## Feature Article

|   |            |
|---|------------|
| <b>1. From Coordination Chemistry to Adaptive Chemistry</b>   | <b>3</b>   |
| Jean-François Ayme and Jean-Marie Lehn  |            |
| 1. From Discrete Molecules to Self-Organized Molecular Assemblies                                   | 4          |
| 2. From Self-Organization to Constitutional Dynamics and Adaptation                                 | 4          |
| 3. Constitutional Dynamics and Adaptation   | 35         |
| 4. CDC and Constitutional Dynamic Networks  | 50         |
| 5. Toward Systems Chemistry   | 68         |
| Acknowledgement   | 69         |
| References  | 69         |
| <b>2. A Journey From Solution Self-Assembly to Designed Interfacial Assembly</b>                    | <b>79</b>  |
| Edwin C. Constable  |            |
| 1. Introduction   | 80         |
| 2. From Coordination Chemistry to Metallosupramolecular Chemistry                                   | 80         |
| 3. Supramolecular Chemistry at Surfaces   | 102        |
| Acknowledgments   | 127        |
| References  | 127        |
| <b>3. From Self-Sorting of Dynamic Metal–Ligand Motifs to (Supra) Molecular Machinery in Action</b> | <b>135</b> |
| Michael Schmittel and Suchismita Saha   |            |
| 1. Introduction   | 135        |
| 2. Self-Sorting of Dynamic Metal–Ligand Libraries   | 137        |
| 3. Self-Sorting of Multicomponent Metallosupramolecular Assemblies                                  | 143        |
| 4. Integrative Self-Sorting of Supramolecular Devices   | 156        |
| 5. Future Developments—Toward Supramolecular Machinery  | 167        |
| 6. Conclusion   | 170        |
| Acknowledgments   | 170        |
| References  | 171        |

|   |            |
|---|------------|
| <b>4. Metallacrowns: Supramolecular Constructs With Potential in Extended Solids, Solution-State Dynamics, Molecular Magnetism, and Imaging</b> | <b>177</b> |
| Jacob C. Lutter, Curtis M. Zaleski, and Vincent L. Pecoraro   |            |
| 1. Introduction to Metallacrowns  | 178        |
| 2. Extended Structures of Metallacrowns   | 180        |
| 3. Solution-State Examination of Metallacrown Complexes   | 188        |
| 4. Magnetic Applications of Metallacrowns: Single-Molecule Magnets and Magnetorefrigerants  | 201        |
| 5. Metallacrowns and Applications in Imaging  | 228        |
| 6. Summary  | 240        |
| References  | 241        |
| <b>5. Metallosupramolecular Complexes Based on Pyrogallol[4]arenes</b>  | <b>247</b> |
| Chen Zhang, Rahul S. Patil, and Jerry L. Atwood   |            |
| 1. Introduction   | 248        |
| 2. Hydrogen-Bonded Pyrogallol[4]arene/Resorcin[4]arene Nanocapsules   | 248        |
| 3. Metal-Seamed Pyrogallol[4]arene Nanocapsules   | 250        |
| 4. Hierarchical Assembly Using Metal-Seamed Pyrogallol[4]arene Nanocapsules as Building Blocks  | 259        |
| 5. Solution Study of Pyrogallol[4]arene-Based Metallosupramolecular Complexes   | 265        |
| 6. Conclusion   | 273        |
| Acknowledgment  | 274        |
| References  | 274        |
| <b>6. Merging Metal–Nucleobase Chemistry With Supramolecular Chemistry</b>  | <b>277</b> |
| Bernhard Lippert and Pablo J. Sanz Miguel   |            |
| 1. Introduction   | 278        |
| 2. Supramolecular Chemistry: Nucleic Acids and Metal Ions   | 281        |
| 3. Metal Coordination and Base Pairing  | 284        |
| 4. Cross-Linking of Nucleobases   | 291        |
| 5. Cyclic Complexes and Metallacalix[ <i>n</i> ]arenes  | 309        |
| 6. Stacking Interactions Involving Metalated Nucleobases  | 318        |
| 7. Conclusions  | 319        |
| Acknowledgments   | 320        |
| References  | 320        |

---

|   |            |
|---|------------|
| <b>7. Anion and Cation Complexes of Expanded Porphyrins</b>     | <b>327</b> |
| Gabriela I. Vargas-Zúñiga and Jonathan L. Sessler               |            |
| 1. Introduction   | 328        |
| 2. Metal Complexes of Expanded Porphyrins                       | 330        |
| 3. Anion Binding Properties of Expanded Porphyrins              | 360        |
| 4. Concluding Remarks   | 373        |
| Acknowledgments   | 374        |
| References  | 374        |
| <b>8. Arene Ruthenium Complexes in Supramolecular Chemistry</b> | <b>379</b> |
| Bruno Therrien  |            |
| 1. Introduction   | 380        |
| 2. Catalysis  | 382        |
| 3. Crystalline Networks   | 386        |
| 4. Assemblies in Solution                                       | 389        |
| 5. Interactions with DNA and Proteins                           | 393        |
| 6. Liquid Crystals  | 397        |
| 7. Conclusion   | 399        |
| References  | 399        |
| <b>9. Mechanochemical Reactions of Metal-Organic Frameworks</b> | <b>403</b> |
| Yu-Run Miao and Kenneth S. Suslick                              |            |
| 1. Introduction   | 404        |
| 2. Chemical Reactions During Elastic Deformation of MOFs        | 406        |
| 3. Mechanochemistry During Plastic Deformation in MOFs          | 411        |
| 4. Conclusions  | 429        |
| Acknowledgments   | 430        |
| References  | 430        |
| <i>Index</i>  | <b>435</b> |
