

# CONTENTS

<b>1</b>	<b>Basic Concepts of Probability Theory</b>	<b>1</b>
1.1	Introduction,	1
1.2	Algebra of Sets,	1
1.3	Fields, $\sigma$ -Fields, and Events,	6
1.4	Probability Space,	10
1.5	Random Variables,	15
1.6	Expectation of Random Variables,	20
1.7	Conditioning,	24
1.8	Convergence of Random Variables,	29
1.9	Main Inequalities of Expectations,	32
<b>2</b>	<b>Stochastic Processes</b>	<b>39</b>
2.1	Definition of Stochastic Processes,	39
2.2	Separability and Measurability,	40
2.3	Continuity Concepts,	48
2.4	Classes of Stochastic Processes,	53
2.5	Brownian Motion,	64
<b>3</b>	<b>Martingale Processes</b>	<b>75</b>
3.1	Uniform Integrability,	75
3.2	Stopping Times or Markov Times,	77
3.3	Discrete Martingales and Submartingales,	83
3.4	Continuous Parameter Martingales and Submartingales,	94
3.5	Doob-Meyer Decomposition,	99

<b>4</b>	<b>Classes of Martingales and Related Processes</b>	<b>109</b>
4.1	Square Integrable Martingales,	109
4.2	Martingales with Jumps,	110
4.3	Increasing Processes of Square Integrable Martingales,	112
4.4	Local Martingales,	117
<b>5</b>	<b>White Noise and White Noise Integrals</b>	<b>127</b>
5.1	Introduction,	127
5.2	White Noise,	129
5.3	Spectral Representation,	137
5.4	White Noise Differential Equation,	146
<b>6</b>	<b>Stochastic Integrals and Stochastic Differential Equations</b>	<b>151</b>
6.1	Stochastic Integrals,	151
6.2	Ito Process (Generalized Stochastic Integral),	160
6.3	Ito Formula,	162
6.4	Vector Formulation of Ito's Rule,	165
6.5	Stochastic Integrals on Square Integrable Martingales,	170
6.6	Representation of Square Integrable Martingales,	177
6.7	Extension of Ito's Rule,	182
<b>7</b>	<b>Stochastic Differential Equations</b>	<b>193</b>
7.1	Stochastic Differential Equation,	193
7.2	Differential Equation Driven by White Noise,	196
7.3	Vector Formulation,	210
7.4	Stratonovich Integral,	212
<b>8</b>	<b>Optimal Nonlinear Filtering</b>	<b>223</b>
8.1	Diffusion Processes,	223
8.2	Innovations Process,	226
8.3	Estimation Problem,	227
8.4	Optimal Nonlinear Filtering,	228
8.5	Vector Formulation,	239
<b>9</b>	<b>Optimal Linear Nonstationary Filtering (Kalman – Bucy Filter)</b>	<b>245</b>
9.1	Recursive Estimation,	245
9.2	Discrete Kalman Filter,	248
9.3	Continuous Kalman Filter,	257
9.4	Kalman Filter as a Special Case of the Nonlinear Filter,	263

<b>10</b>	<b>Application of Nonlinear Filtering to Fault Detection Problems</b>	<b>271</b>
10.1	Introduction,	271
10.2	Fault Detection with Change in Plant Parameter $f_t$ ,	272
10.3	Fault Detection with Change in Signal Noise Parameter $g_t$ ,	281
10.4	Adaptive Algorithm,	286
10.5	Modeling Other System Changes,	289
<b>11</b>	<b>Optimal Smoothing</b>	<b>293</b>
11.1	Smoothing Problems,	293
11.2	Martingale Representation for Smoothed Estimates,	295
11.3	Linear Smoothing Problem,	299
	<b>References</b>	<b>307</b>
	<b>Index</b>	<b>311</b>
