

Contents

Series Foreword	xi
Preface	xiii
Conference Participants	xv
Acknowledgments	xvii
Introduction	xix
Chapter 1	
Learning about Reading from Illiterates	1
<i>Paul Bertelson and Béatrice De Gelder</i>	
Editor's Comments	
Chapter 2	
Literacy and Acquired Aphasia	27
<i>André Roch Lecours</i>	
Editor's Comments	
Chapter 3	
An Information-Processing Account of Reading Acquisition	43
<i>John Morton</i>	
Editor's Comments	
Chapter 4	
The Description and Interpretation of Acquired and Developmental Reading Disorders	69
<i>John C. Marshall</i>	
Editor's Comments	
Chapter 5	
Great Expectations	91
<i>Lila Gleitman, Henry Gleitman, Barbara Landau, and Eric Wanner</i>	
Editor's Comments	
Chapter 6	
Dyslexia: Perspectives from Sign and Script	137
<i>Ursula Bellugi, Ovid Tzeng, Edward S. Klima, and Angela Fok</i>	
Editor's Comments	

Chapter 7

Measurement of Learning, Sensory, and Linguistic Capacity Early in Life: A Selective Overview of Recent Research 173

Norman A. Krasnegor

Editor's Comments

Chapter 8

Language at the Initial State 189

Jacques Mehler

Editor's Comments

Chapter 9

Neural Representation and Neural Computation 217

Patricia Smith Churchland and Terrence J. Sejnowski

Editor's Comments

Chapter 10

Visual Word Recognition and Pronunciation: A Computational Model of Acquisition, Skilled Performance, and Dyslexia 255

Mark S. Seidenberg and James L. McClelland

Editor's Comments

Chapter 11

Aphasia in Men and Women 307

Hanna Damasio, Daniel Tranel, Jon Spradling, and Randall Alliger

Editor's Comments

Chapter 12

Language Processing and Familial Handedness 331

Thomas G. Bever, Caroline Carrithers, Wayne Cowart, and David J.

Townsend

Editor's Comments

Chapter 13

Reflections on Visual Recognition 361

Antonio R. Damasio

Editor's Comments

Chapter 14

The Neural Origin of Developmental Dyslexia: Implications for Medicine, Neurology, and Cognition 377

Albert M. Galaburda, Glenn D. Rosen, and Gordon F. Sherman

Chapter 15

Animal Models of Developmental Dyslexia: Brain Lateralization and Cortical Pathology 389

Gordon F. Sherman, Glenn D. Rosen, and Albert M. Galaburda

Chapter 16	
Abnormal Neuronal Patterns and Disorders of Neocortical Development	405
<i>Verne S. Caviness, Jr., Jean-Paul Misson, and Jean-François Gadsseux</i>	
Editor's Comments	
Chapter 17	
Competitive Interactions during Neuronal and Synaptic Development	443
<i>Pasko Rakic</i>	
Editor's Comments	
Chapter 18	
The Role Hormones Acting on the Brain Play in Linking Nature and Nurture	463
<i>Bruce S. McEwen</i>	
Editor's Comments	
Chapter 19	
Adhesion Molecules in Pattern Formation and Neural Histogenesis	475
<i>Kathryn L. Crossin and Gerald M. Edelman</i>	
Editor's Comments	
Chapter 20	
Molecular Dissection of Complex Behaviors: Elementary Mechanistic Rules in Search of Content	507
<i>Yadin Dudai</i>	
Editor's Comments	
Contributors	529
Index	533
