CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xiii</i>
1. The Kinetics and Mechanism of Complex Redox Reactions in Aqueous Solution: The Tools of the Trade	1
Mária Szabó, Gábor Bellér, József Kalmár, and István Fábián	
1. Introduction	2
2. General Considerations	3
3. Selected Reactions of Oxychlorine Species	6
4. Kinetics of the Oxidation Reactions of Peroxo Compounds	22
5. The Photon as a Reactant	35
6. Selected Kinetic Studies on Heterogeneous Systems	49
7. Concluding remarks	55
Acknowledgments	57
References	57
2. O–O Bond Activation in Cu- and Fe-Based Coordination Complexes: Breaking It Makes the Difference	63
Joan Serrano-Plana, Anna Company, and Miquel Costas	
1. Introduction	64
2. Modeling Tyrosinase: O–O Cleavage in Dinuclear Copper Systems	67
3. O–O Cleavage in Iron-Oxygen Species	79
4. Summary	99
References	100
3. μ-Nitrido Diiron Phthalocyanine and Porphyrin Complexes: Unusual Structures With Interesting Catalytic Properties	107
Alexander B. Sorokin	
1. Introduction	108
2. Preparation and Spectroscopic Characterization of μ -Nitrido Diiron Macrocyclic Complexes	111
3. High-Valent Diiron-Oxo Species and Their Spectroscopic Characterization	122
4. Catalytic Properties	128
5. Conclusion and Outlook	160
Acknowledgments	162
References	162

4. The Role of Nonheme Transition Metal-Oxo, -Peroxo, and -Superoxo Intermediates in Enzyme Catalysis and Reactions of Bioinspired Complexes	167
Abayomi S. Faponle and Sam P. de Visser	
1. Introduction	168
2. Metal-(Di)oxygen Intermediates	173
3. Conclusions	190
Acknowledgments	190
References	190
5. Diarylplatinum(II) Scaffolds for Kinetic and Mechanistic Studies on the Formation of Platinacycles via an Oxidative Addition/Reductive Elimination/Oxidative Addition Sequence	195
Gabriel Aullón, Margarita Crespo, Jesús Jover, and Manuel Martínez	
1. Introduction	196
2. Compounds	198
3. Kinetic Studies	206
4. Synergy With DFT Calculations	221
5. Concluding Remarks	239
Acknowledgments	240
References	240
6. Controlling the Lability of Square-Planar Pt(II) Complexes Through Electronic and π-Conjugation: Correlation Between Kinetics and Theoretical Parameters	243
Allen Mambanda and Deogratius Jaganyi	
1. Introduction	244
2. Pull-and-Push Effects of Pt(II) Complexes With Coordinated N ⁺ C/N ⁻ N/C π -Acceptor Nonleaving Ligands	252
3. Conclusions	272
Acknowledgments	274
References	274
7. Thionitrous Acid/Thionitrite and Perthionitrite Intermediates in the "Crosstalk" of NO and H₂S	277
Juan P. Marcolongo, Ari Zeida, Leonardo D. Slep, and José A. Olabe	
1. Introduction	278
2. S-Nitrosothiols, RSNOs, A Brief Overview on Structure and Reactivity	280

3. Thionitrous Acid HSNO and Thionitrite SNO ⁻ , Elusive Aqueous Intermediates	282
4. Polysulfides and Sulfur Sols	287
5. Perthionitrite, S ₂ NO ⁻ . Identification of I _{yellow}	288
6. Coordination Chemistry of Nitrosothiols, Thionitrous Acid, Thionitrite, and Perthionitrite	295
7. Conclusions	306
Acknowledgments	306
References	306
8. Computational Insights Into the Reactivity at the Sulfur Atoms of M₃S₄ (M = Mo, W) Clusters: The Mechanism of [3+2] Cycloaddition With Alkynes	311
Andrés G. Algarra and Manuel G. Basallote	
1. Introduction: The Reactivity of M ₃ S ₄ (M = Mo, W) Clusters	312
2. Experimental and Computational Methods	320
3. Kinetics and Mechanistic Studies on the [3+2] Cycloaddition Reaction Between M ₃ S ₄ Clusters and Alkynes	322
4. Conclusions and Outlook	339
Acknowledgments	340
References	340
9. Reactive Oxygen Species in Photodynamic Therapy: Mechanisms of Their Generation and Potentiation	343
Janusz M. Dąbrowski	
1. Introduction	344
2. Redox Homeostasis in Cells	346
3. Photodynamic Therapy	348
4. Penetration Depth	349
5. ROS-Generating Systems for PDT	351
6. ROS Generation Mechanisms	355
7. Subcellular Localization of Photosensitizers in Cells	362
8. ROS-Mediated Biological Mechanisms	366
9. Methods of ROS Detection in PDT	372
10. Strategies to Enhance ROS Generation in PDT	378
11. Summary	384
Acknowledgments	386
References	386

10. Formic Acid as a Hydrogen Carrier for Fuel Cells Toward a Sustainable Energy System	395
Hajime Kawanami, Yuichi Himeda, and Gábor Laurenczy	
1. Introduction	396
2. Liquid Organic Hydrogen Carriers	397
3. Recent Organic Materials for LOHC	398
4. Formic Acid for LOHC	401
5. Homogeneous Catalytic Dehydrogenation of Formic Acid	404
6. Cp* With Iridium Complex for H ₂ Generation From Formic Acid	408
7. High-Pressure H ₂ Generation	417
8. Application for Fuel Cell Batteries	421
9. Conclusion	424
References	425
<i>Index</i>	429
