PREFACE

ACKNOWLEDGEMENTS

I	Overview	
2	Thinking, language and learning	
1	Learning to think	6
	<i>H. F. Harlow</i>	
2	The development of children's speech and thought	16
	<i>A. A. Liublinskaya</i>	
3	Words, meanings and concepts (I)	22
	<i>J. B. Carroll</i>	
4	Language and concepts	33
	<i>E. Sapir</i>	
5	Language and mental development	43
	<i>A. R. Luria and F. Ia. Yudovich</i>	
6	Thought and word	53
	<i>L. S. Vigotsky</i>	
7	The genetic approach to the psychology of thought	60
	<i>J. Piaget</i>	
8	The learning of principles	67
	<i>R. M. Gagné</i>	
3	Learning theory and teaching practice	
1	A perspective on the relationship between learning theory and educational practices	87
	<i>E. R. Hilgard</i>	
2	Psychological conceptions of teaching	98
	<i>N. L. Gage</i>	
3	Some theorems on instruction	112
	<i>J. S. Bruner</i>	
4	Methods of scientific research in the psychology of instruction	125
	<i>Z. I. Kalmykova</i>	
5	An experimental study in the formation of mental actions	142
	<i>P. Ia. Gal'perin</i>	

6	The stage theory of the formation of mental operations	155
	<i>N. Talyzina</i>	
7	Learning by discovery: an interpretation of recent research	163
	<i>B. Y. Kersh and M. C. Wittrock</i>	
8	Words, meanings and concepts (2)	174
	<i>J. B. Carroll</i>	
9	The psychology of learning	189
	<i>D. N. Bogoiavlenski and N. A. Menchinskaia</i>	
10	Reception learning and the rote-meaningful dimension	193
	<i>D. P. Ausubel</i>	
11	Interaction analysis as a feedback system in teacher preparation	206
	<i>E. J. Amidon and E. Powell</i>	
4	Some aspects of subject teaching	
1	Educational research and the learning of mathematics	222
	<i>R. M. Beard</i>	
2	Concept formation and its significance in mathematics teaching and syllabus reform	230
	<i>R. Skemp</i>	
3	The mastery of scientific concepts in school	242
	<i>R. G. Natadze</i>	
4	The mastery by children of some concepts in physics	248
	<i>E. A. Fleshner</i>	
5	Some problems in the psychology of history teaching: historical ideas and concepts	262
	<i>E. A. Peel</i>	
6	Reading skills re-examined	268
	<i>J. Merritt</i>	
7	Learning to think about reading	278
	<i>J. F. Reid</i>	
8	Musical communication	290
	<i>J. B. Brocklehurst</i>	
5	Programming teaching	
1	The science of learning and the art of teaching	301
	<i>B. F. Skinner</i>	
2	Learning theory and programmed instruction	313
	<i>A. N. Leont'ev and P. Ia. Gal'perin</i>	
3	Teaching machines in programmed instruction	324
	<i>M. J. Tobin</i>	
4	The feasibility of programmed television instruction	331
	<i>S. K. Gryde</i>	

5	Strategy and tactics in programmed instruction	346
	<i>E. Stones</i>	
6	C.A.I.: some problems and perspectives	354
	<i>L. Stolurow</i>	
7	An instructional systems approach to course development	365
	<i>M. R. Eraut</i>	
6	Failure in learning	
1	Handicaps in learning	378
	<i>A. Cashdan</i>	
2	Perceptual-motor difficulties	394
	<i>K. Wedell</i>	
3	Memory span and language proficiency	408
	<i>N. C. Graham</i>	
4	Levels of expectancy and the self-fulfilling prophecy	414
	<i>R. Rosenthal and L. Jacobson</i>	
7	The evaluation of learning	
1	The validity of examinations at 16-plus	426
	<i>I. M. Connaughton</i>	
2	Reliability and the GCE examination	446
	<i>A. S. Willmott</i>	
3	The measurement of learning outcomes: some questions	449
	<i>R. Glaser</i>	
4	The evaluation of learning	455
	<i>E. Stones</i>	
	NAME INDEX	471
	SUBJECT INDEX	474
