

# CONTENTS

Preface **vii** ■ Acknowledgments **ix**

|               |  |          |
|---------------|--|----------|
| <b>PART I</b> | <b>INTRODUCTION TO MOTOR BEHAVIOR</b>                | <b>1</b> |
| CHAPTER 1     | Evolution of a Field of Study . . . . .              | 3        |
|               | Understanding Movement . . . . .                     | 4        |
|               | Origins of the Field . . . . .                       | 5        |
|               | Summary . . . . .                                    | 18       |
| CHAPTER 2     | Methodology for Studying Motor Performance . . . . . | 21       |
|               | Classification of Motor Skills . . . . .             | 21       |
|               | Basic Considerations in Measurement . . . . .        | 24       |
|               | Measuring Motor Behavior . . . . .                   | 26       |
|               | Measuring and Evaluating Relationships . . . . .     | 48       |
|               | Summary . . . . .                                    | 54       |
| CHAPTER 3     | Human Information Processing . . . . .               | 57       |
|               | The Information-Processing Model . . . . .           | 57       |
|               | Three Stages of Information Processing . . . . .     | 58       |
|               | Anticipation . . . . .                               | 78       |
|               | Signal-Detection Theory . . . . .                    | 85       |
|               | Memory . . . . .                                     | 88       |
|               | Summary . . . . .                                    | 93       |
| CHAPTER 4     | Attention and Performance . . . . .                  | 97       |
|               | Types of Attention . . . . .                         | 97       |
|               | Theories of Attention . . . . .                      | 100      |
|               | Competition for Attention . . . . .                  | 103      |
|               | Attention During Movement . . . . .                  | 116      |
|               | Focus of Attention . . . . .                         | 124      |
|               | Attention and Anxiety . . . . .                      | 127      |
|               | Summary . . . . .                                    | 130      |

**PART II MOTOR CONTROL****133**

|   |            |
|---|------------|
| CHAPTER 5 Sensory Contributions to Motor Control. . . . .               | <b>135</b> |
| Closed-Loop Control Systems . . . . .                                   | <b>135</b> |
| Vision. . . . .   | <b>136</b> |
| Audition . . . . .  | <b>153</b> |
| Proprioceptors . . . . .  | <b>153</b> |
| Proprioception and Motor Control . . . . .                              | <b>158</b> |
| Feedforward Influences on Motor Control . . . . .                       | <b>170</b> |
| Summary . . . . .   | <b>174</b> |
| CHAPTER 6 Central Contributions to Motor Control. . . . .               | <b>177</b> |
| Open-Loop Processes . . . . .   | <b>177</b> |
| Central Control Mechanisms. . . . .                                     | <b>182</b> |
| Central Control of Rapid Movements . . . . .                            | <b>188</b> |
| Generalized Motor Programs . . . . .                                    | <b>208</b> |
| Summary . . . . .   | <b>221</b> |
| CHAPTER 7 Principles of Speed and Accuracy . . . . .                    | <b>223</b> |
| Fitts' Law: The Logarithmic Speed–Accuracy Trade-Off. . . . .           | <b>224</b> |
| The Linear Speed–Accuracy Trade-Off . . . . .                           | <b>231</b> |
| The Temporal Speed–Accuracy Trade-Off. . . . .                          | <b>234</b> |
| Central Contributions to the Spatial Speed–Accuracy Trade-Off . . . . . | <b>241</b> |
| Correction Models of the Speed–Accuracy Trade-Off. . . . .              | <b>257</b> |
| Summary . . . . .   | <b>260</b> |
| CHAPTER 8 Coordination. . . . .   | <b>263</b> |
| Discrete Tasks . . . . .  | <b>264</b> |
| Continuous Tasks . . . . .  | <b>277</b> |
| Summary . . . . .   | <b>294</b> |
| CHAPTER 9 Individual Differences and Capabilities . . . . .             | <b>297</b> |
| Experimental Versus Differential Approaches . . . . .                   | <b>297</b> |
| Abilities. . . . .  | <b>301</b> |
| Taxonomies. . . . .   | <b>310</b> |
| Prediction . . . . .  | <b>312</b> |
| Individual-Difference Variables . . . . .                               | <b>315</b> |
| Summary . . . . .   | <b>324</b> |

**PART III MOTOR LEARNING****325**

|  |            |
|--|------------|
| CHAPTER 10 Motor Learning Concepts and Research Methods. . . . . | <b>327</b> |
| Motor Learning Defined . . . . .                                 | <b>327</b> |
| Measuring Motor Learning. . . . .                                | <b>329</b> |

|  |            |
|--|------------|
| Designing Experiments on Learning . . . . .                            | <b>335</b> |
| Alternative Methods for Measuring Learning . . . . .                   | <b>338</b> |
| Issues About the “Amount” of Learning . . . . .                        | <b>342</b> |
| Understanding Learning and Performance Variables . . . . .             | <b>345</b> |
| Summary . . . . .  | <b>345</b> |
| <b>CHAPTER 11 Conditions of Practice . . . . .</b>                     | <b>347</b> |
| The Law of Practice . . . . .  | <b>347</b> |
| Motivation for Learning . . . . .                                      | <b>351</b> |
| Verbal Information . . . . .   | <b>353</b> |
| Perceptual Learning . . . . .  | <b>355</b> |
| Observational Learning . . . . .                                       | <b>356</b> |
| Mental Practice . . . . .  | <b>359</b> |
| Distribution of Practice . . . . .                                     | <b>361</b> |
| Variability of Practice . . . . .                                      | <b>367</b> |
| Contextual Interference . . . . .                                      | <b>371</b> |
| Part Versus Whole Practice . . . . .                                   | <b>382</b> |
| Guidance . . . . .   | <b>386</b> |
| Principles of Practice Specificity . . . . .                           | <b>388</b> |
| Summary . . . . .  | <b>390</b> |
| <b>CHAPTER 12 Augmented Feedback . . . . .</b>                         | <b>393</b> |
| Classifications and Definitions . . . . .                              | <b>393</b> |
| Research on Augmented Feedback . . . . .                               | <b>395</b> |
| Evaluating the Effects of Augmented Feedback . . . . .                 | <b>398</b> |
| Knowledge of Performance . . . . .                                     | <b>400</b> |
| Knowledge of Results . . . . .   | <b>405</b> |
| Theoretical Issues: How Does Augmented Feedback “Work”? . . . .        | <b>424</b> |
| Summary . . . . .  | <b>427</b> |
| <b>CHAPTER 13 The Learning Process . . . . .</b>                       | <b>429</b> |
| Characteristics of the Learning Process . . . . .                      | <b>429</b> |
| Closed-Loop Theory . . . . .   | <b>438</b> |
| Schema Theory . . . . .  | <b>441</b> |
| Differing Theoretical Perspectives of Motor Learning . . . . .         | <b>446</b> |
| Summary . . . . .  | <b>456</b> |
| <b>CHAPTER 14 Retention and Transfer . . . . .</b>                     | <b>461</b> |
| Fundamental Distinctions and Definitions . . . . .                     | <b>461</b> |
| Measuring Retention and Transfer . . . . .                             | <b>463</b> |
| Retention and Motor Memory . . . . .                                   | <b>467</b> |
| Retention Loss . . . . .   | <b>471</b> |
| Transfer of Learning . . . . .   | <b>481</b> |
| Summary . . . . .  | <b>488</b> |
| <b>Appendix 491 ■ Glossary 493 ■ References 503 ■ Author Index 565</b> |            |
| <b>Subject Index 573 ■ About the Authors 581</b>                       |            |
