

# Contents

<b>Structure, reactivity and rearrangement</b>	1
A. L. J. Beckwith, <i>University of Adelaide</i>	
<b>Addition reactions</b>	49
D. I. Davies, <i>King's College, University of London</i>	
<b>Homolytic aliphatic substitution</b>	71
S. H. Ong, <i>University of Science (Penang), Malaysia</i>	
<b>Reactions of peroxides</b>	95
E. G. E. Hawkins, <i>BP Chemicals International Ltd., Epsom</i>	
<b>Free radicals of nitrogen</b>	139
A. R. Forrester, <i>University of Aberdeen</i>	
<b>Aryloxy and related free radicals</b>	167
F. R. Hewgill, <i>University of Western Australia</i>	
<b>Free radicals of elements other than C, N, O or S</b>	205
Richard A. Jackson, <i>University of Sussex</i>	
<b>Homolytic oxidations and reduction of organic compounds by metallic ions</b>	237
J. S. Littler, <i>University of Bristol</i>	
<b>Organic free radicals produced by radiation</b>	263
A. J. Swallow, <i>Christie Hospital and Holt Radium Institute, Manchester</i>	
<b>Radical-ions</b>	293
J. C. Evans, <i>University College, Cardiff</i> , and P. J. Emes, <i>Glamorgan Polytechnic</i>
