Motivic Integration

CONTENTS

1. Prologue: p-Adic Integration	1
§ 1. Analytic Manifolds.....	1
1.1. Local Fields.....	1
1.2. Analytic Manifolds.....	6
1.3. Hensel's Lemma.....	9
1.4. Differential Forms and Measures.....	12
1.5. Classification of Compact K -analytic Manifolds.....	16
1.6. K -analytic Manifolds Associated with Smooth Schemes..	18
§ 2. The Theorem of Batyrev–Kontsevich.....	25
2.1. Calabi–Yau Varieties.....	25
2.2. Hodge Numbers and Hasse–Weil Zeta Functions.....	26
2.3. From Complex Numbers to p -adic Numbers.....	30
§ 3. Igusa's Local Zeta Function.....	32
3.1. The Local Zeta Function.....	32
3.2. Denef's Formula.....	40
3.3. The Topological Zeta Function of Denef–Loeser.....	43
3.4. The Monodromy Conjecture.....	46
3.5. Poincaré Series.....	50
2. The Grothendieck Ring of Varieties	55
§ 1. Additive Invariants on Algebraic Varieties.....	56
1.1. Definition and Examples.....	56
1.2. The Grothendieck Group of Varieties.....	57
1.3. Constructible Subsets and Additive Invariants.....	59
1.4. Piecewise Isomorphisms and Additive Invariants.....	63
§ 2. Motivic Measures.....	67
2.1. Definition of Motivic Measures.....	67
2.2. The Ring Structure on $K_0(\mathbf{Var}_S)$	68
2.3. Piecewise Trivial Fibrations.....	69

2.4. Some Classes in $K_0(\mathbf{Var}_S)$	71
2.5. Spreading-Out and Applications.....	74
2.6. Variants.....	77
§ 3. Cohomological Realizations.....	80
3.1. Grothendieck Rings of Categories.....	80
3.2. Mixed Hodge Theory and Motivic Measures.....	85
3.3. Hodge Realization over a Base.....	90
3.4. Étale Cohomology and Motivic Measures.....	94
3.5. Étale Realization over a Base.....	98
3.6. The Crystalline Realization.....	103
3.7. Motivic Homotopic Realizations.....	108
§ 4. Localization, Completion, and Modification.....	109
4.1. Dimensional Filtration.....	109
4.2. Localization.....	110
4.3. Completion.....	111
4.4. A Modified Grothendieck Ring of Varieties.....	113
§ 5. The Theorem of Bittner.....	120
5.1. Bittner's Presentation of $K_0(\mathbf{Var}_S)$	120
5.2. Application to the Construction of Motivic Measures....	127
5.3. Motives and Motivic Measures.....	129
§ 6. The Theorem of Larsen–Lunts and Its Applications.....	133
6.1. The Theorem of Larsen–Lunts.....	133
6.2. Other Examples of Motivic Measures.....	137
6.3. The Cut-and-Paste Property.....	139
6.4. Zero Divisors in the Grothendieck Ring of Varieties.....	144
6.5. Algebraically Independent Classes.....	147
3. Arc Schemes.....	153
§ 1. Weil Restriction.....	153
1.1. Reminders on Representability.....	154
1.2. The Weil Restriction Functor.....	157
1.3. Representability of a Weil Restriction: The Affine Case..	160
1.4. Representability: The General Case.....	161
§ 2. Jet Schemes.....	162
2.1. Jet Schemes of a Variety.....	162
2.2. Truncation Morphisms.....	165
2.3. Examples.....	166
§ 3. The Arc Scheme of a Variety.....	168
3.1. Arcs on a Variety.....	169
3.2. Relative Representability Properties.....	171
3.3. Representability of the Functor of Arcs.....	172
3.4. Base Point and Generic Point of an Arc.....	177
3.5. Constant Arcs.....	180
3.6. Renormalization of Arcs.....	181
3.7. Differential Properties of Jets and Arc Schemes.....	183

