# **Industrial Catalysis**

Optimizing Catalysts and Processes

 **WILEY-VCH**

Weinheim • New York • Chichester • Brisbane • Singapore • Toronto

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Introduction .....	1
1.2	Catalysis in an Industrial Reactor .....	2
1.3	Catalytic Reactors .....	4
1.3.1	Large Particle Catalyst .....	4
1.3.2	Small Particle Catalyst .....	5
1.4	Characteristics of Reactor Performance .....	6
	References .....	8
<b>2</b>	<b>Kinetics</b> .....	9
2.1	General .....	9
2.2	Heterogeneous Catalytic Reactions .....	13
2.3	Catalyst Performance .....	18
2.3.1	Deactivation .....	18
2.3.2	Selectivity .....	19
2.4	Kinetics in Practice .....	21
	References .....	24
<b>3</b>	<b>Production and Physical Characteristics of Solid Catalysts</b> .....	25
3.1	Introduction .....	25
3.2	Catalyst Manufacture .....	28
3.2.1	Materials and Methods .....	28
3.2.2	Precipitated Catalysts .....	30
3.2.3	Impregnated Catalysts .....	31
3.2.4	Skeletal Catalysts .....	32
3.2.5	Fused and Molten Catalysts .....	33
3.2.6	Calcination .....	33
3.2.7	Reduction .....	33
3.2.8	Shape Formation of the Catalyst Particles .....	33
3.3	Physical Characterization of Catalysts .....	35
3.3.1	Void Fraction .....	35
3.3.2	Surface Area .....	35
3.3.3	Pore-size Distribution .....	39
3.4	Mass and Heat Transfer in Porous Catalysts .....	41
3.4.1	Introduction .....	41
3.4.2	Ordinary Diffusion in Multicomponent Gases .....	43
3.4.3	Models of Mass Transport in Porous Media .....	48
3.4.4	Heat Transfer in Porous Catalysts .....	56

3.4.5	Mass Diffusivities .....	57
	References .....	59
<b>4</b>	<b>Catalysis and External Transfer Processes</b> .....	<b>61</b>
4.1	Mass Transfer in Heterogeneous Systems .....	61
4.2	Heat and Mass Transfer Coefficients for Flow around Catalyst Particles ..	66
4.2.1	Two-phase Reactors .....	66
4.2.2	Three-phase Reactors .....	68
4.3	Thermal Behavior of Catalyst Particles and Pellet Runaway .....	69
4.4	Criteria for the Absence of Transport Limitations .....	77
	References .....	79
<b>5</b>	<b>Experimental Methods</b> .....	<b>81</b>
5.1	Measurement of Diffusion in Porous Solids .....	81
5.1.1	Diffusion Cell Method .....	81
5.1.2	Steady-state Methods .....	82
5.1.3	Unsteady-state Methods .....	86
5.1.4	Chromatographic Techniques .....	89
5.2	Measurement of Reaction Rates .....	90
5.2.1	Introduction .....	90
5.2.2	Laboratory Reactors for Determination of Kinetics .....	91
5.2.3	Single Pellet Diffusion Reactor .....	101
5.2.4	Dynamic Methods .....	103
5.2.5	Other Reactor Types .....	103
5.3	General Aspects of Kinetic Investigations .....	104
5.3.1	Criteria for Ideal Mixing in a Recycle Reactor .....	105
5.3.2	Errors in the Determination of Kinetic Parameters .....	109
	References .....	110
<b>6</b>	<b>Calculation of Effectiveness Factor</b> .....	<b>113</b>
6.1	Literature Survey .....	113
6.2	Generalized Definitions .....	120
6.2.1	Effectiveness Factor $\eta$ .....	121
6.2.2	Zeroth Aris Number $An_0$ .....	122
6.2.3	First Aris Number $An_1$ .....	126
6.2.4	Comparison of $An_0$ and $An_1$ .....	130
6.3	Generalized Approximations .....	134
	References .....	139
<b>7</b>	<b>Complex Situations</b> .....	<b>141</b>
7.1	Intraparticle Temperature Gradients .....	141
7.1.1	Two- and Three-parameter Model .....	141
7.1.2	Aris Numbers .....	144
7.1.3	Negligibility Criteria .....	146
7.2	Bimolecular Reactions .....	150
7.2.1	Aris Numbers .....	150
7.2.2	Negligibility Criteria .....	155
7.2.3	Multimolecular Reactions .....	157

