

CONTENTS

I	The Sentential Logic	
	1.1. Introduction	1
	1.2. Sentential Connectives	3
	1.3. The Sentential Logic P. Symbols and Formulas	11
	1.4. Tautologies	14
	1.5. Axiom Schemata of P. Rules of Inference and Theorems	21
	1.6. Metamathematical Properties of P	25
II	The First-Order Predicate Logic: I	
	2.1. The First-Order Predicate Logic F^1 . Symbols, Quantifiers and Formulas	29
	2.2. Interpretations. Truth and Validity	34
	2.3. Axiom Schemata of F^1 . Rules of Inference and Theorems. Consistency of F^1	43
	2.4. The Deduction Theorem	48
III	The First-Order Predicate Logic: II	
	3.1. Elementary Theories	52
	3.2. Completeness Theorems	60
	3.3. Further Corollaries. Decision Problem	68
	3.4. The First-Order Predicate Logic with Identity	71
	3.5. The First-Order Predicate Logic with Identity and Operation Symbols	78

IV	The Second-Order Predicate Logic. Theory of Definition	
	4.1. Introduction	83
	4.2. The Second-Order Predicate Logic F^2	85
	4.3. Second-Order Theories	96
	4.4. Theory of Definition	98
V	The Natural Numbers	
	5.1. Introduction	107
	5.2. Elementary Arithmetic: The Theory N	109
	5.3. The Metamathematics of N	116
	5.4. Second-Order Arithmetic: The Theory N^2	120
	5.5. The Metamathematics of N^2	124
VI	The Real Numbers	
	6.1. The Theory R	129
	6.2. The Metamathematics of R and of Elementary Algebra	133
	6.3. Second-Order Real Number Theory: The Theory R^2	137
	6.4. The Metamathematics of R^2	140
VII	Axiomatic Set Theory	
	7.1. Paradoxes	143
	7.2. The Zermelo-Fraenkel Axioms	149
	7.3. The Axiom of Choice	165
	7.4. The Metamathematics of ZF	172
	7.5. Strengthened Forms of ZF	182
VIII	Incompleteness. Undecidability	
	8.1. Introduction	186
	8.2. Recursive Functions and Relations. Representability	188
	8.3. Arithmetization	196

CONTENTS

xi

8.4. Gödel's First Incompleteness Theorem	199
8.5. Gödel's Second Incompleteness Theorem	206
8.6. Tarski's Theorem	210
8.7. Decision Problem. Church's Thesis. Recur- sively Enumerable Sets	215
8.8. Undecidability	220
Author index	230
Subject index	232
