

Dipl.-Ing. Markus Breitbach, Blaustein

On the Correction of Two-Dimensional Clusters of Errors

Reihe **10**: Informatik/
Kommunikationstechnik Nr. **489**

Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 2 | Two-dimensional Channels with Clustered Errors | 3 |
| 2.1 | The practical problem | 3 |
| 2.2 | Theoretical model | 5 |
| 2.3 | Combinatorial metrics | 5 |
| 2.3.1 | Translational and cyclic combinatorial metrics | 6 |
| 2.3.2 | Examples | 7 |
| 3 | Array Codes Correcting a Single Error Cluster | 9 |
| 3.1 | Known array codes | 9 |
| 3.2 | The construction principle of re-encoding check symbols | 11 |
| 3.2.1 | Encoding of \mathcal{C}_A | 12 |
| 3.2.2 | Decoding of \mathcal{C}_A | 14 |
| 3.2.3 | Example | 15 |
| 3.3 | Improved construction | 19 |
| 3.3.1 | Encoding of \mathcal{C}_B | 19 |
| 3.3.2 | Decoding of \mathcal{C}_B | 22 |
| 3.3.3 | Example | 23 |
| 3.3.4 | Relationship between codes \mathcal{C}_A and \mathcal{C}_B | 25 |
| 3.4 | Implementation aspects | 27 |
| 3.5 | Comparison of the code rate to bounds and other codes | 27 |
| 3.6 | Increasing the matrix size | 29 |
| 4 | Array Codes for Special Applications | 31 |
| 4.1 | Correction of multiple clusters | 31 |
| 4.1.1 | Construction \mathcal{C}_D | 32 |
| 4.1.2 | Modification of a GRS code to correct a non-phased burst | 35 |
| 4.1.3 | Construction \mathcal{C}_E with increased matrix size | 38 |
| 4.1.4 | Comparison between codes \mathcal{C}_D and \mathcal{C}_E | 39 |
| 4.2 | Erasur e correction | 41 |
| 4.3 | Correction of sparse clusters | 42 |
| 4.3.1 | Reducing redundancy for determination of the error value | 43 |
| 4.3.2 | Reducing redundancy for error localization | 44 |
| 5 | Coding Schemes based on Interleaving | 47 |
| 5.1 | Tilings | 48 |
| 5.2 | Interleaving of binary codewords | 50 |
| 5.3 | Interleaving of non-binary codewords | 51 |

| | | |
|----------|---|-----------|
| 5.3.1 | Construction of the interleaving scheme | 52 |
| 5.3.2 | Optimum symbol shape S | 54 |
| 5.3.3 | Optimum symbol size m | 56 |
| 5.4 | Comparison of both interleaving schemes | 58 |
| 5.5 | Comparison to array code C_B | 61 |
| 6 | Conclusion | 63 |
| A | Bounds | 64 |
| A.1 | Hamming bound | 64 |
| A.2 | Gilbert bound | 66 |
| A.3 | Generalized Singleton bound | 67 |
| A.4 | Generalization of Bassalygo's bound | 69 |
| A.5 | Illustration of the bounds | 70 |
| | Bibliography | 71 |
