1	Introduction	1
1.1	Programming Language	1
1.2	Specifications	3
1.3	Verification	7
1.4	Overview	9
2	Compositionality	11
2.1	Towards Compositional Proof Systems	11
2.2	A Compositional Proof System	34
2.3	Extension to Real-Time	49
3	Compositionality and Real-Time	55
3.1	Real-Time Programming Language	55
3.2	Denotational Semantics	58
3.3	Proof System based on Metric Temporal Logic	65
3.4	Proof System for Extended Hoare Triples	78
4	Adding Program Variables	103
4.1	Programming Language with Variables	103
4.2	Adaptation Denotational Semantics	105
4.3	Adaptation of the Proof System based on Metric Temporal Logic	113
4.4	Adaptation of the Proof System for Extended Hoare Triples	119

5	Shared Processors	129
5.1	Programming Language for Multiprogramming	129
5.2	Operational Behaviour	132
5.3	Programming Language for Shared Processors	138
5.4	Denotational Semantics	140
5.5	Extension of the Proof System based on Metric Temporal Logic	149
5.6	Extension of the Proof System for Extended Hoare Triples	155
6	Concluding Remarks	161
6.1	Comparison	162
6.2	Related Work	163
6.3	Future Work	164
A	Proofs of Lemmas in Chapter 3	167
B	Soundness and Completeness of the Proof System in Section 3.3	179
B.1	Soundness of the Proof System in Section 3.3	179
B.2	Preciseness of the Proof System in Section 3.3	184
C	Soundness and Completeness of the Proof System in Section 3.4	189
C.1	Soundness of the Proof System in Section 3.4	189
C.2	Completeness of the Proof System in Section 3.4	194
D	Soundness of the Proof Systems in Chapter 4	207
D.1	Soundness of the Proof System in Section 4.3.2	207
D.2	Soundness of the Proof System in Section 4.4.2	212
E	Soundness of the Proof Systems in Chapter 5	221
E.1	Soundness of the Proof System in Section 5.5.2	221
E.2	Soundness of the Proof System in Section 5.6.2	224
	Bibliography	229