§ 4. Topological Properties of Arc Schemes.....	188
4.1. Connected Components of Arc Schemes.....	188
4.2. Irreducible Components of Arc Schemes.....	189
4.3. Kolchin's Irreducibility Theorem.....	191
4.4. Application of the Valuative Criterion.....	194
4.5. Irreducible Components of Constructible Subsets in Arc Spaces.....	195
§ 5. The Theorem of Grinberg–Kazhdan–Drinfeld.....	197
5.1. Formal Completion of the Space of Arcs.....	197
5.2. Weierstrass Theorems for Power Series.....	200
5.3. Reduction to the Complete Intersection Case.....	202
5.4. Proof of the Theorem of Grinberg–Kazhdan–Drinfeld....	204
5.5. Gabber's Cancellation Theorem and Consequences.....	207
4. Greenberg Schemes.....	211
§ 1. Complete Discrete Valuation Rings.....	212
1.1. Witt Vectors.....	212
1.2. Complete Discrete Valuation Rings and Their Extensions	218
1.3. The Structure of Complete Discrete Valuation Rings.....	221
§ 2. The Ring Schemes \mathcal{R}_n	225
2.1. Construction: The Equal Characteristic Case.....	225
2.2. Construction: The Mixed Characteristic Case.....	226
2.3. Basic Properties of the Ring Schemes \mathcal{R}_n	234
2.4. The Ideal Schemes \mathcal{I}_n^m	236
§ 3. Greenberg Schemes.....	240
3.1. Greenberg Schemes as Functors.....	240
3.2. Representability of the Greenberg Schemes.....	246
3.3. Greenberg Schemes of Formal Schemes.....	248
3.4. Néron Smoothenings of Formal Schemes.....	251
3.5. Néron Smoothening and Greenberg Schemes.....	253
§ 4. Topological Properties of Greenberg Schemes.....	255
4.1. Irreducible Components of Greenberg Schemes.....	255
4.2. Constructible Subsets of Greenberg Schemes.....	256
4.3. Thin Subsets of Greenberg Schemes.....	257
4.4. Order Functions and Constructible Sets.....	260
5. Structure Theorems for Greenberg Schemes.....	263
§ 1. Greenberg Approximation on Formal Schemes.....	264
1.1. Fitting Ideals.....	264
1.2. Greenberg Schemes of Smooth Formal Schemes.....	265
1.3. The Singular Locus of a Formal Scheme.....	266
1.4. An Application of Hensel's Lemma.....	270
1.5. Greenberg's Approximation Theorem.....	271
§ 2. The Structure of the Truncation Morphisms.....	277
2.1. Principal Homogeneous Spaces and Affine Bundles.....	277

2.2. Truncation Morphisms and Principal Homogeneous Spaces.....	278
2.3. The Images of the Truncation Morphisms.....	282
§ 3. Greenberg Schemes and Morphisms of Formal Schemes.....	288
3.1. The Jacobian Ideal and the Function ordjac_f	288
3.2. Description of the Fibers.....	293
3.3. Codimension of Constructible Sets in Greenberg Spaces..	297
3.4. Example: Contact Loci in Arc Spaces.....	300
6. Motivic Integration.....	305
§ 1. Motivic Integration in the Smooth Case.....	307
1.1. Working with Constructible Sets.....	307
1.2. The Change of Variables Formula in the Smooth Case...	309
§ 2. The Volume of a Constructible Subset of a Greenberg Scheme.....	311
2.1. What Is a Motivic Volume?.....	311
2.2. Reduction to the Reduced Flat Case.....	311
2.3. A Dimensional Lemma.....	312
2.4. Volume of Thin Constructible Subsets.....	314
2.5. Existence of the Volume of a Constructible Subset.....	316
§ 3. Measurable Subsets of Greenberg Schemes.....	318
3.1. Summable Families in $\widehat{\mathcal{M}}_{x_0}^R$	319
3.2. Definition of Measurable Subsets.....	320
3.3. Existence and Uniqueness of the Volume of Measurable Subsets.....	323
3.4. Countable Additivity of the Measure μ_x^*	326
3.5. Negligible Sets.....	330
3.6. C-Measurable Subsets of $\text{Gr}(X)$	331
§ 4. Motivic Integrals.....	333
4.1. Integrable Functions.....	334
4.2. Direct and Inverse Images of Measurable Subsets.....	336
4.3. The Change of Variables Formula.....	340
4.4. An Example: The Blow-Up.....	342
§ 5. Semi-algebraic Subsets of Greenberg Schemes.....	345
5.1. Semi-algebraic Subsets.....	345
5.2. Semi-algebraic Subsets of Greenberg Schemes.....	347
5.3. Measurability of Semi-algebraic Subsets.....	351
5.4. Rationality of Motivic Power Series.....	353
7. Applications.....	363
§ 1. Kapranov's Motivic Zeta Function.....	364
1.1. Symmetric Products of Varieties.....	364
1.2. Definition of Kapranov's Motivic Zeta Function.....	374
1.3. Motivic Zeta Functions of Curves.....	377
1.4. Motivic Zeta Functions of Surfaces.....	380

