

FORTSCHRITT-
BERICHTE

VDI

M. Sc. Eng. Yu Wang, Erlangen

**Consistency-based Process
Diagnosis based on the
Variant Connection Graph
Proof Procedure and Petri
Nets**

Reihe **8**: Meß-, Steuerungs-
und Regelungstechnik

Nr. **645**

Table of Contents

1 Introduction	1
2 The Variant Connection Graph Proof Procedure	7
2.1 Historical Development	7
2.2 Predicate Logic Plant Description— Clausal Form	9
2.3 Representation of All Possible Plant States— the VCG	11
2.4 Reasoning with the Existence Conditions— the VCGPP	16
2.5 Comparing the VCGPP with the ATMS	18
3 Modeling	20
3.1 Problem of Modeling with the Language of the Predicate Logic	20
3.2 Modeling with Petri Nets	20
3.2.1 Way to Petri Nets	20
3.2.2 Why Petri Nets	21
3.2.3 Syntax and Representation of Petri Nets	22
3.2.4 Modeling Strategy	24
3.2.5 An Example	25
3.2.5.1 Modeling of Function Unit TABLE	27
3.2.5.2 Modeling of Function Unit RFZX	29
3.2.5.3 Modeling of Function Unit RFZY	30
3.2.5.4 Mutual Influences of Function Units	33
3.3 Transformation of a Petri Net Model into a Predicate Logic Description	38
3.3.1 Representation of a Static Petri Net — (P, T, F, K, M_0)	38
3.3.2 Representation of a Dynamic Petri Net — (P, T, F, K, M_0)	44
3.3.3 Interpretation of the Transitions of a Petri Net	50
3.3.4 Predicate Logic Description of a Petri Net Model — Model 1	50
3.4 Modeling for Diagnosis— Model 2	56
3.4.1 Interpreting the Markings of the Petri Net Model	56
3.4.2 Introduction of Correctness Assumptions	59
3.4.3 Characteristics of Model 2	62
3.5 Knowledge Representation— a General View to Our Model	63
4 Diagnosis	65

4.1 Our On-line Diagnostic Strategy	65
4.1.1 Reiter's Theory of Diagnosis and Its Application in our Work	65
4.1.2 Computing all Diagnoses— Implementation of Reiter's Algorithm	67
4.2 Off-line Generation of the On-line Programs	77
4.2.1 General Concept	77
4.2.2 Generation of Program 2 — Code-Generator 2	78
4.2.3 Generation of Program 1 — Code-Generator 1	93
4.3 Implementation	101
4.3.1 Hardware and Software Configuration	101
4.3.2 A Practical Problem and its Solution	102
4.4 An Exemplary Application	107
4.4.1 Modeling and Diagnosis— System Construction	107
4.4.2 Characterizing the Planned States in Model 2	109
4.4.3 Diagnoses of some Typical Sensor Faults and Malfunctions	111
5 Summary and Outlook	116
Appendix	118
References	119
