| <b>1 Introduction</b>   | 1       |
| What Do We Mean by “Antisocial Behavior” and<br>“Young People”? | 1       |
| Why a New Review?   | 2       |
| Coverage and Structure of This Review                           | 7       |
| <b>2 Identifying the Most Useful Research</b>                   | 10      |
| Breadth of Antisocial Behavior                                  | 10      |
| Multiple Sources of Information                                 | 11      |
| Samples   | 12      |
| Biology and Behavior  | 14      |
| Causality   | 15      |
| Concepts of Causation   | 15      |
| Causal Chains   | 17      |
| Testing Causal Hypotheses                                       | 18      |
| Strength of Effects   | 21      |
| “Positivistic” Approaches                                       | 22      |
| Conclusions   | 23      |
| <b>3 Concepts and Measures of Crime</b>                         | 25      |
| Age, Blame, and Criminal Responsibility                         | 25      |
| The Nature of Adolescent Crime                                  | 30      |
| Criminal Offenses   | 31      |
| Criminal Statistics   | 32      |
| Victim Surveys  | 38      |
| Childhood Victimization   | 38      |
| Self-Reported Offending   | 40      |
| Variations in the Processing of Offenses                        | 45      |
| Recognizing and Reporting Crime                                 | 46      |
| The Police as “Gatekeepers” of the Criminal<br>Justice System   | 49      |
| Variations in Judicial Procedures                               | 55      |

|   |           |
|---|-----------|
| Differences between Offenders and Non-Offenders                                   | 57        |
| Persistent Young Offenders  | 58        |
| Conclusions   | 61        |
| <b>4 Historical Trends</b>  | <b>64</b> |
| Setting Out the Issues  | 64        |
| Trends in Crime Taken as a Whole  | 64        |
| Does Juvenile Crime Reflect the Same Trends?                                      | 69        |
| Has the Nature of Offending by Juveniles Been Changing?                           | 72        |
| Changes in the Types of Crimes Committed  | 72        |
| Changes in the Sex Ratios   | 74        |
| Changes in the Type–Gender Relationship   | 74        |
| Changes in the Peak Age of Offending  | 75        |
| The Relevance of Recent Trends in Juvenile Justice                                | 78        |
| Just Deserts  | 79        |
| Managerialism   | 79        |
| Community Focus   | 80        |
| Populist Punitiveness   | 80        |
| Trends in Psychosocial Disorders of Youth   | 83        |
| Changes in the Social and Economic Context for Young People                       | 86        |
| Possible Reasons for the Rise in Crime and Psychosocial Disorders of Young People | 89        |
| Conclusions   | 92        |
| <b>5 Varieties of Antisocial Behavior</b>   | <b>95</b> |
| Key Valid Differentiators   | 96        |
| Association with Hyperactivity  | 96        |
| Age of Onset  | 98        |
| Probably Valid Differentiators  | 105       |
| Association with Violence   | 105       |
| Psychopathy   | 109       |
| Association with Serious Mental Disorder  | 110       |
| Special Groups of Uncertain Validity  | 112       |
| “Normal” Crime  | 112       |
| Sexual Offenses   | 113       |
| Juvenile Homicide   | 115       |
| Crime Associated with Substance Misuse  | 117       |
| Medically Caused Crime  | 118       |
| Crime Associated with Emotional Disorder  | 119       |

|  |            |
|--|------------|
| Other Distinctions                             | 120        |
| Socialized versus Unsocialized                 | 120        |
| Overt versus Covert Crime                      | 121        |
| Recidivist Crime                               | 122        |
| Psychiatric Diagnoses                          | 123        |
| Conclusions                                    | 124        |
| <b>6 The Role of Individual Features</b>       | <b>127</b> |
| Changing Views                                 | 127        |
| Genetic Influences                             | 129        |
| Nature–Nurture Interplay                       | 132        |
| Routes of Genetic Mediation                    | 135        |
| Obstetric Complications                        | 137        |
| Intelligence                                   | 140        |
| Temperament and Personality Features           | 145        |
| Poor Peer Relationships                        | 148        |
| Hyperactivity                                  | 149        |
| Biased Cognitive Processing                    | 151        |
| Drugs and Alcohol                              | 152        |
