
Weil's Conjecture for Function Fields: Volume I

Dennis Gaitsgory
Jacob Lurie

PRINCETON UNIVERSITY PRESS

PRINCETON AND OXFORD

2019

Contents

1	Introduction	1
1.1	The Mass Formula	2
1.1.1	Quadratic Forms	2
1.1.2	Classification of Quadratic Forms	4
1.1.3	The Smith-Minkowski-Siegel Mass Formula	6
1.1.4	The Unimodular Case	7
1.2	Adelic Formulation of the Mass Formula	9
1.2.1	The Adelic Group $O_q(\mathbf{A})$	9
1.2.2	Adelic Volumes	11
1.2.3	Digression: Local Fields	14
1.2.4	Tamagawa Measure	16
1.2.5	The Mass Formula and Tamagawa Numbers	20
1.2.6	Weil's Conjecture	23
1.3	Weil's Conjecture for Function Fields	24
1.3.1	Tamagawa Measure in the Function Field Case	24
1.3.2	Principal Bundles	27
1.3.3	Weil's Conjecture as a Mass Formula	30
1.4	Cohomological Formulation of Weil's Conjecture	33
1.4.1	The Moduli Stack of G -Bundles	33
1.4.2	Counting Points on Algebraic Varieties	35
1.4.3	The Trace Formula for $\text{Bun}_G(X)$	37
1.4.4	Weil's Conjecture	40
1.5	Computing the Cohomology of $\text{Bun}_G(X)$ over \mathbf{C}	41
1.5.1	Bundles on a Riemann Surface	41
1.5.2	The Atiyah-Bott Formula	43
1.5.3	Digression: Rational Homotopy Theory	44
1.5.4	The Product Formula	48
1.5.5	Proof of the Product Formula	54
1.5.6	Proof of the Atiyah-Bott Formula	55
1.6	Summary of This Book	58
2	The Formalism of ℓ-adic Sheaves	62
2.1	Higher Category Theory	65
2.1.1	Motivation: Deficiencies of the Derived Category	65
2.1.2	The Differential Graded Nerve	67
2.1.3	The Weak Kan Condition	69

2.1.4	The Language of Higher Category Theory	72
2.1.5	Example: Limits and Colimits	76
2.1.6	Stable ∞ -Categories	79
2.2	Étale Sheaves	80
2.2.1	Sheaves of Λ -Modules	81
2.2.2	The t-Structure on $\mathrm{Shv}(X; \Lambda)$	82
2.2.3	Functoriality	84
2.2.4	Compact Generation of $\mathrm{Shv}(X; \Lambda)$	86
2.2.5	The Exceptional Inverse Image	88
2.2.6	Constructible Sheaves	90
2.2.7	Sheaves of Vector Spaces	92
2.2.8	Extension of Scalars	94
2.2.9	Stability Properties of Constructible Sheaves	95
2.3	ℓ -adic Sheaves	97
2.3.1	ℓ -Completeness	97
2.3.2	Constructible ℓ -adic Sheaves	100
2.3.3	Direct and Inverse Images	101
2.3.4	General ℓ -adic Sheaves	104
2.3.5	Cohomological Descent	107
2.3.6	The t-Structure on ℓ -Constructible Sheaves	109
2.3.7	Exactness of Direct and Inverse Images	113
2.3.8	The Heart of $\mathrm{Shv}_{\ell}^c(X)$	114
2.3.9	The t-Structure on $\mathrm{Shv}_{\ell}(X)$	116
2.4	Base Change Theorems	118
2.4.1	Digression: The Beck-Chevalley Property	118
2.4.2	Smooth and Proper Base Change	120
2.4.3	Direct Images and Extension by Zero	121
2.4.4	Base Change for Exceptional Inverse Images	123
3	\mathbb{E}_{∞}-Structures on ℓ-Adic Cohomology	129
3.1	Commutative Algebras	131
3.1.1	Commutative Monoids	133
3.1.2	Symmetric Monoidal ∞ -Categories	135
3.1.3	Commutative Algebra Objects	137
3.1.4	Tensor Products of Chain Complexes	138
3.1.5	\mathbb{E}_{∞} -Algebras	140
3.1.6	\mathbb{E}_{∞} -Structures on Cochain Complexes	141
3.1.7	The Topological Product Formula with General Coefficients	143
3.2	Cohomology of Algebraic Stacks	145
3.2.1	ℓ -Adic Cohomology of Algebraic Varieties	145
3.2.2	Digression: Tensor Products of ℓ -Adic Sheaves	148
3.2.3	\mathbb{E}_{∞} -Structures on ℓ -adic Cochain Complexes	151
3.2.4	Algebraic Stacks and Fibered Categories	153

