	1
2. Psychological	2
3. Operational	2
4. Developmental	2
Conditions and Factors affecting Intelligence	3
1. Organic Factors	4
2. Maturation	6
3. Education	7
4. Occupation	8
5. Cultural and Family Environment	8
6. Personality and Emotional Stability	9
Clinical Uses of Intelligence Testing	9
1. Diagnosis	9
2. The Assessment of Therapy	10
The Measurement of Intelligence	12
1. Scoring	12
2. Interpretation of Test Results	13

Tests for the Measurement of Intelligence	14
1. Infants (birth to 18 months)	14
2. Pre-school Children (18–30 months)	15
3. Children (4–16 years)	16
4. Intelligence Testing of Adults	21
5. Assessment of Performance in Old People	25
Intellectual Deterioration	27
1. Measurements Based on Sub-test Scatter	29
2. Recognition of Organic Signs	32
3. Summary of Tests of Intellectual Deterioration	36
CHAPTER 2. PERSONALITY	37
Some Definitions	37
Factors Determining and Influencing Personality	38
1. Physical Factors	38
2. Intellectual Factors	44
3. Social and Cultural Factors	45
Mechanisms in the Formation of the Personality	46
Conditions Causing Breakdown of the Personality	47
1. Conflict	47
2. The Repetition of Noxious Stimuli	48
3. Uncertainty	48
4. Lack of Need-satisfaction	48
Aspects of the Personality which can be Measured	49
1. The Measurement of Types	50
2. Needs	51
3. Traits	52
4. Adjustment	53
5. Mood	53
Methods of Personality Assessment	54
1. Rating Scales	55
2. Questionnaires and Inventories	56

3. Projective Tests	59
4. Drawing Tests	72
5. Verbal Tests	73
CHAPTER 3. SPEECH AND LANGUAGE	75
What is Speech?	75
Difference between Expression and Com- prehension	76
Conditions and Factors influencing Speech	77
1. Development	77
2. Intelligence	80
3. Culture and Upbringing	81
4. Context	82
5. Cerebral Dominance	85
Disorders of Speech	87
1. Mental Illness (Schizophrenia)	87
2. Cerebral Atrophy	91
3. Focal Cerebral Lesions	92
The Measurement of Language	94
1. Disturbances of Articulation	95
2. Disturbances of Expression	96
3. Disturbances of Comprehension	98
4. Disturbances of Reading (Dyslexia)	100
5. Disturbances of Writing (Dysgraphia)	100
CHAPTER 4. MEMORY AND LEARNING	102
The Nature of Memory	102
1. Learning	103
2. Memory	106
3. Physiological Basis of Learning and Memory	109
The Measurement of Memory in Clinical Practice	111

Tests for the Measurement of Memory	113
1. General Memory Scales	113
2. The Measurement of Immediate Recall	113
3. The Measurement of Learning	121
4. The Measurement of Retention	128
5. The Measurement of Memory for Personal Experiences	133
CHAPTER 5. PERCEPTION AND ORIENTATION	139
Factors affecting Perception and Orientation	140
1. Development	140
2. Intelligence	142
3. Culture and Upbringing	143
4. Context	144
5. Cerebral Structure	145
6. Cerebral Derangement	147
The Assessment of Orientation	150
1. Visual Agnosia	151
2. Spatial Agnosia	151
3. Constructional Apraxia	152
CHAPTER 6. THE FUTURE OF CLINICAL PSYCHOLOGY	153
Bibliography	157
Index	171
