# Kazhdan–Lusztig Cells with Unequal Parameters

# Contents

## Part I Preliminaries

<b>1</b>	<b>Preorders on Bases of Algebras</b> . . . . .	<b>3</b>
1.1	Definitions . . . . .	3
1.1.A	Preorders . . . . .	3
1.1.B	Cells . . . . .	4
1.1.C	Cell Modules . . . . .	5
1.1.D	Examples . . . . .	7
1.2	Preorders and Symmetrizing Forms . . . . .	8
<b>2</b>	<b>Lusztig's Lemma</b> . . . . .	<b>13</b>
2.1	Invariant Bases . . . . .	14
2.2	Base Change . . . . .	16

## Part II Coxeter Systems, Hecke Algebras

<b>3</b>	<b>Coxeter Systems</b> . . . . .	<b>19</b>
3.1	Characterizations of Coxeter Systems . . . . .	19
3.2	First Properties . . . . .	21
3.3	Reflections, Roots . . . . .	21
3.4	Braided Maps . . . . .	23
3.5	Bruhat Order . . . . .	27
3.6	Parabolic Subgroups . . . . .	27
3.7	Longest Element, Left and Right Descent Set . . . . .	30
3.8	More on Reflections . . . . .	31
3.9	Conjugacy Classes of Involutions . . . . .	32
3.10	Fixed Points under Automorphisms . . . . .	34
3.11	Geometric Representation . . . . .	36
3.11.A	Coxeter Matrix, Coxeter Graph . . . . .	36
3.11.B	Reflection Representation . . . . .	37
3.11.C	Irreducibility . . . . .	38

3.12	Some Classification Results . . . . .	39
3.12.A	Finiteness . . . . .	39
3.12.B	Tame Groups . . . . .	41
3.12.C	Hyperbolic Coxeter Systems . . . . .	42
3.13	Tits Cone, Coxeter Complex . . . . .	43
3.14	Drawing Coxeter Groups . . . . .	44
3.14.A	Rank 2 . . . . .	44
3.14.B	Rank 3 . . . . .	44
<b>4</b>	<b>Hecke Algebras . . . . .</b>	<b>53</b>
4.1	Definition, First Properties . . . . .	53
4.1.A	Basis . . . . .	54
4.1.B	Parabolic Subalgebras . . . . .	55
4.1.C	Anti-involution . . . . .	55
4.1.D	Central Form . . . . .	56
4.2	The Case where $A$ is a Group Algebra . . . . .	56
4.2.A	Index, Sign . . . . .	57
4.2.B	Central Form . . . . .	57
4.2.C	Invertibility . . . . .	58
4.2.D	Involutions . . . . .	58
4.3	Functoriality, Parameters . . . . .	59
4.3.A	Changing the Group . . . . .	59
4.3.B	Generic Hecke Algebra . . . . .	60
4.3.C	Changing Signs . . . . .	61
4.3.D	Vanishing Parameters . . . . .	61
4.4	$r$ -Polynomials . . . . .	62
4.5	Reflection Representation . . . . .	66
 <b>Part III Kazhdan–Lusztig Cells</b>		
<b>5</b>	<b>The Kazhdan–Lusztig Basis . . . . .</b>	<b>73</b>
5.1	Degree, Valuation, Properties of $A$ . . . . .	73
5.2	The Kazhdan–Lusztig Basis . . . . .	74
5.3	Kazhdan–Lusztig Polynomials . . . . .	75
5.4	Functoriality, Parameters . . . . .	76
5.4.A	Changing $\mathcal{A}$ . . . . .	76
5.4.B	Changing Signs . . . . .	76
5.4.C	Vanishing Parameters . . . . .	77
5.5	Structure Constants . . . . .	78
5.6	An Algorithm . . . . .	81
5.7	Examples . . . . .	85

