

# Table of Contents

I: AN ADDITIONAL PROGRAM FOR THE PHILOSOPHY OF SCIENCE	1
Preliminary Statement of the Problem of Discovery	6
Descartes and Newton on the Principle of Inertia	10
Some Components of the Act of Discovery	18
The Feasibility of a Theory of Discovery	24
II: TYPES OF DISCOVERY	31
Discovering That and Discovering Why	35
Correlations with the Hypothetical-Deductive Account	43
Routine Discovery and Revolutionary Discovery	53
Accidental Discovery	64
III: FOUR LEVELS OF EXPLANATION	69
The Logical Approach	72
The Psychological Approach	79
The Historical Approach	83
The Epistemological Approach	87
Retrospect and Prospect	94
IV: THE ADAPTATION THEORY OF DISCOVERY	102
The Ants and the Spiders	104
The Mind-Nature Confrontation	110
V: ADAPTATION AS THE ELABORATION OF STRUCTURES	120
The Complexity of Nature	123
The Elements of Elaboration	127

	<i>Curiosity as the Source of Inquiry; The Sorting-out Process; Interrelating Recognized Components of a Structure; Integration with Other Knowledge; Transcending Actual Experience</i>	
	The Doctrine of Structures	148
	Elaboration and "Discovering That"	152
VI:	ADAPTATION AS THE TRANSFORMATION OF STRUCTURES	155
	Transformation vs. Elaboration	158
	The Elements of Transformation	166
	<i>Idealization; Creative Postulation; Substitution through Analogy</i>	
	Theoretical Discovery	182
	Recapitulation	184
VII:	THE ONTOLOGICAL STATUS OF SCIENTIFIC OBJECTS	187
	A Refinement of the Question	190
	The Reality of Theoretical Entities	201
	Cultural Fallout	209
	NOTES	213
	BIBLIOGRAPHY	229
	INDEX	237
