

Contrasts and Effect Sizes in Behavioral Research

A CORRELATIONAL APPROACH

ROBERT ROSENTHAL

*Department of Psychology, University of California,
Riverside, and Harvard University*

RALPH L. ROSNOW

Department of Psychology, Temple University

DONALD B. RUBIN

Department of Statistics, Harvard University

Contents

<i>Preface</i>	<i>page</i> ix
1 Basic Concepts of Focused Procedures	1
Focused versus Omnibus Questions	1
An Example	1
Effect Sizes and Significance Levels	4
REVIEW QUESTIONS	6
2 Basic Procedures for Two Groups	8
Comparing Two Groups	8
Correlation Effect Size (r)	9
Other Effect Sizes: Cohen's d and Hedges's g	11
Transforming Between Effect Size Measures	12
Counternull Value of an Effect Size	13
Counternull Value of a Point-Biserial r	14
Problems When Interpreting Effect Sizes	15
Binomial Effect Size Display	17
Relating BESD, r , and r^2	17
Counternull Value of the BESD	20
The BESD with Dichotomous Outcome Variables	21
How Big an Effect Size Is "Important"?	25
How Many Subjects? Considerations of Power	28
Extension to Unequal Sample Sizes in Two Groups	30
REVIEW QUESTIONS	35
3 One-Way Contrast Analyses	37
Obtaining Significance Levels	37
Effect Size Correlations	42
The Four r s in the Meta-Analytic Context	61
Extension to Unequal Sample Sizes in Three or More Groups	63
REVIEW QUESTIONS	68

4	Contrasts in Factorial Designs	71
	Prologue	71
	$r_{alerting}$: A Preliminary Look at the Data	71
	Obtaining Significance Levels	73
	$r_{contrast}$: The Maximally Partialled Correlation	74
	Another Example of the Calculation of $r_{alerting}$, Significance Levels, and $r_{contrast}$	76
	$r_{alerting}$, Significance Levels, and $r_{contrast}$ in Multifactor Designs with Unequal Sample Sizes	79
	$r_{effect\ size}$	79
	A More Detailed Example of the Calculation of $r_{effect\ size}$ and $r_{effect\ size NS}$	82
	A Three-Factor Example	84
	A Four-Factor Example	88
	r_{BESD}	92
	Effect Size Estimation When Contrast Weights of 0 Are Set Aside	102
	Extension to Unequal Sample Sizes in Factorial Designs	113
	Preview	121
	REVIEW QUESTIONS	122
5	Contrasts in Repeated Measures	125
	Intrinsically Repeated Measures Studies	125
	Introduction to Nonintrinsically Repeated Measures Studies	136
	Nonintrinsically Repeated Measures Studies: Significance Levels and $r_{contrast}$	137
	Nonintrinsically Repeated Measures Studies: Effect Size Correlations Other Than $r_{contrast}$	142
	REVIEW QUESTIONS	147
6	Multiple Contrasts	151
	Relationships among Contrasts	151
	Examining the Difference between Contrasts	159
	Unplanned Contrasts	170
	REVIEW QUESTIONS	178
Appendix A	List of Equations	185
	Chapter 2	185
	Chapter 3	187
	Chapter 4	189
	Chapter 5	190
	Chapter 6	190
Appendix B	Statistical Tables	191
	Table B.1 Table of Standard Normal Deviates (Z)	191
	Table B.2 Extended Table of t	192

Table B.3 Table of F	196
Table B.4 Table of χ^2	202
<i>References</i>	205
<i>Index</i>	209