<b>6</b>	<b>Kazhdan–Lusztig Cells</b> . . . . .	93
6.1	Preorders on $W$ . . . . .	93
	6.1.A Cells . . . . .	94
	6.1.B Cell Modules . . . . .	94
6.2	Functoriality, Parameters . . . . .	96
	6.2.A Changing the Group . . . . .	96
	6.2.B Changing Signs . . . . .	97
	6.2.C Vanishing Parameters . . . . .	97
6.3	Descent Sets . . . . .	99
6.4	About the Structure Constants $\lambda_{x,y}^s$ and $\rho_{x,y}^s$ . . . . .	100
6.5	Some Conjectures . . . . .	101
6.6	Drawing Kazhdan–Lusztig Cells . . . . .	102
6.7	Examples . . . . .	103
<b>7</b>	<b>Semicontinuity</b> . . . . .	111
7.1	Faces, Chambers . . . . .	112
7.2	Cells . . . . .	112
7.3	Examples . . . . .	113
 <b>Part IV General Properties of Cells</b>		
<b>8</b>	<b>Cells and Parabolic Subgroups</b> . . . . .	119
8.1	The Kazhdan–Lusztig–Geck Basis . . . . .	120
8.2	Induction Theorems . . . . .	122
8.3	The Restriction Theorem . . . . .	124
8.4	Induction of Isomorphic Cells . . . . .	126
	8.4.A Definition, Examples . . . . .	126
	8.4.B Induction . . . . .	128
	8.4.C About Strongness . . . . .	130
<b>9</b>	<b>Descent Sets, Knuth Relations and Vogan Classes</b> . . . . .	133
9.1	Enhanced Descent Sets . . . . .	134
9.2	Knuth Relations . . . . .	134
9.3	Vogan Classes . . . . .	135
<b>10</b>	<b>The Longest Element and Duality in Finite Coxeter Groups</b> . . . . .	139
10.1	About $\omega_0$ . . . . .	139
10.2	The Inversion Formula . . . . .	140
10.3	Cells, Structure Constants . . . . .	142
10.4	Cell Modules . . . . .	144
10.5	The Element $C_{w_0}$ . . . . .	145
<b>11</b>	<b>The Guilhot Induction Process</b> . . . . .	147
11.1	Main Result . . . . .	147
11.2	Application to the Asymptotic Case . . . . .	150

<b>12</b>	<b>Submaximal Cells (Split Case)</b> . . . . .	155
12.1	About the Elements of $\Gamma^{\text{uni}}$ . . . . .	156
12.1.A	Elementary Properties . . . . .	156
12.1.B	Description of $\Gamma^{\text{uni}}$ . . . . .	156
12.1.C	Further Properties . . . . .	157
12.1.D	Finiteness . . . . .	158
12.2	Submaximal Cells . . . . .	160
12.3	Cell Modules, $W$ -graphs . . . . .	162
12.3.A	Description . . . . .	162
12.3.B	Homomorphisms . . . . .	164
12.3.C	Reflection Representation . . . . .	165
12.4	Unfolding Coxeter Graphs . . . . .	166
<b>13</b>	<b>Submaximal Cells (General Case)</b> . . . . .	169
13.1	Submaximal Two-Sided Cells . . . . .	169
13.2	Submaximal Left Cells . . . . .	171
 <b>Part V Lusztig's <math>a</math>-Function</b>		
<b>14</b>	<b>Lusztig's Conjectures</b> . . . . .	175
14.1	Bounds . . . . .	175
14.2	Lusztig's $a$ -Function and Cells . . . . .	176
14.2.A	Definition . . . . .	176
14.2.B	Base Change . . . . .	179
14.2.C	Conjectures . . . . .	179
14.3	Reductions . . . . .	181
14.3.A	First Consequences of the Conjectures . . . . .	182
14.3.B	Some Implications between Lusztig's Conjectures . . . . .	183
14.3.C	About Conjecture (P15) . . . . .	185
<b>15</b>	<b>Split and Quasi-Split Cases</b> . . . . .	189
15.1	Recollection on Soergel Bimodules . . . . .	190
15.1.A	Polynomial Functions . . . . .	190
15.1.B	Graded Bimodules . . . . .	191
15.1.C	Soergel Bimodules . . . . .	191
15.1.D	Action of $\sigma$ . . . . .	193
15.2	Lusztig's Conjectures: the Split Case . . . . .	195
15.3	Lusztig's Conjectures: the Quasi-Split Case . . . . .	197
 <b>Part VI Applications of Lusztig's Conjectures</b>		
<b>16</b>	<b>Miscellanea</b> . . . . .	205
16.1	About Cells . . . . .	205
16.2	About Duflo Involutions . . . . .	206
16.3	Strongness of Cellular Pairs . . . . .	207

