

Contents

Preface / <i>Adolf Grünbaum</i>	<i>ix</i>
Introduction / <i>Robert G. Colodny</i>	<i>xi</i>
Some Conceptual Problems of Quantum Theory / <i>Arthur Fine</i>	<i>3</i>
Philosophical Implications of Contemporary Particle Physics / <i>Gerald Feinberg</i>	<i>33</i>
The Physics of Logic / <i>David Finkelstein</i>	<i>47</i>
The Nature of Quantum Mechanical Reality: Einstein Versus Bohr / <i>Clifford A. Hooker</i>	<i>67</i>
1. Introduction	<i>67</i>
Part I. Einstein's Objections to Quantum Theory	
2. The Classical Conception of Physical Reality Vis-à-vis Quantum Theory	<i>68</i>
3. The Character of Einstein's Objections to Quantum Theory	<i>76</i>
4. The EPR Objection	<i>78</i>
5. The Arguments of EPR	<i>88</i>
6. Three Varieties of Reply to EPR	<i>94</i>
7. EPR and Physics	<i>113</i>
Part II. The Philosophy of Niels Bohr	
8. Introduction	<i>132</i>
9. Bohr's Philosophy of Quantum Phenomena	<i>133</i>
10. Bohr's Reply to EPR	<i>142</i>
11. Digression: Misunderstanding Bohr's Reply to EPR	<i>147</i>
12. Bohr's Doctrine: Further Elaboration	<i>152</i>
13. Prospect for a Bohrian Approach to Quantum Reality	<i>175</i>
14. Critique of the Bohrian Approach	<i>193</i>
15. Conclusion	<i>208</i>
Postscript	<i>209</i>
Appendices	<i>213</i>

A Formal Approach to the Philosophy of Science / <i>Bas C. van Fraassen</i>	303
Part I. The Formal Representation of Physical Processes	
1. Formalization of Theories	304
2. Montague on Deterministic Theories	306
3. Suppes on Theories as Definitions	309
4. The State-Space Approach	311
5. Evolution of States: Isolated Systems	312
6. Evolution of Interacting Systems	318
7. Statistical Theories	320
Part II. Measurement in Quantum Mechanics	
8. The Problem of Measurement	323
9. The Pragmatics of Measurement: Preliminaries	324
10. The Naïve Account of Measurement	325
11. Mathematical Description of the Measuring Process	326
12. Challenges to the Ignorance Interpretation of Mixtures	328
13. Proposed Solutions to the Measurement Problem	331
14. A Modal Interpretation of Mixtures	335
15. Digression: The Representation of Probabilities	339
16. The Modal Interpretation Implemented	340
17. The Pragmatics of Measurement Continued	343
18. The Modal Interpretation Improved	348
19. Conclusion	350
Appendix	351
On the Conceptual Structure of Quantum Mechanics / <i>Howard Stein</i>	367
Index of Names	439
Index of Topics	443
