Contents

Preface to the Second Edition	xiii
Preface to the First Edition	xv
Authors	xvii
1. Preliminaries	1
1.1 Points and Sets in \mathbf{R}^n	1
1.2 \mathbf{R}^n as a Metric Space	2
1.3 Open and Closed Sets in \mathbf{R}^n , and Special Sets	5
1.4 Compact Sets and the Heine–Borel Theorem	9
1.5 Functions	10
1.6 Continuous Functions and Transformations	11
1.7 The Riemann Integral	12
Exercises	13
2. Functions of Bounded Variation and the Riemann–Stieltjes Integral	17
2.1 Functions of Bounded Variation	17
2.2 Rectifiable Curves	25
2.3 The Riemann–Stieltjes Integral	26
2.4 Further Results about Riemann–Stieltjes Integrals	34
Exercises	37
3. Lebesgue Measure and Outer Measure	41
3.1 Lebesgue Outer Measure and the Cantor Set	41
3.2 Lebesgue Measurable Sets	45
3.3 Two Properties of Lebesgue Measure	50
3.4 Characterizations of Measurability	52
3.5 Lipschitz Transformations of \mathbf{R}^n	54
3.6 A Nonmeasurable Set	57
Exercises	58
4. Lebesgue Measurable Functions	63
4.1 Elementary Properties of Measurable Functions	64
4.2 Semicontinuous Functions	69
4.3 Properties of Measurable Functions and Theorems of Egorov and Lusin	71
4.4 Convergence in Measure	73
Exercises	76

5.	The Lebesgue Integral	81
5.1	Definition of the Integral of a Nonnegative Function.....	81
5.2	Properties of the Integral.....	84
5.3	The Integral of an Arbitrary Measurable f	90
5.4	Relation between Riemann–Stieltjes and Lebesgue Integrals, and the L^p Spaces, $0 < p < \infty$	97
5.5	Riemann and Lebesgue Integrals.....	106
	Exercises.....	108
6.	Repeated Integration	113
6.1	Fubini’s Theorem.....	113
6.2	Tonelli’s Theorem.....	117
6.3	Applications of Fubini’s Theorem.....	120
	Exercises.....	125
7.	Differentiation	129
7.1	The Indefinite Integral.....	129
7.2	Lebesgue’s Differentiation Theorem.....	131
7.3	Vitali Covering Lemma.....	142
7.4	Differentiation of Monotone Functions.....	144
7.5	Absolutely Continuous and Singular Functions.....	149
7.6	Convex Functions.....	154
7.7	The Differential in \mathbf{R}^n	160
	Exercises.....	176
8.	L^p Classes	183
8.1	Definition of L^p	183
8.2	Hölder’s Inequality and Minkowski’s Inequality.....	185
8.3	Classes l^p	189
8.4	Banach and Metric Space Properties.....	191
8.5	The Space L^2 and Orthogonality.....	195
8.6	Fourier Series and Parseval’s Formula.....	199
8.7	Hilbert Spaces.....	203
	Exercises.....	205
9.	Approximations of the Identity and Maximal Functions	213
9.1	Convolutions.....	213
9.2	Approximations of the Identity.....	217
9.3	The Hardy–Littlewood Maximal Function.....	226
9.4	The Marcinkiewicz Integral.....	230
	Exercises.....	233

10. Abstract Integration.....	237
10.1 Additive Set Functions and Measures.....	237
10.2 Measurable Functions and Integration.....	244
10.3 Absolutely Continuous and Singular Set Functions and Measures	253
10.4 The Dual Space of L^p	263
10.5 Relative Differentiation of Measures	266
Exercises.....	273
11. Outer Measure and Measure	279
11.1 Constructing Measures from Outer Measures	279
11.2 Metric Outer Measures	282
11.3 Lebesgue–Stieltjes Measure	285
11.4 Hausdorff Measure.....	289
11.5 The Carathéodory–Hahn Extension Theorem	293
Exercises.....	298
12. A Few Facts from Harmonic Analysis	301
12.1 Trigonometric Fourier Series	301
12.2 Theorems about Fourier Coefficients.....	308
12.3 Convergence of $S[f]$ and $\tilde{S}[f]$	314
12.4 Divergence of Fourier Series.....	321
12.5 Summability of Sequences and Series	324
12.6 Summability of $S[f]$ and $\tilde{S}[f]$ by the Method of the Arithmetic Mean.....	332
12.7 Summability of $S[f]$ by Abel Means.....	346
12.8 Existence of \tilde{f}	351
12.9 Properties of \tilde{f} for $f \in L^p, 1 < p < \infty$	359
12.10 Application of Conjugate Functions to Partial Sums of $S[f]$	363
Exercises.....	364
13. The Fourier Transform	371
13.1 The Fourier Transform on L^1	372
13.2 The Fourier Transform on L^2	392
13.3 The Hilbert Transform on L^2	399
13.4 The Fourier Transform on $L^p, 1 < p < 2$	403
Exercises.....	406
14. Fractional Integration.....	415
14.1 Subrepresentation Formulas and Fractional Integrals	415
14.2 L^1, L^1 Poincaré Estimates, the Subrepresentation Formula, and Hölder Classes.....	421
14.3 Norm Estimates for I_α	432

14.4	Exponential Integrability of $I_\alpha f$	436
14.5	Bounded Mean Oscillation.....	444
	Exercises	452
15.	Weak Derivatives and Poincaré–Sobolev Estimates	461
15.1	Weak Derivatives	461
15.2	Smooth Approximation and Sobolev Spaces.....	471
15.3	Poincaré–Sobolev Estimates	478
	Exercises	496
	Notations	501
	Index	505
