<i>Preface</i>	<i>vii</i>
1 An Overview of Emergency Management	1
Emergency Management in the United States	2
Approaches to Emergency Management	16
2 Community Emergency Planning	27
Context of Community Emergency Planning	27
Guiding Principles of Emergency Planning	34
The Systems Approach to Emergency Plan Development	42
3 Functional Analysis of Organizational Response to Emergencies	53
Overview of Emergency Response Functions	56
4 Organizational Actions in Protective Action Selection and Population Warning	79
In-Place Protection	82
Expedient Respiratory Protection	89
Evacuation	91
Safety Hazards of Protective Actions	97
Population Warning	103
5 Models of Warning Response Processes	115
The Protective Action Decision Model	117
The Rationality of Victim Response	128
Inputs to Protective Action Decisionmaking	138
6 Disaster Images and Their Origins: Preimpact Factors Affecting Warning Response	147
Perceived Risks of Environmental Hazards	147
Origins of Risk Perceptions	161
Environmental Risk Communication: Case Examples	164
7 Warning Reception and Response	183
Warning Source Accessibility and Credibility	183
Warning Message Characteristics	191
Warning Confirmation Patterns	198
Social Characteristics and Warning Response	203
Adoption of Recommended Protective Actions	209

8	Protective Action Selection and Implementation	215
	Preemergency Analysis of PAR Selection Processes	215
	Estimates of Protective Action Time Requirements	228
	Levels of Compliance and Timeliness of Response to PARs	241
9	Involving the Community in Emergency Preparedness and Response	249
	Citizen Involvement in Emergency Preparedness	251
	Incentives for Warning Compliance	256
	Effectiveness of Local Emergency Planning Committees	269
