A NOTE ON THE EDITING	V
ACKNOWLEDGEMENTS	VII
PART I	
INTRODUCTION	3
CHAPTER I. THE FUNDAMENTAL CRITERION FOR THE SOUNDNESS OF ARGUMENTS	9
1. Introduction	9
2. Fundamental criterion for the soundness of arguments	9
3. The formal character of logic	11
4. The transition to mathematical logic	11
5. Construction of a fragment of modern logic	13
6. Natural deduction	17
7. Supplementary considerations	18
CHAPTER II. INFERENCE AND CLASSICAL LOGIC	21
8. Semantic and operational aspects of meaning	21
9. Purely implicational logic	21
10. Deduction problems and deductive tableaux	22
11. Truth-value problems and semantic tableaux	25
12. Inferential and classical logic – Peirce's Law	26
13. Other aspects of meaning	28
14. Informal logic: G. Mannoury, A. Naess, Ch. Perelman	29
CHAPTER III. PROOF BY CONTRADICTION	30
15. Introductory remarks	30

16. Conversion of closed tableaux into natural deductions	31
17. The negation	32
18. Semantic and deductive tableaux	33
19. Final considerations – completeness of classical purely implicational logic	37
CHAPTER IV. THE PROBLEM OF LOCKE-BERKELEY	42
20. An example	42
21. Statement of the problem and attempts at its solution	42
22. The exposition method of Aristotle	44
23. Appeal to the method of semantic tableaux	45
24. The completeness problem - informal and heuristic deduction methods	48
CHAPTER V. ON THE SO-CALLED ‘THOUGHT MACHINE’	63
25. Introduction	63
26. Binary arithmetic and logic	63
27. Specific operations of the human intellect	65
28. Prehistory	67
29. Difficulties	68
30. Development of modern formal logic	69
31. Automatization of reasoning	69
32. Analysis of the difficulties	70
33. An example	71
34. Heuristics or methodology	72
35. Methodology	72
36. Concluding remarks	73
PART II	
CHAPTER VI. THE PARADOXES	77
CHAPTER VII. REASON AND INTUITION	86
CHAPTER VIII. FORMALIZED LANGUAGE AND COMMON USAGE	102

CONTENTS

XI

CHAPTER IX. CONSIDERATIONS ABOUT LOGICAL THOUGHT	118
CHAPTER X. CONSTANTS OF MATHEMATICAL THOUGHT	140
