Philadelphia

# Contents

<b>Preface</b>	<b>vii</b>
<b>1 Characteristics of Inverse Problems</b>	<b>1</b>
1.1 Preliminaries . . . . .	1
1.2 The least squares estimator . . . . .	6
1.3 The statistical properties of $\mathbf{x}_{LS}$ and ill-posedness . . . . .	8
1.4 An illustrative example . . . . .	11
Exercises . . . . .	12
<b>2 Regularization by Spectral Filtering</b>	<b>15</b>
2.1 Spectral filtering methods . . . . .	15
2.2 Regularization parameter selection methods . . . . .	19
2.3 Periodic and data-driven boundary conditions . . . . .	25
Exercises . . . . .	29
<b>3 Two-Dimensional Test Cases</b>	<b>33</b>
3.1 Two-dimensional image deblurring . . . . .	33
3.2 Computed tomography . . . . .	42
3.3 The preconditioned conjugate gradient iteration . . . . .	45
Exercises . . . . .	47
<b>4 Bayes' Law, Markov Random Field Priors, and MAP Estimation</b>	<b>53</b>
4.1 Bayes' law and regularization . . . . .	53
4.2 Choosing $p(\mathbf{x} \delta)$ : Gaussian Markov random fields . . . . .	54
4.3 Choosing $p(\mathbf{x} \delta)$ : Laplace Markov random fields . . . . .	65
4.4 The infinite-dimensional limit . . . . .	68
Exercises . . . . .	72
<b>5 Markov Chain Monte Carlo Methods for Linear Inverse Problems</b>	<b>77</b>
5.1 Sampling from high-dimensional Gaussian random vectors . . . . .	77
5.2 Hierarchical modeling of $\lambda$ and $\delta$ and sampling from $p(\mathbf{x}, \lambda, \delta \mathbf{b})$ . . . . .	81
5.3 Alternative MCMC methods for sampling from $p(\mathbf{x}, \lambda, \delta \mathbf{b})$ . . . . .	89
Exercises . . . . .	99
<b>6 Markov Chain Monte Carlo Methods for Nonlinear Inverse Problems</b>	<b>105</b>
6.1 A general setup for nonlinear inverse problems . . . . .	105
6.2 Levenburg–Marquardt nonlinear least squares optimization . . . . .	106

---

6.3	Randomize-then-optimize as a proposal for Metropolis–Hastings . . . . .	109
6.4	Nonlinear test cases . . . . .	112
6.5	Hierarchical modeling of $\lambda$ and $\delta$ and sampling from $p(\mathbf{x}, \lambda, \delta   \mathbf{b})$ . . . . .	118
	Exercises . . . . .	122
	<b>Bibliography</b>	<b>125</b>
	<b>Index</b>	<b>131</b>
