

# Contents

Chapter 1. Introduction . . . . .	1
1.1. Background . . . . .	1
1.2. The bordered Floer homology package . . . . .	3
1.3. On gradings . . . . .	5
1.4. The case of three-manifolds with torus boundary . . . . .	6
1.5. Previous work . . . . .	6
1.6. Further developments . . . . .	7
1.7. Organization . . . . .	7
Acknowledgments . . . . .	8
 Chapter 2. $\mathcal{A}_\infty$ structures . . . . .	 9
2.1. $\mathcal{A}_\infty$ algebras and modules . . . . .	9
2.2. $\mathcal{A}_\infty$ tensor products . . . . .	15
2.3. Type $D$ structures . . . . .	17
2.4. Another model for the $\mathcal{A}_\infty$ tensor product . . . . .	22
2.5. Gradings by non-commutative groups . . . . .	26
 Chapter 3. The algebra associated to a pointed matched circle . . . . .	 29
3.1. The strands algebra $\mathcal{A}(n, k)$ . . . . .	29
3.2. Matched circles and their algebras . . . . .	34
3.3. Gradings . . . . .	38
 Chapter 4. Bordered Heegaard diagrams . . . . .	 45
4.1. Bordered Heegaard diagrams: definition, existence, and uniqueness . . . . .	45
4.2. Examples of bordered Heegaard diagrams . . . . .	51
4.3. Generators, homology classes and $\text{spin}^c$ structures . . . . .	53
4.4. Admissibility criteria . . . . .	56
4.5. Closed diagrams . . . . .	58
 Chapter 5. Moduli spaces . . . . .	 61
5.1. Overview of the moduli spaces . . . . .	61
5.2. Holomorphic curves in $\Sigma \times [0, 1] \times \mathbb{R}$ . . . . .	64
5.3. Holomorphic curves in $\mathbb{R} \times Z \times [0, 1] \times \mathbb{R}$ . . . . .	70
5.4. Compactifications via holomorphic combs . . . . .	73
5.5. Gluing results for holomorphic combs . . . . .	82
5.6. Degenerations of holomorphic curves . . . . .	89
5.7. More on expected dimensions . . . . .	99
 Chapter 6. Type $D$ modules . . . . .	 109

6.1. Definition of the type $D$ module	109
6.2. $\partial^2 = 0$	111
6.3. Invariance	116
6.4. Twisted coefficients	142
Chapter 7. Type $A$ modules	145
7.1. Definition of the type $A$ module	145
7.2. Compatibility with algebra	147
7.3. Invariance	150
7.4. Twisted coefficients	155
Chapter 8. Pairing theorem via nice diagrams	157
Chapter 9. Pairing theorem via time dilation	161
9.1. Moduli of matched pairs	162
9.2. Dilating time	165
9.3. Dilating to infinity	171
9.4. Completion of the proof of the pairing theorem	183
9.5. A twisted pairing theorem	184
9.6. An example	185
Chapter 10. Gradings	189
10.1. Algebra review	189
10.2. Domains	190
10.3. Type $A$ structures	193
10.4. Type $D$ structures	197
10.5. Refined gradings	199
10.6. Tensor product	201
Chapter 11. Bordered manifolds with torus boundary	205
11.1. Torus algebra	205
11.2. Surgery exact triangle	208
11.3. Preliminaries on knot Floer homology	209
11.4. From $\widehat{CFD}$ to $HFK^-$	212
11.5. From $CFK^-$ to $\widehat{CFD}$ : Statement of results	216
11.6. Generalized coefficient maps and boundary degenerations	220
11.7. From $CFK^-$ to $\widehat{CFD}$ : Basis-free version	225
11.8. Proof of Theorem 11.26	244
11.9. Satellites revisited	250
Appendix A. Bimodules and change of framing	255
A.1. Statement of results	255
A.2. Sketch of the construction	256
A.3. Computations for 3-manifolds with torus boundary	261
A.4. From $HFK$ to $\widehat{CFD}$ for arbitrary integral framings	265
Bibliography	269
Index of Definitions	273
