SECTION I. INTRODUCTION	1
References	3
Chapter 1. Origins and Directions of Environment-Behavioral Research	5
<i>Daniel Stokols</i>	
An Overview of Ecological and Environmental Psychology	6
Ecological Psychology	7
Environmental Psychology	12
Toward an Integrated Field of Environment and Behavior	21
Core Themes of Environment-Behavioral Research	24
Directions for Future Research and Theoretical Development ..	28
Summary	31
References	31
SECTION II. ECOLOGICAL PSYCHOLOGY	37
References	38
Chapter 2. Behavioral Ecology	39
<i>Edwin P. Willems</i>	
Some Background	39
Some General Implications	43
Defining Attributes of Behavioral Ecology	44
Naturalism in Methodology	44
Distributions of Phenomena	46
Behavioral Focus	47
Environment and Behavior	49
Site Specificity and Place Dependencies	50
Ecological Diagnosis	52
Systems Concepts and Analogies	54
Long Time Periods	57
Taxonomy	59
Molar Phenomena and Nonreductionism	60

Transdisciplinary Emphasis	61
Habitability	62
Small Rates	62
Evaluation of Natural Experiments	63
Concluding Comments	63
References	64
Chapter 3. From Church to Laboratory to National Park: A Program of Research on Excess and Insufficient Populations in Behavior Settings	69
<i>Allan W. Wicker and Sandra Kirmeyer</i>	
Behavior Settings	70
Manning Theory	71
A Reformulation of the Manning Notions	72
Questions for Research	75
A Laboratory Study of Manning	75
A Follow-up Laboratory Study of Manning	79
Design, Equipment, and Procedure	79
Dependent Variables	80
Observation Scheme	81
Subjects	81
Results	82
Effects of Manning Conditions	82
Interrelationships Between Dependent Variables	84
Conclusions from the Completed Research	85
Focus on Service Behavior Settings	86
Effects of Staffing and Population Levels on Occupants of Service Behavior Settings	87
Conceptual Considerations	87
Empirical Research	87
Adaptive Mechanisms for Avoiding or Reducing Overpopulation of Service Behavior Settings	91
Conceptual Considerations	91
Empirical Research	94
Postscript	94
Acknowledgments	95
References	95
SECTION III. ENVIRONMENTAL PSYCHOLOGY	97
References	99
Chapter 4. Environmental Psychology: Origins and Development .	101
<i>Harold M. Proshansky and Timothy O'Hanlon</i>	
Environmental Psychology: Some History	104
Factors Underlying the Emergence of Environmental	

Psychology	110
Value-Methodological Properties of the Field	114
The Future of Environmental Psychology: Some Analysis and Speculation	120
Conferences	126
References	127
Chapter 5. Behavioral and Physiological Effects of Uncontrollable Environmental Events	131
<i>David C. Glass, Jerome E. Singer, and James W. Pennebaker</i>	
Introduction	131
Noise and Task Performance	132
Aftereffects of Unpredictable Noise	134
Perceived Control over Noise	139
Perceived Control and Helplessness	141
Other Stressors	143
Psychic Costs of Stress	143
Uncontrollable Events and Coronary Heart Disease	144
Pattern A and CHD	144
Pattern A, Uncontrollable Events, and CHD	146
Directions for Future Research	148
Concluding Remarks	149
References	149
Chapter 6. Beyond the Effects of Crowding: Situational and Individual Differences	153
<i>Chalsa Loo</i>	
Demographic Data	153
Research on Crowding	154
Determinants of the Effects of Crowding	156
Crowding Effects as a Function of Architecture and Personal Territory	157
Crowding Effects as a Function of Type of Activity	159
Crowding Effects as a Function of Individual Differences	161
Psychological Effects as a Function of Relationship to the Environment	162
A Model of Social and Spatial Crowding Stresses	163
Summary	166
Acknowledgments	167
References	167
Chapter 7. Simulation Techniques in Environmental Psychology	169
<i>George E. McKechnie</i>	
Introduction	169
Varieties of Environmental Simulation	170

