●	<i>List of Boxes</i>	xi
●	<i>Foreword</i>	xii
●	<i>Preface</i>	xv
●	<i>Acknowledgements</i>	xxi
Part I	GROWTH, TECHNOLOGICAL CHANGE, AND GENERAL PURPOSE TECHNOLOGIES	1
●	1. Technology as Revolution	3
	Pervasive Economic Change	4
	Some Comments on Procedure and Method	16
	A Preview	21
●	2. Two Views of Economic Processes	25
	Comparisons and Contrasts	27
	Functioning of the Market	36
	Appendix: Technological Choices and Trajectories	50
●	3. A Structuralist-Evolutionary Decomposition	55
	The S-E Decomposition	57
	Incentives and Behaviour	65
	Innovating and Non-Innovating Behaviour	68
	Path Dependence and the Arrow of Time	77
	Appendix: The Evolutionary Hand and Factor Substitution	83
●	4. Technology and Technological Change	85
	Microeconomics of Technological Change	85
	General Purpose Technologies	93
	Is There a Testable GPT Theory?	105
	How Do We Know a New GPT When We See One?	108
	Appendix: Measuring Technological Change	119
	■ An Overview of Total Factor Productivity	119
	■ TFP and Costly Technological Change	120
	■ Counterfactual Measures	129
●	5. A Survey of GPTs in Western History (Part A): 10,000 BC TO AD 1450	131
	Initial Conditions	134
	An Evolving Hunter-Gatherer Society	136

•	• The Neolithic Agricultural Revolution	138
•	• Writing	144
•	• Bronze	151
•	• Iron and Steel	155
•	• Classical Technologies	159
•	• The Medieval Agricultural Revolution	160
•	• Waterwheel	164
●	6. A Survey of GPTs in Western History (Part B): 1450–2010	169
•	• Three-Masted Sailing Ship	169
•	• Printing	175
•	• Steam Engine	182
•	• Mechanization	189
•	• Railways	190
•	• Electricity	196
•	• Three Organizational GPTs	203
•	• Some Future Transforming GPTs	211
•	• Omitted GPTs	216
•	• Concluding Thoughts	218
 Part II THE TRANSITION TO SUSTAINED ECONOMIC GROWTH IN THE WEST		
●	7. The Emergence of Sustained Extensive Growth in the West	219
•	• Introduction	221
•	• Early Roots	225
•	• The Early Modern Period	235
•	• Four Phases of Industrial Mechanization	238
•	• Growth Becomes Sustained	255
•	• The Three Questions Answered	258
●	8. Why Not Elsewhere?	267
•	• Why Not in Islam?	267
•	• Why Not in China?	277
•	• Conclusion	287
●	9. Population Dynamics: Relation Between Extensive and Intensive Growth	290
•	• Growth Over the Millennia	291
•	• Relation Between Extensive and Intensive Growth	297
•	• Model 1: Individual Household	302
•	• Model 2: Solow Growth with Endogenous Population	308
•	• A Multi-Sector Model	319
•	• Other Possible Determinants of Fertility	327
•	• The Importance of Using a CES Production Function	328
•	• What Have We Learnt?	332
•	• Appendix 9.1: Historical Record on the Control of Family Size	335

○	Appendix 9.2: Formal Models of Population Dynamics	341
■	Model 1: Individual Household	341
■	Model 2: A Solow Growth Model with Endogenous Population	343
■	Model 3: A Three-Sector Model	346
●	10. The Emergence of Sustained Intensive Growth in the West	351
○	Explanations	352
○	The Three Generic Theories Once Again	358
○	Conclusion and Summary	364
Part III	MODELLING SUSTAINED GPT-DRIVEN GROWTH	367
●	11. GPTs and Related Concepts in the Literature	371
○	Historical and Appreciative Theories of GPTs	371
○	Growth With a Single GPT	379
○	Conclusions	384
●	12. Scale Economies in Economic Growth	385
○	Issues of Scale in Microeconomic Theory	386
○	'Scale' Effects in Technological History	397
○	Scale Economies in Macro Growth Models	401
●	13. Appreciative Theories of GPTs	407
○	First Level of Abstraction: Adjustments of the S-E Categories	407
○	Second Level of Abstraction: A Stylized Evolution of a GPT	432
○	Third Level of Abstraction: A Logistic Curve Model of the Evolution of a GPT	434
●	14. Formal Models of GPT-Driven Sustained Growth: The Baseline Model	440
○	Outline of Our Baseline Model	440
○	Two-Sector Illustration of Growth Rejuvenation	445
○	The Three-Sector Baseline Model	449
○	Summary and Conclusion	465
●	15. Formal Models of GPT-Driven Sustained Growth: Extensions and Applications	468
○	Rational Versus Adaptive Expectations	468
○	Two Applied R&D and Consumption Sectors	475
○	More Than One Active GPT	477
○	A Simple Model of Facilitating Structure and GPTs	482
○	Changes in TFP Do Not Track Changes in Technology	488
○	Summary and Conclusions	495
Part IV	POLICY	497
●	16. Technology Enhancement Policies: Theory and Evidence	499
○	Two Generic Theories	500
○	Policy Through Neoclassical Lenses	502