1.5. Rationality of Kapranov's Zeta Function of Finite Dimensional Motives.....	384
§ 2. Valuations and the Space of Arcs.....	386
2.1. Divisorial Valuations and Discrepancies.....	386
2.2. Valuations Defined by Algebraically Fat Arcs.....	388
2.3. Minimal Log Discrepancies and the Log Canonical Threshold.....	391
2.4. Arc Spaces and the Log Canonical Threshold.....	393
2.5. The Nash Problem.....	400
§ 3. Motivic Volume and Birational Invariants.....	403
3.1. Motivic Power Series.....	403
3.2. The Jacobian Ideal.....	405
3.3. Motivic Igusa Zeta Functions.....	407
3.4. Stringy Invariants.....	414
3.5. The Theorem of Batyrev–Kontsevich.....	417
§ 4. Denef–Loeser's Zeta Function and the Monodromy Conjecture.....	419
4.1. Motivic Zeta Functions Associated with Hypersurfaces...	419
4.2. The Motivic Nearby Fiber.....	423
4.3. Lefschetz Numbers of the Monodromy.....	424
4.4. The Motivic Monodromy Conjecture.....	427
§ 5. Motivic Invariants of Non-Archimedean Analytic Spaces....	427
5.1. Néron Smoothing for Formal R -schemes Formally of Finite Type.....	428
5.2. Motivic Integration of Volume Forms on Rigid Varieties .	429
5.3. The Motivic Serre Invariant.....	434
5.4. Comparison with p -adic Integration.....	435
5.5. The Trace Formula.....	437
§ 6. Motivic Zeta Functions of Formal Schemes and Analytic Spaces.....	439
6.1. Definition of the Motivic Zeta Function.....	439
6.2. Bounded Differential Forms.....	440
6.3. Resolution of Singularities for Formal Schemes.....	441
6.4. Néron Smoothing After Ramification.....	444
6.5. A Formula for the Motivic Zeta Function.....	446
6.6. Comparison with Denef and Loeser's Motivic Zeta Function.....	449
6.7. Motivic Zeta Functions of Calabi–Yau Varieties.....	451
§ 7. Motivic Serre Invariants of Algebraic Varieties.....	451
7.1. Weak Néron Models of Algebraic Varieties.....	452
7.2. Motivic Integrals and Motivic Serre Invariants for Smooth Algebraic Varieties.....	455
7.3. Motivic Serre Invariants of Open and Singular Varieties..	458
7.4. The Trace Formula.....	460

Appendix	465
§ 1. Constructibility in Algebraic Geometry.....	465
1.1. Constructible Subsets of a Scheme.....	465
1.2. The Constructible Topology.....	467
1.3. Constructible Subsets of Projective Limits.....	468
§ 2. Birational Geometry.....	469
2.1. Blow-Ups.....	469
2.2. Resolution of Singularities.....	470
2.3. Weak Factorization Theorem.....	471
2.4. Canonical Divisors and Resolutions.....	472
2.5. K -equivalence.....	474
2.6. A Birational Cancellation Lemma.....	476
§ 3. Formal and Non-Archimedean Geometry.....	478
3.1. Formal Schemes.....	478
3.2. Morphisms of Finite Type and Morphisms Formally of Finite Type.....	483
3.3. Smoothness and Differentials.....	486
3.4. Formal Schemes over a Complete Discrete Valuation Ring.....	488
3.5. Non-Archimedean Analytic Spaces.....	491