<b>17</b>	<b>Multiplication by <math>T_{w_0}</math></b> . . . . .	209
17.1	The Mathas–Lusztig Theorem . . . . .	209
17.2	Further Properties of the Pairs $(\lambda, \eta)$ and $(\rho, \eta)$ . . . . .	214
17.3	Some Examples . . . . .	216
<b>18</b>	<b>Action of the Cactus Group</b> . . . . .	219
18.1	Cellularity . . . . .	219
18.2	Action . . . . .	222
<b>19</b>	<b>Asymptotic Algebra</b> . . . . .	225
19.1	Definition . . . . .	225
19.2	A Morphism from $\mathcal{H}$ to $A \otimes_{\mathbb{Z}} \mathcal{I}$ . . . . .	227
19.3	Examples . . . . .	230
<b>20</b>	<b>Automorphisms</b> . . . . .	235
20.1	Statement . . . . .	236
20.2	Brauer Quotient . . . . .	236
	20.2.A Definition . . . . .	236
	20.2.B Applications to Hecke Algebras . . . . .	237
20.3	Proof of Theorem 20.1.1 . . . . .	239
20.4	Asymptotic Algebra . . . . .	240
 <b>Part VII Examples</b>		
<b>21</b>	<b>Finite Dihedral Groups</b> . . . . .	243
21.1	The Structure of $W$ . . . . .	244
	21.1.A About Elements . . . . .	244
	21.1.B About Characters . . . . .	245
21.2	The Kazhdan–Lusztig Basis . . . . .	246
21.3	Cells, Cell Modules . . . . .	250
21.4	Lusztig’s $\mathfrak{a}$ -Function and Lusztig’s Conjectures . . . . .	256
21.5	Action of $T_{w_0}$ . . . . .	259
<b>22</b>	<b>The Symmetric Group</b> . . . . .	263
22.1	Some Combinatorics . . . . .	263
	22.1.A Tableaux . . . . .	264
	22.1.B The Robinson–Schensted–Knuth Correspondence . . . . .	264
	22.1.C Descent Set . . . . .	265
	22.1.D Dominance Order . . . . .	266
22.2	Kazhdan–Lusztig Cells . . . . .	268
	22.2.A Knuth Relations . . . . .	268
	22.2.B Vogan Classes . . . . .	269
	22.2.C Cells . . . . .	269
	22.2.D Complements . . . . .	270
	22.2.E Example: Type $A_3$ . . . . .	270

<b>23</b>	<b>Affine Weyl Groups of Type <math>\tilde{A}_2</math></b> . . . . .	273
23.1	The Partition into Cells . . . . .	274
23.1.A	Submaximal Cells . . . . .	274
23.1.B	Parabolic Induction . . . . .	276
23.1.C	Cellular Maps (*-Operation) . . . . .	276
23.1.D	Lowest Two-sided Cell . . . . .	277
23.2	Complements . . . . .	278
23.2.A	Duflo Involutions . . . . .	278
23.2.B	Other Conjectures . . . . .	278
<b>24</b>	<b>Free Coxeter Groups</b> . . . . .	281
24.1	Group-Theoretic Properties . . . . .	282
24.1.A	Reduced Expressions . . . . .	282
24.1.B	Involutions . . . . .	282
24.1.C	Some Partitions of $W$ . . . . .	283
24.2	Boundedness . . . . .	284
24.3	About Kazhdan–Lusztig Basis Elements . . . . .	286
24.4	Duflo Involutions . . . . .	288
24.5	Cells . . . . .	289
24.6	Proof of the Conjectures . . . . .	292
24.7	The Infinite Dihedral Group . . . . .	294
24.7.A	Preliminary: Representations of $\mathbf{SL}_2(\mathbb{C})$ and $\mathbf{PGL}_2(\mathbb{C})$ . . . . .	294
24.7.B	The Equal Parameter Case . . . . .	295
24.7.C	The Unequal Parameter Case . . . . .	297
24.8	Rank 3 . . . . .	298
<b>25</b>	<b>Rank 3</b> . . . . .	303
25.1	Spherical Groups . . . . .	304
25.1.A	Type $B_3$ . . . . .	304
25.1.B	Type $H_3$ . . . . .	306
25.2	Affine Weyl Groups . . . . .	306
25.2.A	Type $\tilde{B}_2$ . . . . .	307
25.2.B	Type $\tilde{G}_2$ . . . . .	308
25.3	Hyperbolic Coxeter Systems . . . . .	309
25.4	Pictures . . . . .	311
<b>26</b>	<b>Some Bibliographical Comments</b> . . . . .	319
26.1	Finite Groups . . . . .	319
26.1.A	Split Case . . . . .	319
26.1.B	Unequal Parameter Case . . . . .	320
26.2	Affine Weyl Groups . . . . .	320
26.2.A	Split Case . . . . .	320
26.2.B	Unequal Parameter Case . . . . .	321

26.3	Other Groups . . . . .	321
26.3.A	Split Case . . . . .	321
26.3.B	Unequal Parameter Case . . . . .	321
<b>Appendix A:</b>	<b>Symmetric Algebras . . . . .</b>	<b>323</b>
A.1	Symmetrizing Form . . . . .	323
A.2	Dual Bases . . . . .	325
<b>Appendix B:</b>	<b>Reflection Subgroups of Coxeter Groups . . . . .</b>	<b>327</b>
B.1	Reflection Systems . . . . .	327
B.2	Reflection Subgroups of Coxeter Groups . . . . .	330
B.3	Semidirect Product Decomposition . . . . .	332
