CONTENTS

I. THE BEGINNINGS

1. The Notion of Validity 1
2. Geometrical Demonstration 2
3. Dialectic and Metaphysical Argument 7
4. Eristic and Sophistry 12
5. Plato and the Philosophy of Logic 17

II. ARISTOTLE'S *ORGANON*

1. The Contents of the *Organon* 23
2. The Doctrine of the *Categories* and its Logical Consequences 25
3. The *Topics* 33
4. Aristotle's Theory of Meaning and Truth 45
5. The Four Forms of General Statement 54
6. The Doctrine of the Syllogism 67
7. Aristotle's Modal Logic 81
8. Non-syllogistic Logic in the *Analytics* 96
9. Aristotle's School: Theophrastus 100

III. THE MEGARIANS AND THE STOICS

1. The Megarian Philosophy and the Origins of Stoic Logic 113
2. Megarian and Stoic Theories of Modality 117
3. The Debate on the Nature of Conditionals 128
4. The Stoic Theory of Meaning and Truth 138
5. The Stoic System of Inference Schemata 158

IV. ROMAN AND MEDIEVAL LOGIC

1. From Cicero to Boethius 177
2. From Alcuin to Abelard 198
3. The Logic of the Universities 224
4. *Proprietates Terminorum* 246
5. *Consequentiae* 274

V. LOGIC AFTER THE RENAISSANCE

1. Humanism and the Rise of Natural Science 298
2. The Interests of Leibniz 320
3. Leibniz's *Calculus de Continentibus et Contentis* 336
4. From Saccheri to Hamilton 345
5. Bolzano and Mill 358

VI. MATHEMATICAL ABSTRACTION

1. Geometry and Axiomatics 379
2. Numbers and Functions 390

3. Boole and the Algebra of Logic 404
4. Later Developments of Boolean Algebra 420
5. The Theory of Relations: De Morgan and Peirce 427

VII. NUMBERS, SETS, AND SERIES
1. Frege and his Contemporaries 435
2. Cantor's Theory of Sets 438
3. Frege on his Predecessors 443
4. Frege's Definitions of the Natural Numbers 455
5. The Number Series 467

VIII. FREGE'S GENERAL LOGIC
1. The *Begriffsschrift* 478
2. Sense and Reference: Objects and Functions 493
3. The Logic of the *Grundgesetze* 503
4. Frege's Achievement 510

IX. FORMAL DEVELOPMENTS AFTER FREGE
1. Varieties of Symbolism 513
2. Methods of Presentation: Axioms and Rules 524
3. Natural Deduction and Development 538
4. Modal Logic 548
5. Suggestions for Alternative Logics 568

X. THE PHILOSOPHY OF LOGIC AFTER FREGE
1. Expression, Designation, and Truth 576
2. The Theory of Descriptions and the Variety of Designations 593
3. Problems of Intensionality 601
4. Identity, Functions, and Classes 618
5. Necessity and Language 628

XI. THE PHILOSOPHY OF MATHEMATICS AFTER FREGE
1. The Paradoxes of the Theory of Sets 652
2. Russell's Theory of Logical Types 657
3. The Intuitionism of Brouwer 672
4. Hilbert's Programme of Metamathematics 681

XII. THE THEORY OF DEDUCTIVE SYSTEMS
1. The Metatheory of Primary Logic 689
2. The Metatheory of General Logic 701
3. The Incompletability of Formal Arithmetic 712
4. The Decision Problem 724
5. The Place of Logic among the Sciences 737

APPENDIX 743

SELECTIVE BIBLIOGRAPHY 765