3.2.5	ℓ -Adic Cohomology of Algebraic Stacks	157
3.2.6	Digression: Fibered ∞ -Categories	159
3.3	The $!$ -Tensor Product	161
3.3.1	The Künneth Formula	163
3.3.2	Associativity of the $!$ -Tensor Product	166
3.3.3	Dualizing Sheaves	168
3.3.4	The ∞ -Category Shv_ℓ^*	170
3.3.5	The ∞ -Category $\mathrm{Shv}_\ell^!$	173
3.4	The Cohomology Sheaf of a Morphism	181
3.4.1	The Sheaf $[\mathcal{Y}]_{\mathcal{F}}$	183
3.4.2	Functoriality	185
3.4.3	Compatibility with Exceptional Inverse Images	187
3.4.4	Functoriality Revisited	189
3.4.5	Compatibility with External Tensor Products	192
3.4.6	Tensor Functoriality	196
3.4.7	The Algebra Structure on $[\mathcal{Y}]_X$	201
4	Computing the Trace of Frobenius	204
4.1	The Product Formula	205
4.1.1	Factorization Homology	206
4.1.2	Formulation of the Product Formula	208
4.2	The Cotangent Fiber	209
4.2.1	Augmented Commutative Algebras	209
4.2.2	Cotangent Fibers and Square-Zero Extensions	211
4.2.3	Examples of Cotangent Fibers	212
4.2.4	The \mathfrak{m} -adic Filtration	214
4.2.5	Convergence of the \mathfrak{m} -adic Filtration	216
4.2.6	Application: Linearizing the Product Formula	219
4.3	Convergent Frob-Modules	220
4.3.1	Definitions	221
4.3.2	The Case of an Augmented Algebra	221
4.3.3	The Proof of Proposition 4.3.2.1	222
4.4	The Trace Formula for BG	224
4.4.1	The Motive of an Algebraic Group	225
4.4.2	Digression: The Eilenberg-Moore Spectral Sequence	226
4.4.3	The Motive as a Cotangent Fiber	228
4.4.4	Proof of the Trace Formula	230
4.4.5	The Proof of Lemma 4.4.2.3	231
4.5	The Cohomology of $\mathrm{Bun}_G(X)$	233
4.5.1	The Motive of a Group Scheme	233
4.5.2	Estimating the Eigenvalues of Frobenius	235
4.5.3	The Proof of Theorem 4.5.0.1	236

5	The Trace Formula for $\text{Bun}_G(X)$	239
5.1	The Trace Formula for a Quotient Stack	242
5.1.1	A Convergence Lemma	242
5.1.2	The Proof of Proposition 5.1.0.1	244
5.1.3	Application: Change of Group	247
5.2	The Trace Formula for a Stratified Stack	250
5.2.1	Stratifications of Algebraic Stacks	251
5.2.2	Convergent Stratifications	253
5.2.3	The Proof of Proposition 5.2.2.5	255
5.3	The Harder-Narasimhan Stratification	259
5.3.1	Semistable G -Bundles	260
5.3.2	The Harder-Narasimhan Stratification: Split Case	262
5.3.3	Rationality Properties of the Harder-Narasimhan Stratification	264
5.3.4	Digression: Inner Forms	265
5.3.5	The Harder-Narasimhan Stratification: The Inner Case	267
5.4	Quasi-Compactness Properties of Moduli Spaces of Bundles	269
5.4.1	Quasi-Compact Substacks of $\text{Bun}_G(X)$	270
5.4.2	Varying G and X	271
5.4.3	Quasi-Compactness of Harder-Narasimhan Strata	275
5.5	Comparison of Harder-Narasimhan Strata	278
5.5.1	Parabolic Reductions	278
5.5.2	Digression: Levi Decompositions	281
5.5.3	Twisting Parabolic Reductions	282
5.5.4	Existence of Twists	283
5.5.5	Twisting as a Morphism of Moduli Stacks	286
5.5.6	Classification of Untwists	289
5.6	Proof of the Trace Formula	293
5.6.1	The Case of a Split Group Scheme	294
5.6.2	Reductive Models	295
5.6.3	The Proof of Theorem 5.0.0.3	299
5.6.4	The Proof of Proposition 5.6.3.2	301
	Bibliography	309
