List of Contributors	ix	2.12 Animal Excreta	34
Preface	xi	2.13 Illegal Uses of Animal Products	35
		2.14 Conclusions	35
		References	35
1. Animal Perception Including Differences With Humans		3. Animal Products and Human Nutrition	
COLIN G. SCANES		COLIN G. SCANES	
1.1 Introduction	1	3.1 Introduction	41
1.2 Hearing or Sound Detection	1	3.2 Animal Products as a Source of Nutrients	42
1.3 Vision	3	3.3 Animal Products as a Source of Amino-acids/ Proteins	42
1.4 Chemical Senses	5	3.4 Animal Products as a Source of Carbohydrates	46
1.5 Touch	7	3.5 Animal Products as a Source of Lipids	46
1.6 Other Senses	8	3.6 Animal Products as a Source of Minerals	50
References	9	3.7 Animal Products as a Source of Vitamins	51
		3.8 Meat and Nutrient Deficiencies	51
2. Animal Attributes Exploited by Humans (Nonfood Uses of Animals)		3.9 Human Health and the Intake of Animal Products	55
COLIN G. SCANES		3.10 Food Safety and Animal Products	60
2.1 Introduction	13	3.11 Sustainability and Consumption of Animal Products	60
2.2 Use of Animal Skin: Animal Fibers (Leather, Wool, Fur)	13	3.12 Conclusions	60
2.3 Use of Animal Skeletal Muscle: Animals for Locomotion (Hauling, Plowing, etc.)	21	References	61
2.4 Use of Animal Senses: Sniffer Animals	25		
2.5 Use of Animal Immune System: Production for Immunoglobulins (Specific Antibodies) for Therapy	26	4. Hunter-Gatherers	
2.6 Use of Animal Behaviors, Including Service and Therapy Animals	28	COLIN G. SCANES	
2.7 Use of Animal Hormones	31	4.1 Introduction	65
2.8 Use of Animal Tissues as Xenografts	32	4.2 Present Hunter-Gatherer Societies	65
2.9 Use of Animal Macromolecules With Special Characteristics	32	4.3 Paleolithic Hunter-Gatherer Society	70
2.10 Use of Animal Toxins as Drugs: Employment of Unique Animal Proteins	33	4.4 The Paleolithic Diet	74
2.11 Uses of Animal Adipose Tissue (Fat): Nonfood Uses	33	4.5 Hunter Gathering Continues in Fishing (Capture Fish)	76
		4.6 Residual Impact of Hunting on Nutrition in Western Countries	78
		4.7 Conclusions	78
		References	79

5. Animals and Hominid Development		7.8 Finfish Aquaculture	153
COLIN G. SCANES		7.9 Interspecies and Intraspecies Hybrids	155
5.1 Overview	83	7.10 Production and Marketing Systems	156
5.2 Hominid Evolution	84	7.11 Impacts of Livestock and Poultry in Poverty Alleviation	158
5.3 Changes in Anatomy During Human Evolution	88	7.12 Conclusions	159
5.4 Diet(s) of Human Ancestors?	91	References	159
5.5 Approaches to Understanding the Diet of Hominid Ancestors	94	The Avatars of Animal Agriculture: The Global Impact of Livestock in Alleviating Hunger	163
5.6 Predation and Human Development	95	KENNETH M. QUINN	
5.7 Conclusions	96	Thoughts on the Evolution of the Domestic Chicken as Food for Humans	167
References	99	PAUL SIEGEL	
6. The Neolithic Revolution, Animal Domestication, and Early Forms of Animal Agriculture		Impact of Animal Feeds	170
COLIN G. SCANES		LUCY WALDRON	
6.1 Introduction	103	Sustainable Livestock Production	174
6.2 Neolithic Revolution	103	MARK RASMUSSEN, COLIN SCANES	
6.3 Transition From Hunter–Gatherer to Farming Societies in the Near East (Epipaleolithic to Neolithic Transition)	104	8. Invertebrates and Their Use by Humans	
6.4 Impacts of the Neolithic Revolution on Human Health, Nutrition, Population, and Growth	107	COLIN G. SCANES	
6.5 Toward an Explanation of the Neolithic Revolution	109	8.1 Introduction	181
6.6 Domestication of Crops	110	8.2 Arthropods and Their Use by People	182
6.7 Animal Domestication	113	8.3 Crustaceans as Foods	182
6.8 Early Forms of Animal Agriculture	123	8.4 Consumption of Insects	183
6.9 Conclusions	125	8.5 Honeybees, Honey, and Wax	185
References	126	8.6 Silk Worm and Silk	187
7. Animal Agriculture: Livestock, Poultry, and Fish Aquaculture		8.7 Mollusks and Their Use by People	188
COLIN G. SCANES		8.8 Echinoderms and Their Use by Humans	189
7.1 Introduction	133	8.9 Edible Sea Squirts (Tunicates)	190
7.2 Biology Undergirding Use of Livestock and Poultry for Food	135	8.10 Edible Jellyfish	191
7.3 Livestock and Poultry for Meat Production	138	8.11 Biomedical Uses of Invertebrates	191
7.4 Livestock for Milk Production	142	8.12 Other Uses	191
7.5 Poultry for Egg Production	143	8.13 Conclusions	192
7.6 Intensive and Extensive Production of Livestock and Poultry Encompassing Animal Welfare	144	References	192
7.7 Specialized Production Systems Including Organic Farming	148	9. Animals in the Military	
		COLIN SALTER	
		9.1 Introduction: Other Animals Are Not Quite Present	195
		9.2 Historical Roots, Early Uses	204
		9.3 Horses: A Persistence Choice in War	211
		9.4 Recognition and Commemoration as Obfuscation	217
		9.5 Conclusions: Use, Memorialization, and Epistemic Violence	219
		References	221

