

Alexander Levin

Difference Algebra

 Springer

Contents

1	Preliminaries	1
1.1	Basic Terminology and Background Material	1
1.2	Elements of the Theory of Commutative Rings	15
1.3	Graded and Filtered Rings and Modules	37
1.4	Numerical Polynomials	47
1.5	Dimension Polynomials of Sets of m -tuples	53
1.6	Basic Facts of the Field Theory	64
1.7	Derivations and Modules of Differentials	89
1.8	Gröbner Bases	96
2	Basic Concepts of Difference Algebra	103
2.1	Difference and Inversive Difference Rings	103
2.2	Rings of Difference and Inversive Difference Polynomials	115
2.3	Difference Ideals	121
2.4	Autoreduced Sets of Difference and Inversive Difference Polynomials. Characteristic Sets	128
2.5	Ritt Difference Rings	141
2.6	Varieties of Difference Polynomials	149
3	Difference Modules	155
3.1	Ring of Difference Operators. Difference Modules	155
3.2	Dimension Polynomials of Difference Modules	157
3.3	Gröbner Bases with Respect to Several Orderings and Multivariable Dimension Polynomials of Difference Modules	166
3.4	Inversive Difference Modules	185
3.5	σ^* -Dimension Polynomials and their Invariants	195
3.6	Dimension of General Difference Modules	232

4	Difference Field Extensions	245
4.1	Transfornal Dependence. Difference Transcendental Bases and Difference Transcendental Degree	245
4.2	Dimension Polynomials of Difference and Inversive Difference Field Extensions	255
4.3	Limit Degree	274
4.4	The Fundamental Theorem on Finitely Generated Difference Field Extensions	292
4.5	Some Results on Ordinary Difference Field Extensions	295
4.6	Difference Algebras	300
5	Compatibility, Replicability, and Monadicity	311
5.1	Compatible and Incompatible Difference Field Extensions	311
5.2	Difference Kernels over Ordinary Difference Fields	319
5.3	Difference Specializations	328
5.4	Babbitt's Decomposition. Criterion of Compatibility	332
5.5	Replicability	352
5.6	Monadicity	354
6	Difference Kernels over Partial Difference Fields. Difference Valuation Rings	371
6.1	Difference Kernels over Partial Difference Fields and their Prolongations	371
6.2	Realizations of Difference Kernels over Partial Difference Fields .	376
6.3	Difference Valuation Rings and Extensions of Difference Specializations	385
7	Systems of Algebraic Difference Equations	393
7.1	Solutions of Ordinary Difference Polynomials	393
7.2	Existence Theorem for Ordinary Algebraic Difference Equations	402
7.3	Existence of Solutions of Difference Polynomials in the Case of Two Translations	412
7.4	Singular and Multiple Realizations	420
7.5	Review of Further Results on Varieties of Ordinary Difference Polynomials	425
7.6	Ritt's Number. Greenspan's and Jacobi's Bounds	433
7.7	Dimension Polynomials and the Strength of a System of Algebraic Difference Equations	440
7.8	Computation of Difference Dimension Polynomials in the Case of Two Translations	455
8	Elements of the Difference Galois Theory	463
8.1	Galois Correspondence for Difference Field Extensions	463
8.2	Picard-Vessiot Theory of Linear Homogeneous Difference Equations	472

8.3 Picard-Vessiot Rings and the Galois Theory of Difference
Equations 486