Development of the Berkeley Environmental Simulation
Laboratory 174
Uses of Dynamic Perceptual Simulation 177
The Environmental Decision-Maker as Applied Psychologist 179
The Everyday Environment as a Complex, Multidimensional
Entity 181
Validation of the Berkeley Simulator 183
Further Development and Application 187
References 188

**SECTION IV. APPLICATIONS OF BEHAVIORAL
RESEARCH TO ENVIRONMENTAL DESIGN 191**
References 193

Chapter 8. **Action Research** 195
Robert Sommer
References 203

Chapter 9. **From Congruence to Antecedent Conditions: A
Search for the Basis of Environmental
Improvement** 205
William Michelson
Congruence 206
The Context of Man-Environment Relations I 209
The Context of Man-Environment Relations II 211
Acknowledgments 218
References 218

Chapter 10. **Participation in the Design Process: A
Cognitive Approach** 221
Stephen Kaplan
Problem Solving and the Expert 223
On Some Intellectual Assets of Ordinary People 225
Engaging the Human Capacity 226
The Interface with Reality: Experimental Evidence 228
Applications 230
References 233

Chapter 11. **Preference and Everyday Nature: Method and
Application** 235
Rachel Kaplan
The Case of the Roadside 237
Conclusions and Implications 239

The Case of the Drain 240
 Verbal and Visual Parallels 243
 Preference, Regional and "Universal" 244
 Familiarity: Another Factor in Preference 245
 Some Research Dos 246
 Data as a Form of Participation 247
 A Conceptual Grasp of the Environment 248
 References 249

Chapter 12. Who Needs What When: Design of Pluralistic Learning Environments 251
 Martin L. Krovetz
 Internal-External Locus of Control 252
 The Relevance of Architecturally Oriented Research 258
 Designing for Environment-Behavioral Congruence in the Classroom 263
 References 270

Chapter 13. The Relevance of Crowding Experiments to Urban Studies 273
 Mark Baldassare and Claude S. Fischer
 Why Experimentation? 275
 Theories of Urbanism 277
 The Role of Crowding Experiments 280
 Concluding Remarks 282
 Acknowledgments 283
 References 283

SECTION V. DIRECTIONS OF RESEARCH ON ENVIRONMENT AND BEHAVIOR 287
 References 288

Chapter 14. Some Problems of Strategy in Environmental Psychology 289
 M. Brewster Smith
 Theoretically Focused Views 290
 Problem-Centered Views 294
 Psychology and the Environmentalist Movement 294
 Psychology and the Man-Made Environment 297
 Concluding Comments 299
 References 300

Chapter 15. Research on Environment and Behavior: A Personal Statement of Strategy	303
<i>Irwin Altman</i>	
Introduction	303
The Perspective of Social-Unit Analysis	304
Implementing a Social-Unit Analysis	306
Case 1: Social-Isolation Studies	309
Case 2: An Analysis of Home Environments (Altman, Nelson, and Lett, 1972)	311
Case 3: Dominance and Territorial Behavior (Sundstrom and Altman, 1974)	314
Case 4: Nonverbal Behavior and Acquaintanceship (Keiser and Altman, 1974)	316
Summary and Implications	318
What a Social-Unit Analysis Is Not	319
What Social-Unit Analysis Requires by Way of New or Expanded Skills	321
A Capstone Thought	322
References	323
Chapter 16. Methodological Developments in Environment-Behavioral Research	325
<i>Arthur H. Patterson</i>	
Theory and the Problem-Oriented Nature of the Area	326
Methodological Threats to Theoretical Development	327
Internal Validity	328
Statistical-Conclusion Validity	328
Construct Validity	329
External Validity	330
Experiential Realism	332
Research Designs	333
Quasi-Experimental Designs	333
Experimental Designs	335
Exploratory-Descriptive Designs	336
Simulations	336
Mathematical Modeling	337
Cross-Cultural Designs	336
Data-Collection Methods	338
Observational Methods	338
Self-Report Methods	339
Environmental-Behavioral Research: The Future	340
References	341
Author Index	345
Subject Index	353
