	List of figures	xi
	Preface	xiii
	Glossary of acronyms	xvii
<b>1</b>	<b>Overview of weighting</b>	<b>1</b>
1.1	Reasons for weighting . . . . .	2
1.2	Probability sampling versus nonprobability sampling . . . . .	5
1.3	Theories of population inference . . . . .	7
1.4	Techniques used in probability sampling . . . . .	9
1.5	Weighting versus imputation . . . . .	11
1.6	Disposition codes . . . . .	12
1.7	Flowchart of the weighting steps . . . . .	13
<b>2</b>	<b>Initial steps in weighting probability samples</b>	<b>19</b>
2.1	Base weights . . . . .	19
2.2	Adjustments for unknown eligibility . . . . .	28
<b>3</b>	<b>Adjustments for nonresponse</b>	<b>31</b>
3.1	Weighting class adjustments . . . . .	34
3.2	Propensity score adjustments . . . . .	36
3.3	Tree-based algorithms . . . . .	41
3.3.1	Classification and regression trees . . . . .	42
3.3.2	Random forests . . . . .	42
3.3.3	Boosting . . . . .	43
3.4	Nonresponse in multistage designs . . . . .	48
<b>4</b>	<b>Calibration and other uses of auxiliary data in weighting</b>	<b>51</b>
4.1	Poststratified estimators . . . . .	52

4.2	Raking estimators . . . . .	58
4.3	More general calibration estimation . . . . .	63
4.4	Calibration to sample estimates . . . . .	69
4.5	Weight variability . . . . .	71
<b>5</b>	<b>Use of weights in variance estimation</b>	<b>75</b>
5.1	Exact formulas . . . . .	75
5.2	The with-replacement workaround . . . . .	77
5.3	Linearization variances . . . . .	80
5.4	Replication variances . . . . .	81
5.4.1	Jackknife . . . . .	83
5.4.2	Balanced repeated replication . . . . .	89
5.4.3	Bootstrap . . . . .	94
5.4.4	Grouping PSUs to form replicates . . . . .	98
5.5	Effects of multiple weight adjustments . . . . .	99
<b>6</b>	<b>Nonprobability samples</b>	<b>105</b>
6.1	Volunteer web surveys . . . . .	109
6.2	Weighting nonprobability samples . . . . .	115
6.3	Variance estimation for nonprobability surveys . . . . .	127
6.4	Bayesian approaches . . . . .	131
6.5	Some general comments . . . . .	132
<b>7</b>	<b>Weighting for some special cases</b>	<b>133</b>
7.1	Normalized weights . . . . .	133
7.2	Multiple weights . . . . .	134
7.3	Two-phase sampling . . . . .	136
7.4	Composite weights . . . . .	137
7.5	Masked strata and PSU IDs . . . . .	137
7.6	Use of weights in fitting models . . . . .	138
7.6.1	Comparing weighted and unweighted model fits . . . . .	140
7.6.2	Testing whether to use weights . . . . .	143

<b>8</b>	<b>Quality of survey weights</b>	<b>151</b>
8.1	Design and planning stage . . . . .	152
8.2	Base weights . . . . .	153
8.3	Data editing and file preparation . . . . .	154
8.4	Models for nonresponse and calibration . . . . .	155
8.5	Calibration totals . . . . .	156
8.6	Weighting checks . . . . .	157
8.7	Analytic checks . . . . .	158
8.8	Analysis file and documentation . . . . .	159
