Sheaves and Functions Modulo p
Lectures on the Woods Hole Trace Formula

LENNY TAE LMAN
Universiteit van Amsterdam

 **CAMBRIDGE**
UNIVERSITY PRESS

Contents

Introduction	1
Chapter 1. τ -sheaves, crystals, and their trace functions	7
1. Coherent τ -sheaves	7
2. The trace function of a coherent τ -sheaf	11
3. Nilpotent coherent τ -sheaves	12
4. Crystals	13
5. Pointwise criteria	16
Chapter 2. Functors between categories of crystals	21
1. Pullback	21
2. Tensor product	22
3. Direct images	24
4. Extension by zero	30
5. Pushforward with proper support	36
Chapter 3. The Woods Hole trace formula	43
1. The Grothendieck group of crystals	43
2. The sheaves-functions dictionary	45
3. A quotient of the Grothendieck group of crystals	46
4. Proof of the Localization Theorem	48
Chapter 4. Elementary applications	57
1. Congruences between number of points	57
2. Chevalley-Warning	58
3. Polynomial sums	59
4. Hasse invariant	60
Chapter 5. Crystals with coefficients	63
1. τ -sheaves and crystals with coefficients	63
2. Crystals with finite coefficients	64
3. Traces of crystals with finite field coefficients	67

Chapter 6. Cohomology of symmetric powers of curves	71
1. Symmetric tensors and exterior tensor powers	71
2. Some sheaves on the symmetric powers of a scheme	75
3. Cohomology of exterior symmetric tensor powers	77
4. Crystals on symmetric powers	81
Chapter 7. Trace formula for L -functions	87
1. L -functions of τ -sheaves and crystals	87
2. Computation of L -functions via symmetric powers	90
3. Proof of the trace formula for L -functions	92
Chapter 8. Special values of L -functions	97
1. Example: the Goss zeta function of a scheme over $\mathbf{F}_q[t]$	97
2. Extensions of τ -sheaves	100
3. Determinants and Fitting ideals	103
4. Special values of L -functions of τ -sheaves	105
5. An example failing the semi-simplicity hypothesis	106
Appendix A. The trace formula for a transversal endomorphism	109
1. Extensions	109
2. Grothendieck-Serre duality	111
3. A local computation	115
4. Duality for the graph of a morphism	116
5. Woods Hole trace formula	118
Bibliography.	121
Index.	125
