Preface v

PART ONE

William Cullen and the New Science of Chemistry

1. Scotland and the University of Glasgow during the early years of the Eighteenth Century 3
2. English Natural Philosophy after Newton 19
3. Medicine and Natural Philosophy in Edinburgh 34
4. Moral Philosophy and Economic Improvement in mid-eighteenth-century Scotland 49
5. Cullen's Chemical Investigations 77
6. Cullen's Chemical Doctrines 93
 - 1 Chemistry Defined 93
 - 2 The History and Purpose of Chemistry 102
 - 3 The Chemical Principles 110
 - 4 Elective Attraction 129
 - 5 Fire 131
 - 6 Air 143
 - 7 Heat and Mixture 153

PART TWO

Joseph Black and the Advancement of Philosophical Chemistry

7. Education and Apprenticeship 165
8. Black's Study of Causticity and Fixed Air 183
 - 1 The Theory of Causticity: the first phase 183
 - 2 The Inaugural Dissertation 190
 - 3 The Essay on Quicklime 201
9. The Theory of Latent Heat 222
 - 1 Origins of the Theory 222
 - 2 Experimental Confirmation 231

Contents

10.	Black's Influence on the Emerging Science of Heat	250
1	James Watt	250
2	William Irvine	265
3	The Ascendancy of the Chemical Theory of Heat	271
