

Contents

Preface *vii*

Chapter 0 *What is Number Theory?* *1*

Chapter 1 *Divisibility* *8*

- 1.1 The Greatest Common Divisor and Least Common Multiple *8*
- 1.2 The Division Algorithm *12*
- 1.3 The Euclidean Algorithm *17*
- 1.4 Linear Combinations *22*
- 1.5 Congruences *28*
- 1.6 Mathematical Induction *32*

Chapter 2 *Prime Numbers* *42*

- 2.1 Prime Factorization *42*
- 2.2 Factorization in Other Systems *46*
- 2.3 The Fundamental Theorem of Arithmetic *48*
- 2.4 Prime Power Factorizations *53*
- 2.5 The Set of Primes Is Infinite *57*
- 2.6 A Formula for $d(n)$ *63*

Chapter 3 *Numerical Functions* *68*

- 3.1 The Sum of the Divisors *68*
- 3.2 Multiplicative Functions *74*
- 3.3 Perfect Numbers *80*
- 3.4 Mersenne and Fermat Numbers *85*

3.5	The Euler Phi Function	91
3.6	The Möbius Inversion Formula	97
Chapter 4 The Algebra of Congruence Classes		107
4.1	Solving Linear Congruences	107
4.2	The Chinese Remainder Theorem	115
4.3	More Than Two Congruences	121
4.4	The Theorems of Fermat and Euler	128
4.5	Public Key Cryptography	135
Chapter 5 Congruences of Higher Degree		149
5.1	Polynomial Congruences	149
5.2	Congruences with Prime Power Moduli	155
5.3	Quadratic Residues	163
5.4	Quadratic Reciprocity	170
5.5	The Jacobi Symbol	177
Chapter 6 The Number Theory of the Reals		185
6.1	Rational and Irrational Numbers	185
6.2	Finite Continued Fractions	192
6.3	Infinite Continued Fractions	200
6.4	Decimal Representation	210
6.5	Lagrange's Theorem and Primitive Roots	216
Chapter 7 Diophantine Equations		226
7.1	Pythagorean Triples	226
7.2	Sums of Two Squares	232
7.3	Sums of Four Squares	237
7.4	Sums of Fourth Powers	241
7.5	Pell's Equation	246
Bibliography		253
Answers to Odd-Numbered Numerical Problems		256
Index		263
