<i>Preface</i>	v
Professor Fukushima's Work	1
1. The mathematical work of Masatoshi Fukushima - An Essay	3
<i>Zhen-Qing Chen, Niels Jacob, Masayoshi Takeda and Toshihiro Uemura</i>	
2. Bibliography of Masatoshi Fukushima	17
Contributions	25
3. Quasi regular Dirichlet forms and the stochastic quantization problem	27
<i>Sergio Albeverio, Zhi-Ming Ma and Michael Röckner</i>	
4. Comparison of quenched and annealed invariance principles for random conductance model: Part II	59
<i>Martin Barlow, Krzysztof Burdzy and Adám Timár</i>	
5. Some historical aspects of error calculus by Dirichlet forms	85
<i>Nicolas Bouleau</i>	
6. Stein's method, Malliavin calculus, Dirichlet forms and the fourth moment theorem	107
<i>Louis H.Y. Chen and Guillaume Poly</i>	

7. Progress on Hardy-type inequalities 131
Mu-Fa Chen
8. Functional inequalities for pure-jump Dirichlet forms 143
Xin Chen, Feng-Yu Wang and Jian Wang
9. Additive functionals and push forward measures under Vereten-
nikov's flow 163
Shizan Fang and Andrey Pilipenko
10. On a result of D.W. Stroock 179
Patrick J. Fitzsimmons
11. Consistent risk measures and a non-linear extension of backwards
martingale convergence 183
Hans Föllmer and Irina Penner
12. Unavoidable collections of balls for processes with isotropic uni-
modal Green function 203
Wolfhard Hansen
13. Functions of locally bounded variation on Wiener spaces 219
Masanori Hino
14. A Dirichlet space on ends of tree and superposition of nodewise
given Dirichlet forms with tier linkage 237
Hiroshi Kaneko
15. Dirichlet forms in quantum theory 263
Witold Karwowski and Ludwig Streit
16. On a stability of heat kernel estimates under generalized non-local
Feynman-Kac perturbations for stable-like processes 287
Daehong Kim and Kazuhiro Kuwae
17. Martin boundary for some symmetric Lévy processes 307
Panki Kim, Renming Song and Zoran Vondraček

18. Level statistics of one-dimensional Schrödinger operators with random decaying potential 343
Shinichi Kotani and Fumihiko Nakano
19. Perturbation of the loop measure 375
Yves Le Jan and Jay Rosen
20. Regular subspaces of Dirichlet forms 397
Liping Li and Jiangang Ying
21. Quasi-regular semi-Dirichlet forms and beyond 421
Zhi-Ming Ma, Wei Sun and Li-Fei Wang
22. Large deviation estimates for controlled semi-martingales 453
Hideo Nagai
23. A comparison theorem for backward SPDEs with jumps 479
Bernt Øksendal, Agnès Sulem and Tusheng Zhang
24. On a construction of a space-time diffusion process with boundary condition 489
Yoichi Oshima
25. Lower bounded semi-Dirichlet forms associated with Lévy type operators 507
René L. Schilling and Jian Wang
26. Ultracontractivity for non-symmetric Markovian semigroups 527
Ichiro Shigekawa
27. Metric measure spaces with variable Ricci bounds and couplings of Brownian motions 553
Karl-Theodor Sturm
28. Intrinsic ultracontractivity and semi-small perturbation for skew product diffusion operators 577
Matsuyo Tomisaki
