List of contributors	xi
Woodhead Publishing Series in Electronic and Optical Materials	xiii
The role of lasers in additive manufacturing	1
<i>M. Brandt</i>	
Introduction	1
Laser as tool in AM	3
Laser–matter interaction in AM	5
Trends in powder- or wire-fed technology	7
Trends in powder bed technology	11
Summary	17
References	17
Part One Processes, technology and materials	19
1 Laser-aided direct metal deposition of metals and alloys	21
<i>J. Mazumder</i>	
1.1 Introduction	21
1.2 Review of the laser-cladding process	23
1.3 Material microstructure design and realization	30
1.4 Experimental procedure	33
1.5 Results and discussion	37
1.6 Summary and conclusion	48
Acknowledgments	49
References	49
2 Powder bed fusion processes: an overview	55
<i>S. Sun, M. Brandt, M. Easton</i>	
2.1 Process characteristics	55
2.2 Processing parameters	56
2.3 Characteristics of the melt pool	58
2.4 Microstructural features	61
2.5 Mechanical properties of SLM-processed metallic parts	67
2.6 Concluding remarks	69
References	70

3	Hybrid laser manufacturing	79
	<i>F. Brückner, C. Leyens</i>	
3.1	Introduction	79
3.2	Overview of possible hybrid laser manufacturing procedures	80
3.3	Improving process performance by adding thermal heat sources	81
3.4	Hybrid approaches using mechanical impacts	94
3.5	Conclusions and outlook	94
	Acknowledgments	96
	References	96
4	Surface roughness optimisation for selective laser melting (SLM): accommodating relevant and irrelevant surfaces	99
	<i>M. Leary</i>	
4.1	Introduction	99
4.2	Additive manufacturing	100
4.3	Roughness	103
4.4	Case studies	109
4.5	Conclusions	115
	Nomenclature	115
	References	116
5	Mechanical properties of Ti6Al4V and AlSi12Mg lattice structures manufactured by Selective Laser Melting (SLM)	119
	<i>M. Mazur, M. Leary, M. McMillan, S. Sun, D. Shidid, M. Brandt</i>	
5.1	Introduction	119
5.2	Lattice structures	120
5.3	Selective laser melting manufacturability	125
5.4	Compressive testing results	136
5.5	Concluding remarks	156
	Nomenclature	157
	References	158
6	Laser additive manufacturing of ceramic components: materials, processes, and mechanisms	163
	<i>Y. Hagedorn</i>	
6.1	Introduction	163
6.2	Ceramic materials and conventional fabrication	163
6.3	AM processes for ceramics	165
6.4	Applications of additive manufactured ceramics	172
6.5	Conclusion and outlook	174
	References	176

7	Powder bed fusion of polymers	181
	<i>R. Goodridge, S. Ziegelmeier</i>	
7.1	Introduction	181
7.2	Laser sintering: basic principles	181
7.3	Materials for laser sintering	185
7.4	Material properties: physical	186
7.5	Material properties: thermal	188
7.6	Processing parameters	192
7.7	Processing Effects	196
7.8	Other polymer powder bed fusion systems	200
7.9	Conclusion	202
	Acknowledgements	202
	References	202
8	Polymer nanocomposites for laser additive manufacturing	205
	<i>J.H. Koo, R. Ortiz, B. Ong, H. Wu</i>	
8.1	Introduction	205
8.2	Experimental approach	208
8.3	Results and discussion	211
8.4	Summary and conclusions	233
	Acknowledgments	234
	References	234
9	Laser additive manufacturing using nanofabrication by integrated two-photon polymerization and multiphoton ablation	237
	<i>W. Xiong, L.J. Jiang, T. Baldacchini, Y.F. Lu</i>	
9.1	Introduction	237
9.2	Additive nanofabrication using two-photon polymerization	240
9.3	Subtractive micro-/nanofabrication using multiphoton ablation	246
9.4	Comprehensive 3D micro-/nanofabrication	250
9.5	Conclusions	254
	References	255
	Part Two Design strategies and life cycle costs	257
10	Design for laser additive manufacturing	259
	<i>C. Emmelmann, D. Herzog, J. Kranz</i>	
10.1	Introduction	259
10.2	Design restrictions of LAM	259
10.3	Product design approaches for LAM	265
10.4	Summary and conclusion	278
	References	278

11	Modelling of laser additive manufactured product lifecycle costs	281
	<i>C.F.W. Lindemann, U. Jahnke</i>	
11.1	Introduction into profitability and part selection for additive manufacturing	281
11.2	Introduction to lifecycle costing in additive manufacturing	285
11.3	Production costs	288
11.4	Self-costs	295
11.5	Lifecycle costs	297
11.6	Aspects of product piracy for lifecycle costing	299
11.7	Product piracy and additive manufacturing	300
11.8	Measures to prevent product piracy with the help of additive manufacturing: design for protection	301
11.9	Working with guidelines during product development	305
11.10	Technology and cost development	310
11.11	Summary and Outlook	311
	References	313
	Part Three Applications	317
12	Laser additive manufacturing of embedded electronics	319
	<i>R.C.Y. Auyeung, H. Kim, S. Mathews, N. Charipar, A. Piqué</i>	
12.1	Introduction	319
12.2	Laser-induced forward transfer of discrete components	321
12.3	Laser-induced forward transfer of functional materials systems	331
12.4	Laser-induced forward transfer of embedded circuit	343
12.5	Summary and outlook	345
	Acknowledgment	345
	References	346
13	Aerospace applications of laser additive manufacturing	351
	<i>R. Liu, Z. Wang, T. Sparks, F. Liou, J. Newkirk</i>	
13.1	Introduction	351
13.2	Aerospace component fabrication with additive manufacturing	352
13.3	Aerospace component repair with additive manufacturing	361
13.4	Challenges and potential future applications	366
	References	368
14	Laser sintering of ceramic materials for aeronautical and astronautical applications	373
	<i>A. Goulas, R.J. Friel</i>	
14.1	Introduction	373
14.2	Conventional manufacturing methods for ceramic components	374
14.3	Applications of ceramics in aeronautics and astronautics	383
14.4	Laser additive manufacturing methods for ceramic components	387
14.5	Future developments	393

14.6	Conclusions	394
	References	394
	Further reading	398
15	Laser additive manufacturing of customized prosthetics and implants for biomedical applications	399
	<i>M. Munsch</i>	
15.1	Introduction	399
15.2	Biocompatible materials and properties	399
15.3	Process chain for customized prosthetics and implants	405
15.4	Applications	407
15.5	Summary	416
	References	416
16	Laser additive printing of cells	421
	<i>L. Koch, A. Deiwick, B. Chichkov</i>	
16.1	Introduction	421
16.2	Laser-assisted bioprinting	422
16.3	Applications	426
16.4	Discussion	432
16.5	Summary	434
	Acknowledgments	434
	References	434
17	Additive manufacture of tools and dies for metal forming	439
	<i>R. Hölker-Jäger, A.E. Tekkaya</i>	
17.1	Introduction	439
17.2	Layer-laminated manufacturing	439
17.3	Powder bed-based additive manufacturing	450
17.4	Conclusion	462
	References	463
	Index	465
