

# Syntactic Analysis

## An HPSG-Based Approach

ROBERT D. LEVINE

*Ohio State University*

# Contents

<i>Preface</i>	<i>page xi</i>
<b>1 Syntactic Data, Patterns, and Structure</b>	<b>1</b>
1.1 Introduction: The Problem, and a Possible Solution	1
1.1.1 Natural Language Data	1
1.1.2 A Possible Line of Solution	7
1.2 Structure: Some Clues	8
1.2.1 Displacement: A Basic Natural Language Pattern	8
1.2.2 VP Proform Replacement	13
1.3 Labeling Phrasal Categories: Why VP?	16
1.4 Subconstituents of VP	18
1.4.1 Evidence for NPs	19
1.4.2 Versions of the Displacement Test	21
1.4.3 Evidence for PP	22
1.5 Tree Representation of Constituent Structure	24
1.6 A Worked Example: Solution Procedure	30
1.7 Trees and Grammars: A Preview	33
1.8 What Comes Next?	36
<b>2 Syntactic Rules and Lexical Valence</b>	<b>37</b>
2.1 The Setting	37
2.2 Where Do Syntactic Structures Come From?	38
2.2.1 Phrase Structure Rules, Continued	42
2.3 The Valence Problem	48
2.4 The Valence Solution	55
2.5 Refinements	63
2.6 Subject Selection	72
2.7 NPs	76
2.7.1 <i>One</i> Replacement	77
2.7.2 Generalizing the NP System	82
2.8 Adjuncts	85
2.9 Markers	89
2.10 A Unitary Architecture for Syntactic Categories?	97
2.11 What Comes Next?	100
<b>3 The Auxiliary Dependency</b>	<b>102</b>
3.1 Auxiliary Phenomena: <i>What Are Auxiliaries?</i>	103
3.1.1 The NICE Properties	104

3.1.2	The Auxiliary System Dependency	108
3.1.3	How Modals Reveal Themselves to Be Verbs	110
3.2	What Is the Phrase Structure of Clauses with Auxiliaries?	113
3.2.1	Auxiliaries as VP Heads?	113
3.2.2	Coordination	120
3.2.3	Null Subjects: An Alternative That Doesn't Work	123
3.3	Capturing Auxiliaries	125
3.3.1	Some Stocktaking	125
3.3.2	Solving the Auxiliary Puzzle Via Valence	126
3.3.3	Capturing Auxiliary Ordering	132
3.4	Auxiliaries and Subject Selection	133
3.5	Where Does Inversion Come From?	136
3.6	What Comes Next?	141
<b>4</b>	<b>Local Dependencies and Lexical Rules</b>	<b>143</b>
4.1	Case and Agreement	143
4.1.1	Case	143
4.1.2	Agreement	146
4.2	Passive	151
4.2.1	The Basic Cases	151
4.2.2	Passive Imposters	155
4.3	Infinitival Complements	159
4.4	Extraposition	166
4.4.1	Basic Data	167
4.4.2	Phrase Structure of the Extraposition VP	167
4.5	<i>There</i>	174
4.5.1	Basic Data	176
4.5.2	<i>There</i> Is a Subject	178
4.5.3	<i>There</i> Is a (Pronominal) NP	179
4.5.4	<i>There</i> VPs Immediately Dominate the Predicate	180
4.5.5	Accounting for <i>There</i>	182
4.6	Ergative and Antipassive	188
4.7	What Comes Next?	192
<b>5</b>	<b>Infinitival Complements</b>	<b>194</b>
5.1	Consequences of the V NP VP Analysis	194
5.2	What Is Infinitival <i>to</i> ?	202
5.2.1	<i>To</i> as a Preposition?	202
5.2.2	<i>To</i> as a Complementizer?	204
5.2.3	NICE Revisited	208
5.3	Raising Verbs, Continued	218
5.4	'Super-Raising': The French Tense Auxiliaries	226
5.5	What Comes Next?	234
<b>6</b>	<b>The Limits of Valence: Topicalization</b>	<b>236</b>
6.1	Beyond Valence: Data	236
6.2	Beyond Valence: Structure	237
6.3	Beyond Valence: Mechanism	245

6.3.1	Is Constituent Structure Shared between Filler and Gap?	247
6.3.2	Filler/Gap Linkage Via SLASH	250
6.3.3	Connectivity via SLASH: The Complete Picture	259
6.3.4	Connectivity: A Case Study	261
6.4	Cross-linguistic Evidence for the Locality of Extraction	263
6.4.1	French	264
6.4.2	Irish	269
6.4.3	Icelandic	272
6.4.4	Yiddish	275
6.4.5	Welsh	276
6.5	What Comes Next?	277
<b>7</b>	<b>Epilogue: Unbounded Dependencies and the Limits of Syntax</b>	<b>279</b>
7.1	Extraction Constructions in English	279
7.1.1	Fillers in Topic Position	279
7.1.2	Fillers in Argument Positions	286
7.2	'Syntactic' Restrictions on Filler/Gap Linkages: An Incomplete Survey	293
7.2.1	The Complex NP Constraint	293
7.2.2	<i>Wh</i> -Islands	295
7.2.3	<i>That</i> -Trace Effect	299
7.3	Rethinking the Status of 'Syntactic' Constraints	304
7.3.1	CNCP and Related Phenomena	305
7.3.2	The Coordinate Structure Constraint Reexamined	309
7.3.3	Where Does the <i>That</i> -Trace Effect Come from?	314
7.4	Conclusion: The Limits of Syntactic Explanation	319
	<i>Suggestions for Further Reading</i>	324
	<i>References</i>	329
	<i>Index</i>	333
