

# CONTENTS

	Reference
Test Results of a Low-Cost Fiber-Optic Gyroscope North-Seeking Sensor <i>H. A. Lamprecht, H. Tromp, M. Abbott</i>	1
Theory and Development of the Compact Corrected Gyrocompass <i>A. S. Dovgopoly, A. V. Zbrutsky, V. G. Lukomsky, L. P. Staritsky</i>	2
Real Time Estimations of Position and Gravity Vector for an Inertial Survey System <i>J. Wang, Z. Gao, J. Dong, R. Zhang</i>	3
Limitations of Vector Gravimetry Using a DGPS Augmented Rate Bias Inertial Navigation System <i>U. Mangold</i>	4
Artificial Neural Networks for Inertial Sensor Fault Diagnosis <i>U. Krogmann</i>	5
Accurate Altitude and Altitude Rate Determination Based upon Inertial, Barometric and Ground-Based Sensors <i>B. Stielor</i>	6
Theory and Modelling of Functioning of Strapdown Autonomous and Corrected Gyroinclinometers <i>P. K. Plotnikow, V. B. Nikishin, A. V. Melnikov, A. A. Skriplin</i>	7

An Augmented Inertial Navigation System for Autonomous Guided Vehicles	8
<i>W. Ebert, T. Krieg, J. Schnell</i>	
Kalman Filter Design Aspects for Navigation Systems with Reduced Sensor Configuration	9
<i>D. Wick</i>	
Three Axes RLG Inertial Sensor Assembly	10
<i>P. Gallon, H. Millet</i>	
Brillouin Ring Laser Gyroscope with Acousto-Optical Modulators	11
<i>S. Fischer, W. Schröder, P. Meyrueis</i>	
Fiber Optic Gyro Systems based on Intelligent Sensors	12
<i>M. Hafen, E. Handrich, G. Mutter</i>	
Fiber Optic Gyro Inertial Measurement Unit with Dual Rate 1773 Interface	13
<i>K. C. Scholten, J. V. TenCate</i>	
Wind Tunnel Model Attitude Measurement with a Fiberoptic Gyro	14
<i>M. Stroezel, J. Saaro, B. Stieler, D. Eckert</i>	
A Theory of Errors in Vibratory Gyroscopes	15
<i>M. Y. Shatalov, P. W. Loveday</i>	
Yaw Rate Sensor for Vehicle Dynamics Control System	16
<i>A. Reppich, R. Willig</i>