7.3	Intraparticle Pressure Gradients .....	158
7.3.1	Pressure Gradients .....	159
7.3.2	Effective Diffusion Coefficient .....	162
7.3.3	Aris Numbers .....	163
7.3.4	Negligibility Criteria .....	165
7.3.5	Bimolecular Reactions .....	166
7.4	Anisotropic Catalyst Pellets .....	171
7.5	Summary Complex Situations .....	174
	References .....	176
<b>8</b>	<b>Design of Catalyst Pellets .....</b>	<b>177</b>
8.1	Porous Structure and Observed Reaction Rate .....	177
8.1.1	Porous Structure and Catalyst Activity .....	177
8.1.2	Influence of Mass Transport on Selectivity .....	184
8.2	Optimal Particle Shape and Size .....	189
8.2.1	Pressure Drop .....	189
8.2.2	Diffusion Limitations .....	193
8.3	Distribution of Catalytic Material in Pellets .....	198
8.3.1	Dehydrogenation of Butene .....	198
8.3.2	Poison-resistant Catalyst for Automotive Emission Control .....	199
	References .....	201
<b>9</b>	<b>Examples .....</b>	<b>203</b>
9.1	Analysis of Rate Equations .....	203
9.2	Comparison of Published Rate Equations .....	206
9.3	Permeation of Gases through a Porous Slug .....	209
9.4	Gaseous Counter-diffusion in a Capillary .....	212
9.5	Estimation of Diffusion Coefficients in Gases .....	214
9.6	Estimation of Diffusion Coefficients in Liquids .....	215
9.7	Measurement of Reaction Kinetics and Effective Pellet Diffusivity in a Single-pellet Reactor .....	215
9.8	Langmuir-Hinshelwood Kinetics in a Ring-shaped Catalyst .....	216
9.9	Nonisothermal Catalyst Pellets and First-order Reactions .....	217
9.10	Effectiveness Factor for Nonisothermal Catalyst Pellets .....	217
9.11	Exothermic, Zeroth-order Reaction in a Ring-shaped Catalyst .....	219
9.12	Negligibility of Intraparticle Temperature Gradients .....	221
9.13	Effectiveness Factors Larger than one for Langmuir-Hinshelwood Kinetics .....	221
9.14	Effectiveness Factor Bimolecular Langmuir-Hinshelwood Kinetics .....	222
9.15	Langmuir-Hinshelwood Kinetics and Intraparticle Temperature Gradients ..	223
9.16	Approximation of the Effectiveness Factor for Bimolecular Reactions ..	225
9.17	Negligibility Criteria for Langmuir-Hinshelwood Kinetics .....	226
9.18	Calculation of $\kappa_D _{\kappa_A=0}$ .....	227
9.19	Maximum Pressure Difference in a Porous Pellet .....	227
9.20	Can a Gas be Regarded as Being Diluted .....	228
9.21	Are Gases Diluted for the Oxidation of Ethylene .....	228
9.22	Anisotropy of a Ringshaped Catalyst Pellet .....	229
	References .....	230

<b>Appendix A</b> .....	233
Derivation of a Formula for the Zeroth Aris Number $An_0$ for Simple Reactions .....	233
<b>Appendix B</b> .....	237
Derivation of a Formula for the First Aris Number $An_1$ for Simple Reactions. . .	237
<b>Appendix C</b> .....	241
Calculation of the Effectiveness Factor for a First-order Reaction and the Geometry Factor for a Ring-shaped Catalyst .....	241
References .....	244
<b>Appendix D</b> .....	245
Intraparticle Pressure Gradients for Nondiluted Gases and Simple Reactions ..	245
References .....	254
<b>Appendix E</b> .....	255
Effective Diffusion Coefficient as a Function of the Gas Composition for Nondiluted Gases and Simple Reactions .....	255
<b>Appendix F</b> .....	259
First Aris Number $An_1$ for Concentration-dependent Effective Diffusion Coefficients and Simple Reactions. ....	259
<b>Subject Index</b> .....	263
<b>Author Index</b> .....	267
