Editor's Statement . . . . .	xi
Preface . . . . .	xiii
<b>Chapter 1 The Elementary Theory of Partitions . . . . .</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Infinite Product Generating Functions of One Variable. . . . .	3
1.3 Graphical Representation of Partitions . . . . .	6
Examples . . . . .	13
Notes . . . . .	14
References . . . . .	14
<b>Chapter 2 Infinite Series Generating Functions . . . . .</b>	<b>16</b>
2.1 Introduction . . . . .	17
2.2 Elementary Series-Product Identities . . . . .	17
2.3 Applications to Partitions. . . . .	23
Examples. . . . .	28
Notes . . . . .	30
References . . . . .	31
<b>Chapter 3 Restricted Partitions and Permutations . . . . .</b>	<b>33</b>
3.1 Introduction . . . . .	33
3.2 The Generating Function for Restricted Partitions . . . . .	33
3.3 Properties of Gaussian Polynomials . . . . .	35
3.4 Permutations and Gaussian Multinomial Coefficients . . . . .	39
3.5 The Unimodal Property . . . . .	45
Examples. . . . .	49
Notes . . . . .	51
References . . . . .	52
<b>Chapter 4 Compositions and Simon Newcomb's Problem . . . . .</b>	<b>54</b>
4.1 Introduction . . . . .	54

4.2	Composition of Numbers. . . . .	54
4.3	Vector Compositions. . . . .	57
4.4	Simon Newcomb's Problem. . . . .	59
	Examples. . . . .	63
	Notes . . . . .	65
	References . . . . .	65
<b>Chapter 5</b>	<b>The Hardy–Ramanujan–Rademacher Expansion of <math>p(n)</math>. . . . .</b>	<b>68</b>
5.1	Introduction . . . . .	68
5.2	The Formula for $p(n)$ . . . . .	71
	Examples. . . . .	81
	Notes . . . . .	85
	References . . . . .	86
<b>Chapter 6</b>	<b>The Asymptotics of Infinite Product Generating Functions</b>	<b>88</b>
6.1	Introduction . . . . .	88
6.2	Proof of Theorem 6.2 . . . . .	89
6.3	Applications of Theorem 6.2 . . . . .	97
	Examples. . . . .	97
	Notes . . . . .	100
	References . . . . .	101
<b>Chapter 7</b>	<b>Identities of the Rogers–Ramanujan Type . . . . .</b>	<b>103</b>
7.1	Introduction . . . . .	103
7.2	The Generating Functions . . . . .	106
7.3	The Rogers–Ramanujan Identities and Gordon's Generalization . . . . .	109
7.4	The Göllnitz–Gordon Identities and Their Generalization	113
	Examples. . . . .	116
	Notes . . . . .	118
	References . . . . .	118
<b>Chapter 8</b>	<b>A General Theory of Partition Identities. . . . .</b>	<b>121</b>
8.1	Introduction . . . . .	121
8.2	Foundations . . . . .	121
8.3	Partition Ideals of Order 1 . . . . .	124
8.4	Linked Partition Ideals. . . . .	128
	Examples. . . . .	136
	Notes . . . . .	137
	References . . . . .	138

<b>Chapter 9</b>	<b>Sieve Methods Related to Partitions</b>	139
9.1	Introduction	139
9.2	Inclusion–Exclusion	139
9.3	A Sieve for Successive Ranks	142
	Examples.	156
	Notes	158
	References	158
<b>Chapter 10</b>	<b>Congruence Properties of Partition Functions</b>	159
10.1	Introduction	159
10.2	Rödseth’s Theorem for Binary Partitions	161
10.3	Ramanujan’s Conjecture for $5^n$	167
	Examples.	175
	Notes	177
	References	178
<b>Chapter 11</b>	<b>Higher-Dimensional Partitions</b>	179
11.1	Introduction	179
11.2	Plane Partitions	179
11.3	The Knuth–Schensted Correspondence	184
11.4	Higher-Dimensional Partitions	189
	Examples.	198
	Notes	199
	References	200
<b>Chapter 12</b>	<b>Vector or Multipartite Partitions</b>	202
12.1	Introduction	202
12.2	Multipartite Generating Functions.	202
12.3	Bell Polynomials and Formulas for Multipartite Partition Functions	204
12.4	Restricted Bipartite Partitions	207
	Examples.	209
	Notes	210
	References	211

<b>Chapter 13</b>	<b>Partitions in Combinatorics</b>	212
13.1	Introduction	212
13.2	Partitions and Finite Vector Spaces	212
13.3	Partitions of Sets	214
13.4	The Combinatorics of Symmetric Functions.	221
	Examples.	225
	Notes	227
	References	228
<b>Chapter 14</b>	<b>Computations for Partitions</b>	230
14.1	Introduction	230
14.2	Elementary Algorithms.	230
14.3	Algorithms from Generating Functions	233
14.4	Computations for Higher-Dimensional Partitions	234
14.5	Brief Tables of Partition Functions	237
14.6	Table of the Plane Partition Function	237
14.7	Table of Gaussian Polynomials	240
14.8	Guide to Tables.	243
	Notes	243
	References	244
	Index for Definitions of Symbols	245
	Author Index	250
	Subject Index	252