10. Animals in Entertainment

COLIN G. SCANES

10.1 Introduction	225
10.2 Zoos, Aquaria, and Animal Parks	225
10.3 Animal Shows	230
10.4 Animal Riding, Racing, and Pleasure Carriages	232
10.5 Hunting and Shooting	235
10.6 Fishing	238
10.7 Historical and/or Cultural Animal Fighting and Baiting	240
10.8 Legislation and Public Opinion on Animals in Entertainment and Sport	241
10.9 Conclusions	243
References	244
The Horse–Human Bond	247

KARYN MALINOWSKI

The Economic Impact of Horses in the United States	251
--	-----

KARYN MALINOWSKI

11. Animals and Religion, Belief Systems, Symbolism and Myth

COLIN G. SCANES, PU CHENGZHONG

11.1 Introduction	257
11.2 Animals and Religions	257
11.3 Animals and Belief Systems	269
11.4 Animals as Symbols	272
11.5 Animals and Myth or Legend	275
11.6 Commentary	277
References	277

12. Animals as Companions

KATE MORNEMENT

12.1 The History of Companion Animal (Pet) Keeping	281
12.2 Modern-Day Human–Companion Animal Relationships	284
12.3 Costs and Benefits of Human–Companion Animal Relationships	296
12.4 The Future of Human–Companion Animal Relationships	299
References	300

13. Animals in Medicine and Research

TIFFANI J. HOWELL

13.1 Introduction: Why Use Animals at All?	305
13.2 History of the Use of Animals in Science and Medicine	306
13.3 Advantages and Disadvantages of Using Laboratory Animals	309
13.4 Noninvasive and Field-Based Research in Animal Studies	314
13.5 Medical Advances Due to Animal Research	317
13.6 Service and Therapy Animals	318
13.7 Conclusions	320
References	321
Animal Experimentation	325

LARRY S. KATZ

14. Animals and Human Disease: Zoonosis, Vectors, Food-Borne Diseases, and Allergies

COLIN G. SCANES

14.1 Introduction	331
14.2 Zoonotic Diseases	331
14.3 Prion Zoonosis	332
14.4 Viral Zoonoses	334
14.5 Bacterial Zoonoses	338
14.6 Protozoan Zoonoses	340
14.7 Vector-Borne Diseases	340
14.8 Animal Products, Food Safety, and Food-Borne Diseases	344
14.9 Animals and Allergies	346
14.10 Lactose Intolerance	348
14.11 Animal Bites, Stings, and Venom	348
14.12 Animals as a Source of Antivenom	350
14.13 Conclusions	351
References	351

15. Pest Animals

SAMIA R. TOUKHSATI, COLIN G. SCANES

15.1 Overview of Pests	355
15.2 Rats and Mice	355
15.3 Birds	358
15.4 Biting and Stinging Pests	363
15.5 Insects as Pests	365

15.6 Nematodes as Pests in Crop Production	375	19. Human Activity and Habitat Loss: Destruction, Fragmentation, and Degradation	
15.7 Conclusions	376	COLIN G. SCANES	
References	376		
16. Parasites		19.1 Impact of Agriculture	451
COLIN G. SCANES, SAMIA R. TOUKHSATI		19.2 Impact of Urbanization	453
16.1 Overview of Human Parasites	383	19.3 Impact of Roads on Habitat Loss	455
16.2 Single-Celled Parasites (Protozoa or Protista)	387	19.4 Impact of the Energy Sector	456
16.3 Nematodes	389	19.5 Impact of Mining	459
16.4 Cestodes (Tapeworms)	395	19.6 Influences of Climate Change on Habitat Loss	460
16.5 Trematodes (Flukes)	397	19.7 Other Human Impacts of Habitats	464
16.6 Ectoparasites	399	19.8 Conclusions	464
16.7 Parasites in Poultry and Livestock	404	References	465
16.8 Ectoparasites in Livestock	406	Animal Waste	470
16.9 Conclusions	406	C. MIKE WILLIAMS	
References	407	Wildlife and Environmental Pollution	472
17. Invasive Species		BARNETT A. RATTNER	
COLIN G. SCANES		Human–Wildlife Conflicts	478
17.1 Introduction	413	LARRY CLARK	
17.2 Mammalian Invasive Species	415	20. Animal Welfare and Animal Rights	
17.3 Avian Invasive Species	419	CLIVE J.C. PHILLIPS, KATRINA KLUSS	
17.4 Reptilian Invasive Species	420	20.1 Introduction	483
17.5 Amphibian Invasive Species	422	20.2 Differences Between Animal Welfare and Rights	486
17.6 Aquatic Invasive Species	422	20.3 Differences in People's Moral Behavior Toward Animals	494
17.7 Conclusions	423	20.4 The Future of Animal Welfare and Rights	495
References	424	References	496
18. Impact of Agricultural Animals on the Environment		21. Animal Extinctions	
COLIN G. SCANES		SAMIA R. TOUKHSATI	
18.1 Introduction	427	21.1 The "Big Five" Mass Extinctions	500
18.2 Global Impact of Animal Agriculture on Water Use	428	21.2 Sixth Mass Extinction: the Holocene– Anthropocene Extinction	505
18.3 Impact of Agricultural Animals on Water Quality (Run-Off)	428	21.3 Ecosystem Biodiversity and Animal Extinctions	509
18.4 Livestock and Poultry, Greenhouse Gases, and Climate Change	436	21.4 Threats to Biodiversity	509
18.5 Livestock and Poultry and Air Quality	441	21.5 Animal Conservation	514
18.6 Livestock and Poultry and Soil Quality	444	References	515
18.7 Conclusions	445	Index	519
References	445
