Preface ix

*Chapter 1*  
Hydrogenation Catalysts, Reactors,  
and Reaction Conditions

I. General Considerations	1
II. Reaction Conditions and Catalyst Variables	6
III. Hydrogenation Reactors	8
IV. Preparation of Catalysts	9
References	11

*Chapter 2*  
Hydrogenation of Acetylenes

I. General Considerations	13
II. Catalysts	16
III. Acetylenic Carbinols and Glycols	20
IV. Hydrogenolysis	23
V. Acetylenic Aldehydes and Ketones	24
VI. Polyacetylenes	24
References	27

*Chapter 3*  
Hydrogenation of Olefins

I. Mechanism of Hydrogenation	31
II. Catalysts	33
III. Effect of Olefin Structure	34
IV. Double-Bond Migration	36

V. Effects of Double-Bond Migration	38
VI. Cis-Trans Isomerization	42
VII. Stereochemistry	43
VIII. Vinyl Functions	49
IX. Unsaturated Carbonyl Compounds	51
References	58

### *Chapter 4*

## Hydrogenation of Acids, Esters, Lactones, and Anhydrides

I. Hydrogenation of Acids	64
II. Hydrogenolysis of Esters	65
III. Hydrogenation of Lactones	67
IV. Hydrogenation of Anhydrides	69
References	70

### *Chapter 5*

## Hydrogenation of Aldehydes

I. Saturated Aliphatic Aldehydes	72
II. Unsaturated Aliphatic Aldehydes	74
III. Aromatic Aldehydes	77
IV. Aromatic Unsaturated Aldehydes	78
References	80

### *Chapter 6*

## Hydrogenation of Ketones

I. Aliphatic Ketones	82
II. Aromatic Ketones	100
References	108

### *Chapter 7*

## Hydrogenation of Nitro Compounds

I. Catalysts	114
II. Solvents	114
III. Partial Reduction of Nitro Compounds	114
IV. Reduction of Aliphatic Nitro Compounds	120
V. Unsaturated Nitro Compounds	122
VI. Halonitro Aromatics	124
VII. Dinitro Compounds	126
VIII. Cyclizations	129
References	134

## *Chapter 8* Hydrogenation of Nitriles

I. Mechanism	138
II. Catalysts	140
III. Unsymmetrical Amines	143
IV. Cyclizations	145
V. Reductive Hydrolysis	149
VI. Methylation	150
References	150

## *Chapter 9* Hydrogenation of Oximes

I. Catalysts	153
II. Substrates	156
III. Solvent	157
IV. Products of Partial Reduction	158
V. Products of Hydrolysis	158
VI. Bifunctional Molecules	159
VII. Stereochemistry	161
References	162

## *Chapter 10* Reductive Alkylation

I. Substrates	165
II. Catalysts	170
III. Stereochemistry	170
References	173

## *Chapter 11* Hydrogenation of Carbocyclic Aromatics

I. Carbocyclic Aromatics	175
II. Anilines	186
III. Phenols and Phenyl Ethers	192
References	207

## *Chapter 12* Hydrogenation of Heterocyclic Compounds

I. Pyridines	213
II. Pyrroles	220

III. Indoles	222
IV. Quinolines and Isoquinolines	223
V. Imidazoles and Imidazolones	226
VI. Pyrazines	226
VII. Pyrimidines	227
VIII. Furans	227
References	230

### *Chapter 13* Catalytic Dehydrohalogenation

I. Catalysts	235
II. Basic Media	235
III. Effect of Structure	236
IV. Elimination Reactions	238
V. Halohydrins	240
VI. Haloolefins	241
VII. Halonitro Compounds	241
VIII. Polyhalo Compounds	242
IX. Halogen as Blocking Group	244
X. Trapping Reactions	245
XI. Labeling	246
XII. Dehalogenation with Hydrazine	246
XIII. Acid Chlorides–Rosenmund Reduction	246
References	248

### *Chapter 14* Hydrogenolysis of Small Rings

I. Cyclopropanes	251
II. Oxiranes	260
III. Aziridines	267
References	267

### *Chapter 15* Miscellaneous Hydrogenolyses

I. Benzyl Groups Attached to Oxygen	271
II. Benzyl Groups Attached to Nitrogen	280
III. Allylic Oxygen Compounds	285
IV. Hydrogenolysis of the Carbon–Carbon Bond	291
V. Hydrogenolysis of the Oxygen–Oxygen Bond	292
VI. Hydrogenolysis of the Nitrogen–Oxygen Bond	294
VII. Hydrogenolysis of the Nitrogen–Nitrogen Bond	299
References	306

Index	313
