FOREWORD to the First Edition	iii
FOREWORD to the Second Edition	iv
FOREWORD to the Third Edition	iv
Introduction ...	1
Statement of the Problems of the Theory of Finite Differences ...	1
1. The Interpolation Problem ...	1
2. Summation of Functions and Equations in Finite Differences ...	3
3. The Statement of the Problem of the Theory of Finite Differences for Analytic Functions of a Complex Variable ...	4
CHAPTER 1—The Interpolation Problem ...	6
1.1. The General Statement of the Problem ...	6
1.2. The Chebyshev Polynomials ...	16
1.3. Newton's Formula for Equidistant Values of the Independent Variable ...	27
1.4. Various Representations of the Divided Difference in the General Case of the Arrangement of Interpolation Points ...	34
1.5. The Interpolation Process for the Triangular Table ...	44
1.6. Approximation of Functions ...	65
1.7. The Interpolation Problem and the Problem of Moments in the Complex Plane ...	108
CHAPTER 2—Newton's Series ...	120
2.1. Auxiliary Propositions ...	120
2.2. Newton's Series with Interpolation Points 1, 2, 3,	153
2.3. Newton's Series for Arbitrary Interpolation Points ...	190

CHAPTER 3—Construction of an Entire Function with Specified Elements	...	236
3.1. The Statement of the Problem and the Construction of an Entire Function in terms of its Values	... 236	
3.2. The Moment Problem in the Complex Domain of Entire Functions of Order not Higher than One and of Normal Type	... 254	
3.3. Particular Cases of the General Interpolation Problem	... 268	
3.4. Linear Differential Equations of Infinite Order with Constant Coefficients and certain Interpolation Problems leading to the Solution of such Equations	... 276	
CHAPTER 4—The Summation of Functions. Bernoulli's Numbers and Polynomials	...	291
4.1. The Statement of the Problem. Cases of Elementary Summation	... 291	
4.2. Bernoulli's Numbers and Bernoulli's Polynomials	... 303	
4.3. Euler's Formula	... 325	
CHAPTER 5—Finite Difference Equations	...	345
5.1. The Statement of the Problem	... 345	
5.2. First-Order Linear Equations	... 348	
5.3. Linear Equations. The General Theory	... 350	
5.4. Linear Equations with Constant Coefficients	... 371	
5.5. The Theorem of Poincaré	... 389	
5.6. Hölder's Theorem	... 405	
5.7. Linear Differential Equations of Infinite Order with Constant Coefficients	... 411	
References	... 447	
Index	... 449
