List of Contributors *xiii*

Introduction: applying the tools of the history and philosophy of science to psychiatry *xv*

*Kenneth S. Kendler*

---

## Part I **Nature of historical change in science**

---

### Section 1 **Objectivity and scientific change**

---

- 1 Introduction to “Pluralism, incommensurability, and scientific change” 5  
*Kenneth S. Kendler*
- 2 Pluralism, incommensurability, and scientific change 7  
*Helen E. Longino*
- 3 For objective, value-laden, contextualist pluralism 20  
*John Dupré*

### Section 2 **Change in psychopathology**

---

- 4 Introduction to “History and epistemology of psychopathology” 27  
*Josef Parnas*
- 5 History and epistemology of psychopathology 30  
*German E. Berrios*
- 6 Can hybridity overcome dualism? 51  
*Helen E. Longino*

### Section 3 **Scientific disagreement in the medical context**

---

- 7 Introduction to “Expert disagreement and medical authority” 57  
*Kenneth S. Kendler*
- 8 Expert disagreement and medical authority 60  
*Miriam Solomon*

- 9 Trust, dissent, and decision vectors 73  
*Ian Hacking*

Section 4 **The social, the cultural, and psychiatric kinds**

---

- 10 Introduction to “Varieties of social constructionism and the problem of progress in psychiatry” 83  
*Kenneth S. Kendler*
- 11 Varieties of social constructionism and the problem of progress in psychiatry 85  
*Kenneth F. Schaffner and Kathryn Tabb*
- 12 The role of cultural configurators in the formation of mental symptoms 107  
*German E. Berrios*

---

Part II **History of broad movements/structures within psychiatry**

---

Section 5 **The psychiatric history of the diencephalon**

---

- 13 Introduction to “Biography of a brain structure: studying the diencephalon as an epistemic object” 121  
*Josef Parnas*
- 14 Biography of a brain structure: studying the diencephalon as an epistemic object 123  
*Emilie Bovet*
- 15 Some reflections on historiographic strategies for the neurosciences 140  
*Eric J. Engstrom*

Section 6 **The history of psychiatry as interdisciplinary history**

---

- 16 Introduction to “On attitudes toward philosophy and psychology in German psychiatry, 1867–1917” 145  
*Kenneth S. Kendler*
- 17 On attitudes toward philosophy and psychology in German psychiatry, 1867–1917 149  
*Eric J. Engstrom*
- 18 Interdisciplinarity versus compartmentalization: an eternal dilemma in psychiatry 165  
*Yuji Sato*

## Section 7 **Psychiatry and psychoanalysis in the United States**

---

- 19** Introduction to “The development of psychoanalysis in the context of American psychiatry” 171  
*Kenneth S. Kendler*
- 20** The development of psychoanalysis in the context of American psychiatry 173  
*Robert Michels*
- 21** Decline of psychoanalysis to the advantage of what? 180  
*Josef Parnas*

## Section 8 **The operational revolution**

---

- 22** Introduction to “Psychiatry made easy: operation(al)ism and some of its consequences” 187  
*Kenneth S. Kendler*
- 23** Psychiatry made easy: operation(al)ism and some of its consequences 190  
*Josef Parnas and Pierre Bovet*
- 24** Hempel as a critic of Bridgman’s operationalism: lessons for psychiatry from the history of science 213  
*Kenneth F. Schaffner and Kathryn Tabb*

## Section 9 **The evolution of genetic explanation in psychiatry**

---

- 25** Introduction to “The nature of nature” 223  
*Kenneth S. Kendler*
- 26** The nature of nature 227  
*Eric Turkheimer*
- 27** Is it time for a “Copenhagen interpretation” in behavioral genetics? 245  
*Peter Zachar*

## Section 10 **Psychiatry and evolution**

---

- 28** Introduction to “What can evolution tell us about the healthy mind?” 257  
*Josef Parnas*
- 29** What can evolution tell us about the healthy mind? 259  
*John Dupré*

- 30 What can history and social studies of sciences teach us about evolutionary psychiatry? 272  
*Emilie Bovet*

---

Part III **Specific disorders from a historical perspective**

---

Section 11 **Schizophrenia and the dopamine hypothesis**

---

- 31 Introduction to “Dopamine hypothesis of schizophrenia: an updated perspective” 281  
*Josef Parnas*
- 32 The dopamine hypothesis of schizophrenia: an updated perspective 283  
*Kenneth S. Kendler*
- 33 Why is the dopamine hypothesis of schizophrenia the only game in town? 295  
*Miriam Solomon*

Section 12 **Conceptual status of depression today**

---

- 34 Introduction to “Depression in a biopsychosocioeconomic context” 301  
*Josef Parnas*
- 35 Depression in a biopsychosocioeconomic context 302  
*Yuji Sato*
- 36 What do we want from a depression diagnosis? 319  
*Eric Turkheimer*

Section 13 **The shaping of autism**

---

- 37 Introduction to “On the ratio of science to activism in the shaping of autism” 325  
*Josef Parnas*
- 38 On the ratio of science to activism in the shaping of autism 326  
*Ian Hacking*
- 39 The shaping of autism and other psychiatric disorders: an alternative perspective 340  
*Kenneth S. Kendler*

Section 14 **The decision to include or exclude a diagnosis  
in psychiatric nosology: the case of premenstrual dysphoric  
disorder**

---

- 40** Introduction to “A DSM insiders’ history of premenstrual  
dysphoric disorder” 349  
*Josef Parnas*
- 41** A DSM insiders’ history of premenstrual dysphoric  
disorder 350  
*Peter Zachar and Kenneth S. Kendler*
- 42** The construction of a diagnosis is not a scientific issue 371  
*Robert Michels*
- Index 373
