Guided tour of the book	xii
Guided tour of MyMathLab Global	xiv
Publisher's acknowledgements	xvi
Preface to the sixth edition	xvii
Introduction	1
<b>1 Descriptive statistics</b>	<b>7</b>
<i>Learning outcomes</i>	8
Introduction	8
Summarising data using graphical techniques	10
Looking at cross-section data: wealth in the UK in 2005	16
Summarising data using numerical techniques	25
The box and whiskers diagram	45
Time-series data: investment expenditures 1977–2009	46
Graphing bivariate data: the scatter diagram	60
Data transformations	63
The information and data explosion	65
Guidance to the student: how to measure your progress	68
Summary	68
<i>Key terms and concepts</i>	69
<i>Reference</i>	69
<i>Problems</i>	70
<i>Answers to exercises</i>	76
Appendix 1A: $\Sigma$ notation	80
<i>Problems on <math>\Sigma</math> notation</i>	81
Appendix 1B: E and V operators	82
Appendix 1C: Using logarithms	83
<i>Problems on logarithms</i>	84
<b>2 Probability</b>	<b>86</b>
<i>Learning outcomes</i>	86
Probability theory and statistical inference	87
The definition of probability	87
Probability theory: the building blocks	90
Bayes' theorem	98
Decision analysis	100
Summary	104
<i>Key terms and concepts</i>	105
<i>Problems</i>	106
<i>Answers to exercises</i>	112

<b>3</b>	<b>Probability distributions</b>	<b>116</b>
	<i>Learning outcomes</i>	116
	Introduction	117
	Random variables and probability distributions	118
	The Binomial distribution	119
	The Normal distribution	126
	The sample mean as a Normally distributed variable	133
	The relationship between the Binomial and Normal distributions	139
	The Poisson distribution	141
	Summary	144
	<i>Key terms and concepts</i>	145
	<i>Problems</i>	146
	<i>Answers to exercises</i>	151
<b>4</b>	<b>Estimation and confidence intervals</b>	<b>153</b>
	<i>Learning outcomes</i>	153
	Introduction	154
	Point and interval estimation	154
	Rules and criteria for finding estimates	155
	Estimation with large samples	159
	Precisely what is a confidence interval?	162
	Estimation with small samples: the <i>t</i> distribution	170
	Summary	175
	<i>Key terms and concepts</i>	175
	<i>Problems</i>	176
	<i>Answers to exercises</i>	178
	Appendix: Derivations of sampling distributions	179
<b>5</b>	<b>Hypothesis testing</b>	<b>181</b>
	<i>Learning outcomes</i>	181
	Introduction	182
	The concepts of hypothesis testing	182
	The Prob-value approach	189
	Significance, effect size and power	190
	Further hypothesis tests	193
	Hypothesis tests with small samples	197
	Are the test procedures valid?	199
	Hypothesis tests and confidence intervals	200
	Independent and dependent samples	201
	Discussion of hypothesis testing	204
	Summary	205
	<i>Key terms and concepts</i>	206
	<i>Reference</i>	206
	<i>Problems</i>	207
	<i>Answers to exercises</i>	212

<b>6</b>	<b>The <math>\chi^2</math> and <math>F</math> distributions</b>	<b>215</b>
	<i>Learning outcomes</i>	215
	Introduction	216
	The $\chi^2$ distribution	216
	The $F$ distribution	231
	Analysis of variance	233
	Summary	240
	<i>Key terms and concepts</i>	241
	<i>Problems</i>	242
	<i>Answers to exercises</i>	245
	Appendix: Use of $\chi^2$ and $F$ distribution tables	247
<b>7</b>	<b>Correlation and regression</b>	<b>249</b>
	<i>Learning outcomes</i>	249
	Introduction	250
	What determines the birth rate in developing countries?	250
	Correlation	253
	Regression analysis	263
	Inference in the regression model	269
	Some other issues in regression	280
	Gapminder again	284
	Summary	286
	<i>Key terms and concepts</i>	287
	<i>References</i>	287
	<i>Problems</i>	288
	<i>Answers to exercises</i>	291
<b>8</b>	<b>Multiple regression</b>	<b>295</b>
	<i>Learning outcomes</i>	295
	Introduction	296
	Principles of multiple regression	297
	What determines imports into the UK?	298
	Finding the right model	318
	Summary	325
	<i>Key terms and concepts</i>	326
	<i>Reference</i>	326
	<i>Problems</i>	327
	<i>Answers to exercises</i>	331
<b>9</b>	<b>Data collection and sampling methods</b>	<b>336</b>
	<i>Learning outcomes</i>	336
	Introduction	337
	Using secondary data sources	338
	Using electronic sources of data	340
	Collecting primary data	342

	The meaning of random sampling	343
	Calculating the required sample size	352
	Collecting the sample	354
	Case study: the UK Living Costs and Food Survey	357
	Summary	358
	<i>Key terms and concepts</i>	359
	<i>References</i>	359
	<i>Problems</i>	360
<b>10</b>	<b>Index numbers</b>	<b>361</b>
	<i>Learning outcomes</i>	362
	Introduction	362
	A simple index number	363
	A price index with more than one commodity	364
	Using expenditures as weights	372
	Quantity and expenditure indices	374
	The Retail Price Index	380
	Inequality indices	386
	The Lorenz curve	386
	The Gini coefficient	389
	Concentration ratios	394
	Summary	396
	<i>Key terms and concepts</i>	397
	<i>Reference</i>	397
	<i>Problems</i>	398
	<i>Answers to exercises</i>	403
	Appendix: Deriving the expenditure share form of the Laspeyres price index	406
<b>11</b>	<b>Seasonal adjustment of time-series data</b>	<b>407</b>
	<i>Learning outcomes</i>	407
	Introduction	408
	The components of a time series	408
	Forecasting	420
	Further issues	421
	Summary	422
	<i>Key terms and concepts</i>	422
	<i>Problems</i>	423
	<i>Answers to exercises</i>	426
	<b>Important formulae used in this book</b>	<b>430</b>
	<b>Appendix: Tables</b>	<b>435</b>
	Table A1 Random number table	435
	Table A2 The standard Normal distribution	437
	Table A3 Percentage points of the <i>t</i> distribution	438
	Table A4 Critical values of the $\chi^2$ distribution	439

Table A5(a)	Critical values of the $F$ distribution (upper 5% points)	441
Table A5(b)	Critical values of the $F$ distribution (upper 2.5% points)	443
Table A5(c)	Critical values of the $F$ distribution (upper 1% points)	445
Table A5(d)	Critical values of the $F$ distribution (upper 0.5% points)	447
Table A6	Critical values of Spearman's rank correlation coefficient	449
Table A7	Critical values for the Durbin–Watson test at the 5% significant level	450
Answers to problems		451
Index		477

### Supporting resources

Visit [www.MyMathLab.com/global](http://www.MyMathLab.com/global) to find valuable online resources.

#### MyMathLab Global for students

- A personalised study plan with self-assessment questions to check your understanding
- Multiple choice questions to test your learning
- Guided solutions that walk you step by step through solving a problem

#### MyMathLab Global for instructors

- Customisable testbank of question material that can be set as tests and homework assignments
- PowerPoint slides that can be downloaded and used for presentations
- Complete Instructor's Manual
- Search tool to help locate specific items of content
- E-mail results and profile tools to send results of quizzes to instructors
- Online help and support to assist with website usage and troubleshooting

For more information please contact your local Pearson Education sales representative or visit [www.MyMathLab.com/global](http://www.MyMathLab.com/global)
