

FORTSCHRITT-
BERICHTE

VDI

Dipl.-Ing. Dennis Kremer, Iserlohn

**Analysis of Multilayered
Anisotropic Dielectric
Resonators and Waveguides
by the Method of Lines**

Reihe **21**: Elektrotechnik

Nr. **232**

Contents

List of Principal Symbols	VII
Introduction	1
1 Field and Wave Equations	7
1.1 Maxwell's Equations	7
1.2 Basic Definitions and Equations Related to Uniaxial Crystals	8
1.3 Solutions of Maxwell's Equations	11
1.3.1 Ordinary Wave	12
1.3.2 Extraordinary Wave	14
1.3.3 Hybrid Waves	16
2 Multilayered Resonator Structures	17
2.1 Isolated Dielectric Resonator	17
2.1.1 Theory	18
2.1.2 Numerical Results	24
2.2 Conical Dielectric Resonator	26
2.2.1 Theory	27
2.2.2 Numerical Results	30
2.2.3 Improvement of the Model	30
2.3 Anisotropic Dielectric Resonator	35
2.3.1 Theory	36
2.3.2 Numerical Results	38
3 Nonradiative Dielectric Waveguides	43
3.1 Ordinary Wave	44
3.2 Extraordinary Wave	45
3.3 Discretization	47
3.4 Numerical Results	49
4 Pole-Free Eigenvalue Determination	53
4.1 Theory	55
4.2 Results	56
Concluding Remarks and Future Aspects	59

Appendix	61
Appendix A	61
Appendix B	62
Appendix C	63
Appendix D	64
Appendix E	65
Appendix F	66
Appendix G	66
Appendix H	69
Appendix I	70
 Bibliography	 71
